Bank President And Pastor Of Presbyterian Church Are Speakers At Annual Dinner

The record of accomplishment of the First National Bank of Gettysburg during the last 15 years was outlined by its president, Edmund W. Thomas, at the 31st annual dinner of the shareholders of the bank Thursday night at the Hotel Gettysburg.

Rev. Robert A. MacAskill, pastor of the Gettysburg Presbyterian Church, was the featured speaker at the dinner for 250. He had as his subject "The Investment and Dividends of Life." The speaking program was carried over WGET.

Telling the group that "the two functions of any good bank are to receive deposits and make sound loans," President Thomas added, "The facts and records, particularly of growth, are the best yardstick by which you can tell when a bank is rendering a good service."

EDMUND W. THOMAS

REV. R. A. MacASKILL

Plan Additional Capital

For his comparisons he went back fifteen years ago, when the bank was recapitalized, observing, "This growth in deposits and resources since the date of the last recapitalization, 1942, have quite naturally brought about the necessity for additional capital and there will be offered some individual capital stock in the near future subject to the approval of the shareholders and the supervisory authorities, due notice of which will be given the shareholders who will have the privilege of exercising their preemptive rights to subscribe in proportion to their holdings.

"The excellent record of growth of your bank has made the additional capital stock necessary not only in keeping with governmental requirements which govern the ratio of capital stock but also to match this growth in size.

Increase In Loans

"Total loans of the bank in 1942 were $1,280,561.16, while total loans as of October 15, 1957 were $3,734,099.49, an increase of $2,453,538.33 or 191 per cent.

"Deposits in 1942 were $2,681,309. As of October 15 of this year deposits totaled $7,775,912.82, an increase of $5,094,603.82 or 190 per cent.

"In 1942 your bank owned $581,776.57 worth of U.S. Government bonds. Today it owns $2,099,987.06 worth of government bonds, an increase of $1,518,210.48 or 260 per cent.

"In 1942 the bank owned $62,660.90 worth of other bonds and securities. Today it owns $1,010,173.81, an increase of $947,512.91 or 1512 per cent. Incidentally the great majority of the listing under other bonds and securities are tax free, municipal bonds.

Resources Increase

"During the 15 year period since the banks last recapitalization total resources have increased 160 per cent, from $3,305,194.41 in 1942 to $8,569,216.80 as of October 15 of this year. That is an increase of $5,264,022,39.

"The ratio of mortgages to total time deposits as of October 15 was 43 per cent. Since a national bank may loan up to 60 per cent of its total time deposits for mortgages, we have 17 per cent still to use as the occasion arises. The ratio of total loans to total deposits is 48 per cent.

"While our deposits have increased by $5,094,603, our total increase in bonds and loans have been $4,919,-

JAYCEES PLAN BOSSES' NIGHT

At the meeting of the Gettysburg Junior Chamber of Commerce Thursday evening at the engine house, President Magnus Flaws Jr. announced plans for the third annual Bosses' Night to be held on Friday, November 8, at the Lincoln Logs at 7 o'clock.

Each year the Jaycees invite their bosses out to dinner to say "thank you" for the times their employers were "so generous in understanding when their employes were missing to do some work on a Jaycee project," Flaws said.

The speaker will be Morgan J. Doughton, Allentown, first vice president of the Pennsylvania Jaycees. He has been president of the Allentown Jaycees and served the state organization as chaplain and national director.

The master of ceremonies will be John Y. Crow, Gettysburg, administrative vice president of the Pennsylvania Jaycees. President Flaws announced that the committee for Bosses' Night is composed of Harold Ecker, chairman; Arthur Eckert and Edward Paris.

Invited guests will include Burgess G. Weaver, Paul L. Roy, editor of The Gettysburg Times; Parker G. Cunningham, manager of radio station WGET, and Jack Bartlett Sr., chief of police.

No Feature Game In Grid Contest

Due to postponement of the Gettysburg - Hershey football game, there will be no feature game point total considered in the weekly football contest sponsored by The Gettysburg Times and the 20 cooperating merchants this week.

In the event of ties, the merchandise certificate awards will be divided.

MEMBERSHIP IN LOCAL PTA SETS NEW HIGH MARK

Membership in the Gettysburg Parent-Teacher Association already has exceeded last year's total and the president, Mrs. John Y. Crow, has set the goal at 1,000 members for the current school year. Mrs. Crow said at the October meeting of PTA Thursday evening at the Keefauver school that 796 memberships already have been received. Last year there were 732.

About 160 attended Thursday's meeting and saw a demonstration of the teaching of reading in the First grade, witnessed the presentation of gifts by the PTA and heard departmental reports.

The discussion and demonstration of First grade reading methods was conducted by Mrs. C. A. Sloat, First grade teacher at Keefauver school, with the stage converted into a classroom and 18 of her First graders at their desks there.

Make Presentations

After a one-hour demonstration, Mrs. Sloat answered questions from the audience. In response to one query she said teachers do not object to parents teaching the "ABC's" at home, although they are not particularly useful to the children in that form, she added. Pupils learn the letters as they use them in school, she explained.

The program was introduced by Dr. Russell Rosenberger, head of the department of education at Gettysburg College, after the opening program for the meeting had been conducted by E. G. Hess on the theme of United Nations Day.

Deitrich Borowski, German exchange student at Gettysburg High School, was introduced by Jon Wagnild, president of the Gettysburg High School student council last year. Borowski spoke briefly and was presented by Miss Ruth McIlhenny with gifts from a half dozen local business places. She is chairman of

CLYDE R. COVER IS HONORED BY TEACHERS TODAY

Clyde R. Cover, Biglerville High School teacher, was elected president of the Adams County branch of the Pennsylvania State Education Association at the annual Adams County Institute session at Biglerville today.

Cover was elected to a position which was vacated twice within the last year. Dr. Herbert Bryan was elected president of the county PSEA last year. He resigned upon becoming an employe of the state Department of Public Instruction, making Charles Tressler, first vice president, the executive officer. Tressler then resigned when he accepted a post in New Jersey and Arthur M. Gordon, Biglerville, who had served as president several years ago, was the presiding officer at today's meeting.

Other officers named were Selon Dockey, principal of the New Oxford High School, vice president; Miss Jane Bowers, Fairfield teacher, secretary; H. Dean Stover, Littlestown, treasurer; John Riley, Littlestown, delegate; Mrs. Mary G. Rudisill, Lower Adams, alternate, and Mr. Gordon and Frank A. Keefer, Littlestown, auditors.

Dr. John Robbins Hart, superintendent of the Washington Memorial National Shrine at Valley

FBI Nabs Marine Corps Deserter Here

Joseph Raymond Ortwein, 22, a native of Covington, Ky., who had been sought since he deserted the Marine Corps Air station at Miami, was arrested Thursday by the FBI in Gettysburg, it was announced today by Carl E. Hennrich, special agent in charge of the Philadelphia office of the FBI.

Ortwein had been residing on York St. in Gettysburg for the last six weeks and had been employed at the Keystone-Ridgway plant here where he was taken into custody.

He was taken to prison at York by the FBI where he was to be turned over to the military authorities.

POSTPONE SCHOOL

Due to the grippe epidemic, the second session of the Adams County Leadership Training School, scheduled for Monday evening at the Gettysburg Church of the Brethren, Biglerville Rd., will be postponed one week. Registrations will be accepted Monday, November 4.

S. DUNCAN DIES THURSDAY IN LOCAL HOSPITAL

Schmucker Duncan, 86, Epley Apts., Chambersburg St., a grandson of founder of the Gettysburg Lutheran Theological Seminary and Gettysburg College, died Thursday night at 9 o'clock at the Warner Hospital where he had been a patient since October 15.

He was born October 31, 1871, in Gettysburg, a son of the late William A. and Catherine W. (Schmucker) Duncan. His mother was a daughter of the late Rev. Dr. Samuel Schmucker, first president of the Gettysburg Lutheran Theological Seminary and a founder and first instructor of Gettysburg College. It was principally through Rev. Dr. Schmucker's efforts that Gettysburg College was able to become established and obtain state aid which was its salvation in its early years.

Father Was Attorney

Schmucker Duncan's father, William A. Duncan, was an attorney in Gettysburg from 1859 to 1884. He served as district attorney of Adams County two terms and was a member of Congress from the York, Adams, Cumberland district at the time of his death at age 49 in 1882.

A brother of Schmucker Duncan, Charles S. Duncan, who died in 1928, was an attorney in Gettysburg for many years, served from 1914 to 1923 as postmaster of Gettysburg and was district attorney of Adams County from 1890 to 1897.

Schmucker Duncan was a graduate of Gettysburg College in the class of 1891 and received his Master of Arts degree from Yale University in 1894. He and a brother, William Mark Duncan, late of Los Angeles, Calif., were engaged in the banking business at Eureka Springs, Ark., for a number of years and were also engaged in a water business, piping water from the mountains and selling it to individuals and communities in the area.

In 1907 they sold out their interests and William Mark Duncan went to Los Angeles to become a hotel and apartment house owner.

Studied Abroad

Schmucker Duncan returned to Gettysburg and later went to Europe, where he studied in universities in Germany and France. He engaged in research in Cambridge University, England, for some time and then returned to the U. S. and was engaged in research work in Washington for many years. He also for a time operated a book store at Allentown. He resided in the family home on West Lincoln Ave. for a number of years before moving to the Epley Apts.

He is survived by a niece, Mrs. H. H. Beidleman, Harrisburg, and a nephew, C. William Duncan, one time Gettysburg newspaperman and later a reporter for the Philadelphia Evening Ledger, then the Philadelphia Inquirer and more recently a TV sports commentator in Philadelphia. He is also well known as a lecturer.

Private funeral services will be conducted Saturday afternoon by Rev. Dr. Harry H. Beidleman, Harrisburg.

With the death of Schmucker Duncan this is the first time since 1750 that Adams County is without a direct descendant of Adam Duncan, founder of this family.

SUES FOR DIVORCE

Irene I. (Fisher) Koontz, Gettysburg R. 3, is seeking a divorce from Clarence L. Koontz, also of Gettysburg R. 3, according to a complaint filed in the office of the prothonotary for Mrs. Koontz by Attorney Eugene V. Bulleit. Desertion is charged. The couple wed in 1938.

Calls On Canvassers To Complete Work

With donations to the Gettysburg Community Chest now $17,400, Gordon J. Webster, vice president and fund drive chairman, today urged the 50 residential solicitors who have not as yet reported to "seek to make every effort to clean up the drive over the weekend."

Webster noted that "to a large extent the success of the drive will depend on the effort these last 50 solicitors put into it. Reports from gifts still to be received — and therefore not as yet included in the total — but which have been voted by various organizations or promised by individuals and businesses will bring us up to within possibly $2,000 of our goal. If the 50 solicitors still out can make an excellent campaign over the weekend, our goal can be reached."

C. E. BUMBAUGH, WORLD WAR I VET, SUCCUMBS

Clarence E. Bumbaugh, 69, died at his home, 112 Hanover St., at 3:30 o'clock this morning. He had been in ill health since June.

A native of Gettysburg, he was a Navy veteran of World War I and a battlefield guide for many years. He was a son of the late James and Martha (Sease) Bumbaugh.

Survivors include his wife, the former Marion Craig; a daughter, Bernice, at home; a brother, Harry Bumbaugh, battlefield guide, and a sister, Miss Cora Bumbaugh, both of Gettysburg.

Services Monday

He was a member of the Sucon Lodge of the Masons, of Coopersburg, Pa., of the Harrisburg Zembo Temple and was also a member of the Gettysburg Battlefield Guides Association, the Albert J. Lentz, American Legion, the Gettysburg Elks and was an honorary member of the Veterans of Foreign Wars of Gettysburg.

Funeral services Monday afternoon at 2 o'clock at the Peters Funeral Home with the Rev. William Fenstermaker, pastor of the local Methodist Church, officiating. Interment in the National Cemetery. Friends may call at the funeral home Sunday evening from 7 to 9 o'clock.

Military rites at the grave will be conducted by the American Legion Honor Guard.

Members of the Elks Lodge will meet at the funeral home Sunday at 7 p.m.

DR. F. R. KNUBEL, COLLEGE GRAD DIES TUESDAY

The Rev. Dr. Frederick R. Knubel, 60, Gettysburg College alumnus and president since 1944 of the United Lutheran Synod of New York and New England, died at New Rochelle Hospital in New York Tuesday night following a heart attack.

He was the son of the late Dr. Frederick H. Knubel, first president of the ULCA, and long had been prominent in church affairs himself.

Paying tribute to him today, Dr. Franklin Clark Fry, now president of the ULCA and the Lutheran World Federation, said, "There are few Christian leaders of his stature in our generation."

Dr. Knubel was the salutatorian of the class of 1918 at the college and in 1923 was graduated from the Philadelphia seminary. He was an assistant pastor in Rochester, N. Y., and then became pastor of the Church of the Reformation there. He was vice president of the Parish and Church School Board of the ULCA and later was president of the Board of Education of the United Synod of New York.

Surviving are his widow, two daughters, Helen and Dorothy Ann, and a son, Frederick Henry; and a sister. Dr. Knubel had offices in Manhattan and resided at New Rochelle.

Funeral services will be held at 8:30 o'clock this evening at the Holy Trinity Lutheran Church at New Rochelle. Burial will be at Kenisco Cemetery, Valhalla, N. Y.

Taxicab And Auto Crash Here Today

A Little Taxicabs Co. taxi operated by Clyde W. Topper, 49, Gettysburg R. D., and an auto driven by Robert J. Drews, 23, Northport, N. Y., collided this morning on Buford Ave.

Borough police said the accident occurred at 9:45 o'clock as Topper was backing the taxi out of a private drive on Buford Ave. The Drews car struck the side of the taxi. Damage was estimated at $200 to the two vehicles.

MEET ON SUNDAY

The Auxiliary of the Sons of Union Veterans will meet at the Bender Funeral Home at 7 o'clock Sunday evening for the Glenn Keefer viewing.

693 PUPILS OUT OF SCHOOL HERE; SITUATION AT COLLEGE BETTER

Gettysburg College authorities reported today that "things are a little better" as far as the grippe epidemic here is concerned but public and parochial schools here failed to show any marked improvement in attendance today. There are 693 pupils absent in Gettysburg's schools.

At the college the restrictions on campus activities remain in force and there are 40 students in the emergency ward at the SCA building, 16 in Buehler Hall and the infirmary is full but the few new cases that turned up today have been taken care of at the infirmary without enlarging the number of patients in the emergency quarters.

At Gettysburg High School there were 216 pupils absent this morning as compared with 222 on Thursday.

Some Lists Grow Today

At Delone Catholic High School there was a slight increase in absences today. There were 175 pupils out of school this morning as against 173 on Thursday.

Attendance in the Gettysburg grade schools dropped today below Thursday's figure which was not as good as that for Wednesday. At Keefauver school there were 151 absent today where 129 had been out on Thursday. At Lincoln 47 were out today as against 48 Thursday but at Meade the absence list grew to 73 from Thursday's 66. High Street reported 30 pupils out today and Thursday.

Other public schools in the county were not in session today because of sessions of the Adams County Teachers' Institute being held at Biglerville today.

2 HARRISBURG MEN BADLY HURT IN AUTO CRASH

Two men were seriously injured this morning when their car left the Gettysburg-Harrisburg Rd., near Heidlersburg, and smashed into a concrete retaining wall.

State police said the accident occurred at 6:45 o'clock as the two men were in a 1957 Chevrolet headed south on Route 15.

John Lawson, 19, 1421 Reese St., Harrisburg, according to the officers, was driving the car, when one of its right wheels left the surface of the road. Lawson lost control, the car came back onto the highway, then left it again and turned, smashing almost head on into the retaining wall at the property of Mrs. Harry Stevens, York Springs R. 2, according to police. The car was demolished, with the officers listing damage to the vehicle at $2,300 and to the retaining wall at $50.

To File Charge

York Springs firemen brought Lawson and Theodore F. Jefferson, 22, 1212 N. 16th St., Harrisburg, a passenger in and owner of the car, to the Warner Hospital here by ambulance.

At the hospital Jefferson was found to have a fractured spine, lacerations of the top of the scalp and a black eye. Lawson was found to have a fracture of the upper left leg, lacerations of the scalp and bruises. Both were reported in "fair condition."

Police said they will bring a charge of reckless driving against Lawson.

Woman Will Address Hospital Auxiliary

Mrs. P. Joseph Perinchief, associate director of Will, Folsom and Smith Company, the firm which will conduct the campaign to raise $350,000 for the Warner Hospital will address the Woman's Auxiliary of the hospital at its meeting Monday afternoon at 2 o'clock. The meeting will be held in the board room at the hospital.

Mrs. Perinchief will speak on "Hospital Auxiliaries and Public Relations." She was formerly director of volunteers and community relations at the Harrisburg Hospital.

BANK DONATES $1,250 TO DRIVE FOR HOSPITAL

A subscripiton of $1,250 by the Farmers' and Merchants' Bank of New Oxford to the Annie M. Warner Hospital building fund has brought the number of Adams County bank subscriptions to five, for a total of $20,520, it was announced this morning by Atty. Richard A. Brown, chairman of the fund.

The chairman recalled that recently two banks in Littlestown and two in Gettysburg had made their subscriptions in accordance with a formula based on their total resources. "In the case of our neighboring bank in New Oxford," he added "consideration had to be given to that community's proximity to another hospital where approximately one half of the patients from the New Oxford area receive hospital service. Nevertheless the directors have voted to contribute an amount equal to the formula adopted by the banks which already contributed.

Hope Is Goal

"Along with the growing evidence of individual and corporate support for the Warner Hospital fund, this additional bank subscription strengthens our confidence that the $350,000 fund will be fully subscribed," Brown concluded.

Following the addition of a new north wing at Warner Hospital after a sucessful campaign two years ago, a new south wing is now planned which will increase the bed capacity by twenty-five. The campaign will reach its public stage at an opening meeting on November 4.

BAND MEETS SUNDAY

All members of the Blue and Gray Band of Gettysburg are urgently requested to meet at the band room in the engine house in full uniform at 1:30 o'clock Sunday afternoon. All members are asked to make every effort possible to be present.

Members who have uniforms and who will be unable to be present Sunday are asked to notify Miss Grace Myers or George Olinger and turn in their uniforms so that other members of the band may be outfitted.

CANCEL SPOOK DANCE

The annual Halloween dance scheduled to be held at the Gettysburg Country Club Saturday evening has been cancelled because of the epidemic of illness in the community.

FACTORY WORKER HURT

Doris P. Ridenour, 18, Emmitsburg, was treated at the Warner Hospital for a compound fracture of her right middle finger received Thursday while doing machine work at the H. O. Toor Shoe Co., Emmitsburg.

LICENSED TO WED

Earl A. Lady, Biglerville, and Mildred I. Guise, Gettysburg, have secured a marriage license in Frederick.

R. B. STAUB, 40, OF NEW OXFORD DIES IN CRASH; BANKER IS HURT

Ryland B. (Salty) Staub, 40, manager of the New Oxford Social and Athletic Club, was fatally hurt and C. Robert Brothers, 34, cashier of the Farmers' and Merchants' Bank of New Oxford, was badly hurt in an automobile collision at 4:30 o'clock this morning at a street intersection northwest of the York fairgrounds.

Staub, who lived at 318 W. High St., New Oxford, was dead on arrival at the West Side Hospital in York where Brothers was reported in a serious condition today. He is suffering from internal injuries and multiple lacerations.

Reports from York state that Staub was driving Brothers' car when it was hit broadside by a panel truck operated by Clarence Spahr, 53, who lives nearby and was on his way to work at the Greenairy in West York. The Brothers car was overturned by the impact and both men were thrown onto the highway.

Services On Monday

Spahr also was taken to the hospital where he was being x-rayed today for neck injuries. Damage to his car was placed at $400 and that to the Brothers car at $600.

Staub was a native of New Oxford and a son of Cletus A. Staub and the late Annie M. Staub. He was a member of the Social and Athletic Club which he managed, belonged to the St. Mary's Immaculate Conception Church in New Oxford, the New Oxford Fire Company and the Paradise Boys School Fire Company.

Survivors include his wife, the former Rita A. Todt; his father; three children, Barbara A., Nancy L. and Joseph F., all at home; four brothers, Cyril J., Paul F., and Rodney J. Staub, all of New Oxford, and Robert G. Staub, Gettysburg R. 5; and four sisters, Mrs. George Kuhn, Mrs. Paul Kuhn, Miss Jane Staub and Mrs. James Plank, all of New Oxford.

Funeral services Monday morning meeting at the Fred F. Feiser Funeral Home at 8:30 o'clock with a requiem mass at 9 o'clock at St. Mary's Church with the Rev. Fr. Philip J. Gergen, pastor, officiating. Interment in St. Mary's Cemetery. Friends may call Sunday evening after 7 o'clock at the funeral home where prayers will be recited at 8:30 o'clock by Father Gergen.

BABY BEEF CLUB ROUNDUP IS SET FOR NOVEMBER 5

The annual roundup of the Adams County 4-H Baby Beef Club will be held Tuesday, November 5, at the farm of Jesse Hamme, near Abbottstown, Fred H. Attinger, associate Adams County farm agent, announced today.

Judging of the animals raised by the members during the past year will begin at 8:30 o'clock that morning with the eight of the steers to be selected to represent the Baby Beef Club in the state Farm Show at Harrisburg in January.

Starting New Club

The other steers will be taken to Lancaster for the annual 4-H Baby Beef show and sale there starting Wednesday, November 6, at 9 a.m. Sale of the club steers at Lancaster will begin at 1 o'clock Thursday afternoon, November 7.

Attinger also announced that the group is seeking 50 members for the 1958 Baby Beef Club which will begin November 25, closing date for new members. All steers in the new club will be weighed and tagged on that date, November 25.

In connection with the current club, all record books must be filled out and turned in to the county office by Saturday, November 2, Attinger said.

HOSPITAL REPORT

Admissions: Mrs. William Stites, Littlestown; Mrs. Elsie Rentzel, Fairfield R. 1; Dennis Richardson, Biglerville R. 2; Homer DeGroft, Littlestown R. 1; Barclay Lundy, Charlotte, Mich.; Harvey Bollinger, R. 3; Theodore Jefferson, Harrisburg; John Lawson, Harrisburg.

Discharges: Kenneth Sensenig, R. 3; Mrs. Elsie Heller, Aspers R. 1; infant daughter of Mr. and Mrs. Richard C. Wetzel, Taneytown; Mrs. Edwin McGlaughlin, Biglerville R. 2; Mrs. Roy Harman and infant daughter, York Springs R. 2; Mrs. Samuel Helsley and infant daughter, Biglerville; Mrs. Henry R. Bowman and infant son, Woodsboro, Md.; Mrs. Nathaniel Thomas and infant son, Biglerville R. 2; Mrs. Kenneth S. Yingling, Westminster; Daniel McCleaf, Waynesboro R. 4; Dennis Bigelow, Charmian.

You can look your best in a sports coat or suit from Bixsway, The Young Men's Shop, 24 Chambersburg St.

Warm up at the game with suburban coats in wool, ivy stripe and tweed, at Bixsway, The Young Men's Shop.

P. T. BARNUM: Phineas Taylor Barnum, The World's Greatest Showman—Nobody Like Him Before—Nobody Like Him Since.

By Leighton C. Taylor

Editor's Note: This is the fifth in the series of articles on the life of P. T. Barnum, the great showman.

Barnum kept in touch with General Tom Thumb, and in 1863 brought about the marriage of the General and one Lavina Warren, another midget. This marriage was one of Barnum's greatest triumphs. The wedding took place in Grace Church, New York, February 10, 1863, when the General was twenty-five and his bride twenty-two. Governors of several states, United States senators, member of Congress, army generals, millionaires and socialites of old New York ancestry attended. President and Mrs. Lincoln sent the couple a "gorgeous set of Chinese fire screens." Mrs. Cornelius Vanderbilt gave them "a coral and gold-set brooch and earrings and studs, of the finest workmanship," and Mrs. August Belmont sent "a splendid set of silver chaste charms."

Taylor

Another pair of midgets, corralled by Barnum — Commodore Nutt and Miss Minnie Warren, a sister of Lavina, served as best man and bridesmaid. After the marriage ceremony, a reception was held at the Metropolitan Hotel, where 2,000 boxes of wedding cake were distributed and the wedding presents placed on exhibition. In the evening the couple were serenaded and the general made a speech of thanks from one of the hotel's balconies.

Visited Lincoln

In the course of their honeymoon, the General and Mrs. Thumb visited President Lincoln at the White House, and the President thoroughly enjoyed the occasion. Carl Sandbury reports the event as follows:

"The newly married couple entered the Executive Mansion at eight p.m. and stood with composure and dignity in the doorway of the reception room, filled with guests that included cabinet members, senators and generals, and representatives and other government officials, many with their families. All eyes turned toward the man and woman whose physical growth had ended before they were ten years old. The couple were announced in loud tones. The bridegroom, elegantly and properly dressed, took the arm of his bride in white satin, point lace, orange blossoms and pearls, with a two-yard train of white satin, and advanced in pigeon-like stateliness almost to the feet of the President. With profound respect they looked up, up, up to his kindly face. It was pleasant to see their tall host bend and bend to take their little hands in his great palm, holding madam's with special chariness as though it were a robin's egg, and he were afraid of breaking it. The President made them feel from the first as though he regarded them as real folks and presented them very courteously and soberly to Mrs. Lincoln. Refreshments came and Lincoln watched Tad personally serve the

Excerpts From War Diary Of Confederate General Given To Historical Society, College

Copies of excerpts from the war diary of General Clement A. Evans, the Confederate who was in command of troops in Gettysburg on June 26, 1863, and who covered General Lee's retreat after his defeat here one week later, have been presented to the Adams County Historical Society and the Gettysburg College library by Henry M. Scharf, manager of the Hotel Gettysburg.

Mr. Scharf received the excerpts from George E. Lippincott, of Germantown, Pa. General Evans was the father of Mrs. Lippincott.

Clement A. Evans was a colonel in command of the 31st Georgia Regiment, Early's Division, Ewell's Corps. He became a brigadier general May 20, 1864. He was filling the duties of a major general just prior to Lee's surrender at Appomattox. Gordon's Brigade had then become Evans' Brigade. General Evans died in 1911 in Atlanta, Ga.

Retreat Was Worst

The man who was in charge of the rear guard during Lee's retreat out the Fairfield Rd. to the Potomac River, racked with dysentery, wounded, clinging to the pommel of his saddle in a pouring rain with the "Federal troops taking pot shots at me," wrote of his effort.

"I have advanced into enemy territory and I have retreated from it. By far the retreating is the worst."

Extracts from his 1863 war diary follow:

June 26th. Marched on the road to Gettysburg. Destroyed the furnace and rolling mills of the arch abolitionist Thaddeus Stevens. The militia abolitionists at Gettysburg make scarcely any show of resistance. Our cavalry defeated and ran them off My regiment was left in the town as guard. We occupied the Courthouse as quarters. The town was kept very orderly and quiet. The citizens expected us to revel and riot all night, burning and destroying property. They were therefore very much surprised at the quiet of the town. I paroled 48 Yankee prisoners and left them at Gettysburg.

June 27th. Saturday. Marched out of Gettysburg in the direction of York. Enacmped at a little town of two stores.

June 28th, Sunday. Triumphal entry into York. I was sent ahead to establish a guard and preserve

(Continued On Page 6)

ASK SEMINARY TO KEEP INTACT OLD DORMITORY

The Gettysburg Civil War Round Table Thursday night went on record as urging the trustees of the Gettysburg Lutheran Seminary to preserve the old dormitory at the seminary, the one from which General Lee observed the Union lines, as a historical landmark.

The action came when members of the round table were informed that the seminary trustees will decide Nov. 12 on whether to retain or demolish the historic building.

Because of the condition of the old structure, the trustees of the seminary for the last several years have been discusing disposition of the building which no longer is considered safe for use by students.

Rodney Harbaugh, president of the Round Table, said, "We can appreciate the problem of the seminary trustees, but we sincerely hope some way can be found to save this historic landmark."

Battle Of Hanover

At the meeting held in the engine house, E. Middle St., Eugene Haas Sr., father of the Gettysburg College football coach, spoke on "The Battle of Hanover."

Haas described the battle as told by his father, who at the time was 11 years old and had gone to Hanover with his mother.

Mrs. Haas and her son were walking along the streets of Hanover when fighting between Stuart's cavalry and Fitzpatrick's Union cavalry began. They sought shelter while bullets went whistling through the town.

As a result of the "battle of Hanover," Haas held, Stuart's Confederates were forced to travel further east enroute to Carlisle, and thus were delayed in their arrival on the battlefield of Gettysburg, a delay that may have meant the difference between victory and defeat for Lee. It Stuart's troops had arrived here fresh, they may have won, or evaded the fight on East Cavalry Field here, and have struck the Union line at the same time Pickett's men were making their charge.

A general discussion of the Battle of Hanover followed, with those participating including Philip Van Doren Stern, historical writer, who is in Gettysburg currently getting material for a National Geographic Magazine article on the borough. Mr. Stern is a member of the New York Civil War Round Table.

Special Film At Foursquare Church

A comprehensive story of the Brazilian missionary crusade, portrayed in a 50-minute color picture, "Lift Up Your Eyes," produced by the International Church of the Foursquare Gospel under the supervision of its missionary field representative, Rev. Harold Chalfant, is scheduled for showing Saturday at 7 p.m. in the Foursquare Church, 328 W. Middle St., according to the Rev. H. L. Myers, pastor.

The authentic, dramatic story, revolving around the nationalists' tent revival program instigated a few years ago by Rev. and Mrs. Harold Williams, whose Foursquare mission activities are highlighted in the film, is a major production in color photography. It shows converted doctors, lawyers and business men conructing evangelistic appeals according to the New Testament pattern in more than 50 under-the-top gospel crusades.

This second-in-a-series of on-the spot factual films was produced by the Foursquare organization to present its extensive missionary program. The public is invited to attend the special service.

Calls Meeting On Scout Camporee

Crosby N. Hartzell, chairman of the Black Walnut Boy Scout District camping and activities committee, said today a meeting will be held Sunday evening at 7 o'clock at his home, 525 Hillcrest Place, of members of his committee and scoutmaster and explorer advisors of the district to determine whether plans should be continued for the Fall Camporee November 1, 2 and 3 at Bendersville, or whether the camporee should be cancelled because of the flu epidemic.

Hartzell, pointing out that "we want to make this decision in the best interests of the boys," asked all who cannot attend the meeting to telephone him.

Hartzell resumed work as clerk to the county commissioners this morning after about a week's absence due to illness.

Memorial Gifts Will Be Dedicated

During the Church School hour Sunday in the Gettysburg Presbyterian Church, four new lecterns, given in memory of J. Willis Beidler, will be dedicated. These memorial gifts are from Mr. Beidler's mother, Mrs. John C. Beidler; his sisters, Mrs. Harold Jones and Mrs. Harvey C. Pettit, and his brother, Henry Beidler.

At the morning worship service, the Junior Choir will make their first appearance of the season by singing the anthem. The sermon topic will be "Reformation Affirmations." At this service, the sacrament of infant baptism will be administered by the pastor, the Rev. Robert A. MacAskill.

Social Happenings

For Social News Phone Gettysburg 1248 or 640

The square dance sponsored by the Beta Sigma Phi and scheduled to be held at the Griest farm, Gardners, this evening has been cancelled because of the epidemic of grippe.

• • •

Brownie Troop 35 met with the leaders, Mrs. Ellis Mallow and Mrs. Glenn Harner, Thursday afternoon at Christ Lutheran Church Games were played and the girls made Halloween faces from paper bags. Due to so many being ill, the cook-out planned for Saturday at Camp Happy Valley has been cancelled.

• • •

The American Legion Auxiliary will hold a Hallowern party in the Auxiliary rooms at the Legion Home Monday evening at 7:30 o'clock. There will be a special program, arranged by Mrs. Howard Hartzell. There will be a 25-cent assessment against members who do not come in costume.

• • •

Mrs. Howard Waybright, R. 1, was the hostess Wednesday afternoon to the Barlow Homemakers daytime group. She demonstrated her culinary ability to the 12 members present by baking and serving holiday breads. The next meeting will be held on November 20 at 1:30 p.m. at the home of Mrs. E. P. Shriver. The program will be on "The Care of House Plants."

• • •

Mr. and Mrs. Sydney Poppay, York, attended the annual stockholders dinner of the First National Bank Thursday evening at the Hotel Gettysburg. Mr. Poppay was manager of the Majestic Theater for some years before being transferred to York.

• • •

The members of the Annie Danner Club will hold a masquerade party at the YWCA Tuesday evening at 7:30 o'clock. The Joan of Arc Club of Hanover will be guests.

• • •

Mr. and Mrs. Roth Zahn, Westminster, Md., visited relatives in Gettysburg Thursday evening after attending the First National Bank stockholders' dinner at the Hotel Gettysburg.

• • •

Mr. and Mrs. David Weller, Chambersburg St., had as guests Thursday afternoon Mrs. Weller's nephew and niece, Mr. and Mrs. William Horner, of near Martinsburg, W. Va., and Mrs. Weller's brother-in-law, E. H. Brindle, of Lawton, Okla.

• • •

• • •

Mrs. Henry M. Scharf has called a meeting of her team for the Hospital Fund Drive for Monday morning at 10:30 o'clock at her home on Herr's Ridge. Mrs. Thomas J. Winter is lieutenant for the group of which Mrs. Scharf is captain.

• • •

The Queen of Peace Council of the PCBL will meet Monday evening when final plans will be made for the public card party Tuesday evening at Xavier Hall.

• • •

Jamie Zartman, son of Captain and Mrs. Monroe D. Zartman, 650 Long Lane, celebrated his 11th birthday Wednesday eevening with a Halloween costume party for six friends.

• • •

The BVM Sodality of St. Francis Xavier Church at a meeting Thursday evening in Xavier Hall made final plans for the bake sale to be held at Weishaar's Store, Saturday from 10:00 a.m. to 3 p.m. The group will attend the 8 a.m. mass Sunday. Rev. Fr. Neil Murphy led a discussion on the position of a teen-ager in regard to her particular form of worship in church. The group asked for donations of toys for the nursery they staff in Xavier Hall during Sunday services. Plans were made for a trip to Washington on November 10.

• • •

The Gettysburg Chapter of the Order of Eastern Star held its 33rd anniversary dinner Wednesday evening in the dining room of St. James Lutheran Church with 108 members and guests present. Mrs. Kermit Deardorff, Gettysburg, worthy matron, welcomed the group. A brief talk was given by Mrs. Helen McGlaughlin, McConnellsburg, district deputy. Dr. Frank H. Kramer, Gettysburg, worthy patron of the chapter who served as toastmaster, introduced the Rev. Dr. Paul L. Reaser, whose topic was "Words That Undergird Life." Solos were sung by Mrs. John Schwartz, Lemoyne, accompanied by Mrs. Milton R. Tipton, Gettysburg. Chairman of the banquet committee was Mrs. Martin T. Walter, Biglerville R. 2. She was assisted by Mrs. Curtis Flohr and Mrs. John Basehore, Gettysburg; Mrs. Elmer J. Yoder and Mrs. Clair Shillito, Biglerville; Mrs. Weldon Smith, Mrs. Stanley W. Hull and Mrs. Arthur Phiel, R. D.

• • •

Mrs. Jennie Hudson, Hanover St., is spending some time with her sister, Mrs. Irene Zeigler, Hagerstown.

• • •

Plans for a Haloween party October 31 at 7 p.m. at the Odd Fellows Hall, Chambersburg St., were outlined Thursday evening at a meeting of the Mary Rebekah Lodge No. 105 at the IOOF hall.

The party will be for members of the lodge and their families and all are to report at the Odd Fellows Hall at 7 o'clock next Thursday evening in costume. A regular lodge meeting will be held at 7:30 o'clock after which a program will be held followed by refreshments.

Members of the refreshment committee were listed as Mae Sager, Effie Benner, M. Anna Miller, Pauline Crouse and Amy Kennedy. Members of the program committee were announced as Wynona Fair, Dorothy Spriggs, Ruth Naugle, Catherine Deitch and Naomi Schwartz.

Plans were announced for a rummage sale to be held November 8 and 9 at the Odd Fellows Hall. Persons who may have clothing to donate for the sale are asked to contact any one of the following: Anna M. Miller, Evelyn Weikert, Erma Martin, Winifred Sanders or Blanche Howe.

Baptist Laymen To Conduct Service

Laymen of the First Baptist Church of Gettysburg and Grace Baptist Church of Fairfield will be in charge of the Sunday evening worship hour at the First Baptist Church here. The theme will be "My Father's Business."

Scripture will be read by Wayne VanDyke and the four phases of the theme will be presented by these speakers: "The Layman at Home," M. V. Coleman; "The Layman in Business," by Glenn Hess and Fred Neal; "The Layman and His Community," Melvin J. Nye and Richard Kershner, and "The Layman in the World Mission" by Captain Francis Hall.

Lt. Henry Gulsmith will be pianist for the service. There will be special music by Hilton Matthews of Grace Church and a men's chorus made up of member of the Gettysburg and Grace Churches will sing "Rise Up Oh Men of God."

DEATH

Mrs. Ambrose Beard

Mrs. Ambrose Beard, 73, Taneytown R. 2, died at the Warner Hospital Thursday morning.

Funeral arrangements are in charge of a Walkersville, Md., funeral home.

MOTHER, 4 SONS BURN TO DEATH

TROY, N.Y. (AP)—A mother and her four sons, the oldest 3½, were burned to death early today when fire destroyed their two-room frame home on a tenant farm 10 miles north of this city in eastern New York.

The dead were Mrs. Beverly Ann Coon 24, and her sons: Robert, 3½; Victory, 2½; Richard, 1½; and Paul, 4 weeks.

The father, Robert Coon, 24, suffered first and second-degree burns. He was treated by a physician and then returned to the scene, frantic at the destruction of his entire family.

Cause of the fire was not determined.

FINK SERVICES HELD

Funeral services for Mrs. Regina Rickrode Fink, 85, Gettysburg R. 4, who died at her home Monday morning, were held Thursday morning at the home at 8:15 o'clock with a requiem mass at 9 o'clock at St. Mary's Church in New Oxford with the Rev. Fr. Philip J. Gergen, rector, officiating. Interment was made in St. Mary's Church Cemetery. Six nephews served as pallbearers: Urban Robinson, Raymond Hipp, Ray Toal, Edgar Fink, James Myers and Ivan Rickrode.

Property Transfers

Colt Park Development Co., Gettysburg, sold to Earl V. and Dorothy L. Lingg, Gettysburg, for $2,450, a lot at Long Lane and Queen St.

Oliver M. and Maude R. Matthias, Germany Twp., sold to their son-in-law and daughter, Harold D. and Roma L. Harner, same place, for $1, a four-acre property in that township.

GLENN KEEFER DIES THURSDAY

Glenn Keefer, 58, died Thursday night at 6:45 o'clock at his home in Highland Twp., near McKnightstown. He had suffered from a heart condition for about four years.

A native of Franklin County, he was a son of A. C. Keefer, McKnightstown, and the late Annie (Fortna) Keefer. He was a farmer, a member of Flohr's Lutheran Church and of the Cashtown Fire Company.

Surviving are his wife, the former Sara Louise Schultz, to whom he had been wed for 32 years; five children: Clair Keefer, Philadelphia; Mrs. John Hull, Fairplay, Md., and John, Wayne and Michael Keefer, all at home.

Also surviving are two grandchildren; two brothers, Ray Keefer, Seven Stars, and Jere Keefer, Gettysburg, R. 3, and a sister, Mrs. Jennie Kroushour, Seven Stars.

Funeral services Monday afternoon at 2 o'clock from the Bender Funeral Home, Gettysburg, with the Rev. Mahlon Clarke officiating. Interment in Flohr's Cemetery Friends may visit the funeral home Sunday evening from 7 to 9 o'clock.

Although Bolivia has the highest capital city in the world, the highest navigable lake and the loftiest sky resort, two-thirds of this landlocked republic, about the size of Texas and California combined, consists of flat plains and tropical jungles.

• • •

Siesta time in South America, an ancient, daily custom, is observed not only by the business world but even by sports enthusiasts in the smallest and largest cities. In Chile, for example, all four ski lifts at a popular resort stop running from 1 p.m. to 3:30 p.m. every day while attendants and skiers lunch and enjoy a siesta.

• • •

Three-fourths of the olive oil imported by the United States last year came from Spain . . . inexpensive salt blocks, such as those cattle lick, are often used by economy-minded sculpture students to practice their art . . . the word "sherry" comes form "Sherris," the name given Spain's wine producing area by the Moors after they captured it in the year 711 . . . vintage wallpaper has become a prized collector's item. A design created by Robert Adams in 1760 and frequently exhibited is valued at $45,000 . . . more than two billion dollars worth of merchandise and services were sold by coin-operated vending machines last year. . . . the government now owns the traditional red carpet rolled out at the Washington airport for arriving notables. Until recently the carpet was rented for each occasion . . . ten per cent of the house trailers in this country are occupied by retired persons.

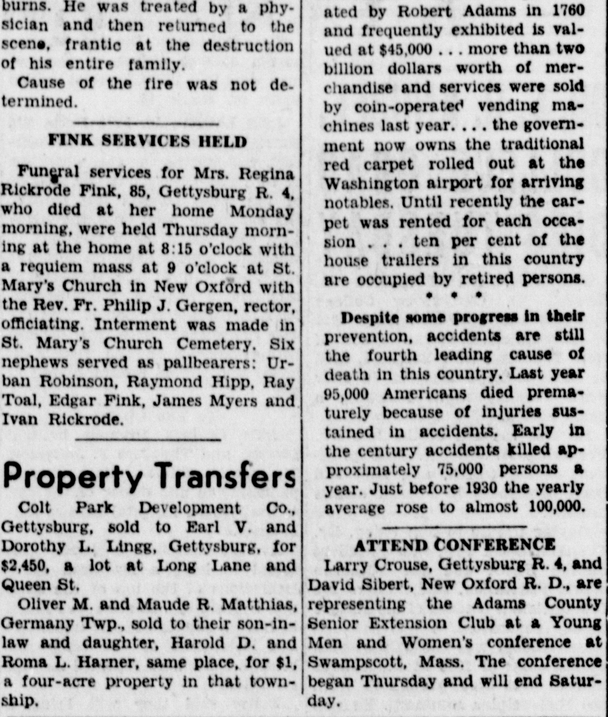

• • •

Despite some progress in their prevention, accidents are still the fourth leading cause of death in this country. Last year 95,000 Americans died prematurely because of injuries sustained in accidents. Early in the century accidents killed approximately 75,000 persons a year. Just before 1930 the yearly average rose to almost 100,000.

ATTEND CONFERENCE

Larry Crouse, Gettysburg R. 4, and David Sibert, New Oxford R. D., are representing the Adams County Senior Extension Club at a Young Men and Women's conference at Swampscott, Mass. The conference began Thursday and will end Saturday.

Bing Crosby And Bride

A Reformation service will be held at Flohr's Lutheran Church, McKnightstown, Sunday morning at 9 o'clock.

The following Harvest Home donations from the congregation of Flohr's Lutheran Church, McKnightstown, were delivered on Wednesday to the National Lutheran Home for the Aged, Washington, D.: 831 jars of assorted fruits and vegetables, two cases of commercially packed fruits and vegetables, three cases assorted jellies, 45 pounds sugar, 40 pounds flour, seven and one-half bushels of potatoes, one bushel of sweet potatoes, nine bushels of apples, one-half bushel of onions, two bushels of soap, 19 pumpkins, two heads cabbage, 14 large beets, four gallons of cider, $191.50 in cash, and other miscellaneous items. The items were taken to Washington by Bradley Keefer and the pastor, the Rev. E. Mahlon Clarke.

The hayride and dance by the Junior Choir and Senior Department of St. Paul's Lutheran Church School, Biglerville, which was cancelled Thursday evening due to inclement weather, will be held this evening. Members are asked to meet at the church at 7:30 o'clock.

The motion picture, "A Living Church," will be shown on Sunday morning at Bender's Lutheran Church, near Biglerville, at 8:30 o'clock, and at St. Paul's Lutheran Church at 10 o'clock. Reformation Day will also be observed.

The Joint Council of Bender's and St. Paul's Lutheran Churches, Biglerville, will meet at the former church Monday evening at 7:30 o'clock.

Miss Mildred Osborn, Mrs. Alma Warner and Mrs. Viola Ecker, Biglerville, recently attended the dedication of the Hanover unit of Homewood.

A musical will be sponsored by the Youth Fellowship of the Uriah EUB Church Sunday evening at 7:30 o'clock. The public is invited.

A Halloween party for the Primary Department of Mt. Zion Lutheran Church, Goodyear, will be held at the church this evening at 7 o'clock.

The Sacrament of Baptism was administered recently to the following infants at Upper Bermudian Lutheran Church, Gardners R. D., by the pastor, the Rev. H. Earl Scholtzhauer: Margaret Grace Golden, daughter of Mr. and Mrs. George W. Golden; Duane Edward Hoffman, son of Mr. and Mrs. Harry E. Hoffman; Deborah Mae Shultz, daughter of Mr. and Mrs. Kermit L. Shultz.

The LLL Club was entertained at lunch at Hemlock Inn, Biglerville R. 1, by Mrs. Charles Raffensperger, Biglerville, Tuesday.

A congregational dinner in the form of a covered dish supper will be held at Bethlehem Lutheran Church, Bendersville, Sunday evening at 5:30 o'clock, Coffee and bread will be furnished by the Ladies Auxiliary. The program for the evening will include reports by the various committees of the Stewardship Sector Project. All members of the church and their families are invited to attend.

At a meeting of the Pathfinders' Sunday School Class of Bethlehem Lutheran Church, Bendersville. Tuesday evening at the church, plans were made to hold a rummage sale on Friday and Saturday, November 1 and 2, in the Lefever building, N. Stratton St., Gettysburg.

Mrs. Walter Howe, Mrs. Revere Thomas and Mrs. Charles Raffensperger, Biglerville, and Mrs. C. L. Seeman and daughter, Greta, Aspers R. D., visited Wednesday with Prof. and Mrs. Frank Hare, Camp Hill.

The Luther League of Flohr's Lutheran Church, McKnightstown, will meet at the church at 5:15 o'clock Sunday evening from where they will go to Shippensburg to attend a meeting as guests of the Luther League at Memorial Lutheran Church.

A food and bake sale will be held by the Kitchenettes on Saturday beginning at noon in front of Osborn Printing Co., S. Main St., Biglerville.

Kusum Chowdhry, an International Farm Youth Exchange student from India who has been spending some time with Mr. and Mrs. Roy Tate, Biglerville, R. 2, left Wednesday for Pittsburgh where she will join her sister and a group of other Exchange students. They will spend several days traveling prior to attending the conference in Washington, D. C. On November 1 they will go to New York City and sail for England and Europe, spending a month traveling in those countries, prior to returning to India.

Frank Ehlman, a student at Lehigh University, Bethlehem, has been visiting his parents, Mr. and Mrs. S. A. Ehlman, Biglerville, while the university is closed due to the flu epidemic. He will return to school Sunday to resume his studies on Monday.

The Senior Class of Biglerville High School will sponsor a Halloween dance Saturday evening from 8 to 11 o'clock. The high school dance band will provide music. Students and parents are invited.

Miss Nancy Tate, a student at Penn State University, spent several days recently with her parents, Mr. and Mrs. Roy Tate, Biglerville R. 2.

ASK REVIEW OF ROAD ROUTE

WASHINGTON, (AP)—The Bureau of Public Roads today called for a review of the Pennsylvania Highway Department's selection of a route for the proposed Midcounty Expressway in Delaware and Montgomery counties.

The state's choice, known as the "Yellow Route," would run from Chester, Pa., to a point on the Schuylkill Expressway, northwest of Philadelphia.

On Aug. 28, a delegation of municipal officials and civic leaders met with Federal Highway Administrator Bertram D. Tallamy to protest the state's selection.

The delegation from Springfield, Ridley, Radnor and Lower Merion townships contended the route would be costly to build and would not serve area traffic nees as well as alternative routes.

On the basis of the protest, the Bureau decided to undertake a review. The protestants will have an opportunity to present their views in further detail at hearings which will be held at a time and place to be decided by the State Highway Department.

NEW YORK (AP)—U. S. Dist Judge William B. Herlands today set Nov. 4 as a tentative date for trial of James R. Hoffa, Teamsters Union president-elect, on perjury charges.

PROPERTY HERE SOLD

Guy C. and Edna M. Kime, 153 E. Middle St., have sold that property to Walter C. Plank, 32 S. Washington St. Immediate possession is being given. The sale was made by Lee M. Hartman, local realtor.

HARRISBURG (AP) — The Public Utility Commission today approved the consolidation of the Union Heat and Light Co., Grove City, and the Slippery Rock Heat and Light Co., Emlenton.

The stock of both firms is owned by the same shareholders, although they operated as separate entities.

Union will take over Slippery Rock's liabilities, estimated at $24,250.

The consolidation will take the name of the Union Heat and Light Co.

RULES NORSE—King Olav V, 54-year-old sportsman-soldier, is the new constitutional monarch of Norway. He succeeds his father, the late King Haakon VII, who ruled for 52 years. Olav is a widower with three children.

SIGHT N' SOUND—Actress Jayne Mansfield, garbed in shimmering blue gown, displays another facet of her talents — a violin solo in a London show.

Bank President

(Continued from Page 1)

260.

"The total loans as of October 15, 1957 was $3,734,99.49. There were 1568 new loans from October 15, 1956 to October 15, 1957, totaling $3,344,697.88. During the same year loans paid off totaled $3,032,385.66, almost as much as the amount lent. The latter figure shows exceptionally a healthy turnover, that we are serving a greater number of borrowers ond that your bank has liquidity in an item not ordinarily considered liquid.

Grateful For Record

"This constitutes the record of deposits, loans and investments of your bank covering the 15-year period from 1942 to date and the phenomenal growth in deposits, loans and investments. We are grateful for this record and extend thanks to shareholders, customers and friends who have made this record possible.

"While your bank firmly believes that size as such is not our objective, we hold with equal firmness to the belief that growth in size and good public relations are natural by-products of a good service well rendered."

Still recuperating from a fracture of the hip suffered eight months ago, Mr. Thomas was unable to follow his usual custom of moving about the dining room to greet the various stockholders during the dinner. He is still not allowed to put weight on one leg and noted that the occasion marked the first time he had to talk "while standing on one leg."

Expresses Thanks

He closed his remarks by expressing his appreciation to the staff of the bank, directors, WGET, The Gettysburg Times, the waitresses serving the dinner, Mrs. Mary Dunegan Howe who provided organ music, Dr. Robert Fortenbaugh, who gave the invocation, and "the many friends who visited me, sent remembrances, etc., during my illness."

Completion of the remodeling of the bank's interior was reported by President Thomas who added that a group of architects and contractors from Baltimore recently visited the bank to take pictures to be used as a model for planned renovation of banks in the Baltimore area.

Rev. Mr. MacAskill told the shareholders: "We are living in a great time to be alive. The past 50 years of history have proven more significant than the previous thousand years. But so many of us have been so busy keeping up with life's new gadgets that we forget life's role.

"Invest In Life"

"If we are to invest in life we must have the courage to be ourselves and it takes great courage to be ourselves.

"Jonah is the classic example of trying to evade life's responsibilities. There are many Jonahs in modern life who try to dodge responsibility. Yet we find that those who seek to go around or under difficulties find themselves faced only with new and increased difficulties.

"Today too many of us seek to please the crowd. But today calls for those who have the courage to run the risk of being called queer, square and even dangerous. Today we find we have lagged behind in some phases of science because we have frightened off some scientists, preventing them from making basic queries into truth.

"But even today there are many opportunities for dividends for those who are willing to invest in life. 'Knock and it shall be opened unto you,' 'seek and ye shall find' are as true today as 2,000 years ago.

Dividends From Life

"To be ourselves we must have the right attitudes and the courage to follow these attitudes. There is a story I tell my children of the the queen of a faraway country who sent one page out to gather samples of all the weeds in the country. Then she sent another page to gather samples of all the flowers. The first page returned with his arms laden with weeds. He was downheartened and told his queen that all the land was overrun with weeds. The other page returned radiant to tell his queen that all the land was filled with flowers. Both had found what they were looking for.

"If you are to get rich dividends from life you must face life with expectancy. Many people miss the freshness and romance of life because they no longer had an expectancy for it. Life becomes a day to day routine, a hollow existence, a drudgery.

"Too many people react to this spiritual loss, by seeking material things which can never fulfill their needs. And they find that the rich can be pitifully poor, and the poor, who are rich in spirit, can be radiantly rich.

Life Can Be Confused

"Helen Keller has been blind, deaf and mute since the age of three; but she thanks God daily for though she cannot see the world, she can see God; though she cannot speak, God's words are on her lips and though she cannot hear, God's word is in her heart. If such as she can be radiantly alive, why cannot we, who have so much more.

"'To invest properly in life we must have a purpose. We have seen many who plunged their lives to destruction because they had no firm purpose. We get out of life what we put in it. You can invest your life so that you receive rich dividends, or you can find life confusing, for without a steady guiding purpose life will be confused and engulfed. We need a high and noble purpose in life, and one man who had such a purpose is well known to us, for he stood in the cemetery here and told the world that 'we here highly resolve . . . that government of the people, by the people, for the people shall not perish from the earth.' We have benefited ever since from that high and noble purpose for which he gave his life.

"Leonardo Da Vinci was painting some fruit on the table in his famed painting of the Last Supper when he saw a man staring at the fruit being painted. With one stroke he wiped out the painting of the bowl and fruit and told the man: 'This is not the place to look, but keep your eyes there,' on the face of Christ.

"So should we keep our face there, on the face of Him Whose life was so invested that we today and all mankind will reap dividends from it."

Sketches

"TWILIGHT STAGE"

When people reach the twilight stage . . . they wear a crown of gray . . . and very often drift into . . . thoughts of a bygone day . . . for old folks find a warm delight . . . by delving in the past . . . reaching back through faded years . . . to joys that did not last . . . for age will always try to cling . . . to youth in all its glory . . . and so those with the furrowed brows . . . yearn to retell the story . . . they narrate with a farm finesse . . . things young folks like to hear . . . truly master storytellers . . . tender and sincere . . . so mellow and so worldly wise . . . each one of them a sage . . . that's how it is when people reach . . . the pensive twilight stage.

Taneytown Church To Present Slides

The two mission fields of the EUB Church in Africa, Nigeria and Sierra Leone, will be presented by slides in the Taneytown EUB Church Sunday evening at 7:45

The Missionary Society is sponsoring the program to help enlighten the society and all who are interested in spreading the gospel of the great work that is being done in these portions of Africa for the good of the people.

There are 28 active ministers and six superannuated ministers on these two fields of work. All members and friends are urged to "visit Africa" by seeing the slides of this far country. The public is invited.

Save lemon halves after the juice has been squeezed out, notch the edges and use as pretty containers for tartar sauce to go with fish.

the Welcoming and Honoring committe eof the PTA. Mrs. S. B. Miller, in whose home the exchange student lives here, also was introduced.

Mrs. Donald White reported on a recent county PTA council meeting in Hampton.

Have $573 In Treasury

Dr. M. Scott Moorhead, PTA treasurer, reported a current treasury balance of $573 after grade school playground equipment costing $236 was paid for and $151.50 was received from memberships Thursday evening.

Mrs. Donald Sheely presented to each of the local school principals a copy of the "Teachers' Guide to the PTA" and she announced Miss Louise Ramer at the high school is being given a subscription to a national PTA publication.

Melvin Sargeant gave a report as legislature chairman and James R. Feather reported for the Membership committee.

Proposed changes in the constitution and bylaws of the local PTA to be voted upon at the next meeting in January, were reviewed by Prof. Reginald Deitz.

Invited To PSEA Dinner

Mrs. Richard Geyer announced plans for "open house" at the high school next Tuesday evening and it was announced that a parents' education group will meet November 26 at Keefauver school to discuss secondary age boys and the military service.

Mrs. Norman Richardson, reporting for the new "School Education" committee of seven, intended to act as a liaison group between PTA and the school administration, said two members attended the last joint school board meeting. The committee invites commendations and suggestions from parents and teachers about the local school system.

Mrs. Richardson said parents are invited to attend the PSEA dinner to be held November 13 as part of the local observance of National Education Week. Reservations are to be made by November 11 at the Keefauver school.

Mrs. Carl Seifert, co-chairman of the committee that handled the recent public dinner by the PTA, said $207 was cleared.

The meeting adjourned shortly after 10 p.m. and a social hour followed in the school cafeteria.

Would Open Buses To Parochial Pupils

GREENVILLE, Pa., (AP) — Rep Carroll D. Kearns (R—Pa) said last night he plans to introduce legislation at the next session of Congress that would permit parochial school pupils to ride public school buses.

Kearns made the remark to newsmen while he was in Greenville to attend a meeting of the Mercer County Assn. of Boroughs. He did not speak at the meeting.

The present law prohibiting parochial school pupils from riding public school buses "is a bad law," Kearns told newsmen. The congressman is a former superintendent of schools at Farrell.

One out of every 12 acres of farm land in the United States receives aerial applications of chemicals, either for fertilizing or pest or weed control purposes.

Today's Pattern

Make this 'round-the-season spectator your very own — it's sew-easy with our Printed Pattern. Figure-flattery in every line — from the cardigan-buttoned bodice to the graceful fall of fullness in the skirt.

BANK ROBBED OF $17,000

ASHTABULA, Ohio (AP) — Three men robbed the Andover Bank at nearby Andover today and escaped with an estimated $17,000.

Two of the robbers, armed with a .45 caliber automatic and a .32 caliber pistol, entered the bank when it opened at 8:30 a.m. A third waited in a stolen car outside, Ashtabula County Sheriff Tom Fasula said.

Four bank employes, who had just opened the vault, were bound with adhesive tape. The gunmen entered the vault and stuffed money into a canvas bag.

The employes—two men and two women—said the robbers worked quickly and appeared familiar with the bank surroundings. One of the tellers freed himself and notified the sheriff after the gunmen fled.

Roadblocks were set up in Ashtabula and adjoining counties in an attempt to intercept the fleeing men. Their blue, 1952 sedan, stolen in Mentor about midnight last night, was seen speeding south on Ohio 7.

One of the men who entered the bank was described as 5 feet, 10 inches tall, weighing 180 pounds. He wore blue jeans, black shoes and a brown jacket. His companion was 5 feet, 8 inches tall and wore a gray cloth jacket with a red collar and khaki trousers.

FLYING ROCKET RADIOES DATA

LOS ANGELES (AP) — Scientists received radio data from Project Far Side's high flying rocket for 75 minutes after it whooshed up from its balloon platform, the project director reports.

Dr. Morton Alperin told newsmen last night that the instrument package in the rocket reached a speed of 17,000 miles an hour, but burned up when it re-entered denser atmosphere.

He declined to tell the exact altitude reached by the rockets. The Air Force announced Wednesday that two experimental Far Side rockets—designed to reach up to 4,000 miles—had been successful.

The rockets were launched from balloons 100,000 feet over Eniwetok Island.

"It was a thrilling experience," said the 39-year-old director of advanced studies of the Air Force office of scientific research.

CLYDE R. COVER

(Continued From Page 1)

Forge and former teacher and coach at West Point and the University of Pennsylvania, spoke on "Attitudes in Education."

He urged teachers to "teach your pupils to be good listeners. Our trouble today is that we seldom listen, we are too busy thinking of what we want to say to listen to the other fellow."

DR. HART

He concluded by saying: "To the end of time we are always students, we never cease to learn—so it is most important that teachers teach their pupils how to be good students."

Dr. Marjorie Johnson, reading clinic head at Temple University, told the group: "It is the teacher's duty to see that those whom we are teaching achieve the highest levels of achievement of which they are capable, in reading and all other subjects. It is our duty to see that the child has continuous growth, in reading as in all other subjects, from First grade straight through the Twelfth."

NEW YORK EGGS

NEW YORK (AP) — (USDA) — Wholesale egg selling prices were unsettled today. Receipts 8,900. Nearby whites: Top quality (48-50 lbs) 53½-56½; mediums 47½-50; smalls 34 - 35; peewees 24 - 25. Browns: Top quality (48-50 lbs) 54-56½; mediums 47-48; smalls 36-36½; peewees 24-25.

MIAMI, Fla. (AP)—A storm with winds up to 35 m.p.h. churned along a northern course in the Atlantic about 900 miles east of Daytona Beach today.

The Weather Bureau said the semitropical disturbance offered no threat to the U. S. mainland. No intensification is expected during the next 12 hours.

4 Killed When Flying Boxcar Explodes, Crashes And Burns

MIDWEST CITY, Okla. (AP)—An Air Fore Flying Boxcar heading for home exploded and burned last night near a residential area that one eyewitness said the pilot apparently maneuvered to miss.

The four crewmen on the C119 transport were killed.

The big plane hit in a wooded area of Blackjack Oak. Most of the wreckage landed in a dry creek bed.

Charles Chilcoat, 31, an Air Force veteran and technician at tinker Air Force Base saw the crash.

"He turned on his landing lights so he could locate a clear spot," Chilcoat said of the pilot.

Extreme Sacrifice

"My, God, that was the extreme sacrifice!"

The plane had just taken off from Tinker for its home base of Chanute AFB at Rantoul, Ill., after a stopover on a flight from Los Angeles.

Names of the crew were withheld by the Air Force.

"If the plane had fallen 500 yards to the east, west, or south, it would have been in the middle of houses," an ambulance driver at the crash scene said.

"I think he rode it out to clear those houses," said Chilcoat who was outside his home, near the crash site, working on his car.

He said the pilot evidently was going into a glide when it appeared the "left engine blew up and the plane disintegrated."

Midwest City sprang from farm lands in World War II to house workers at Tinker and Douglas Aircraft Co.'s plant. Thousands of the big air material area base civilian and military personnel live here on the edge of Oklahoma City.

KLING NATIONAL WINDOW WEEK
OCTOBER 28th—NOVEMBER 9th

You saw this lovely Cherrybrook Group by Kling in House & Garden and American Home. Now see it in all its beauty in our windows and on our floor during Kling National Window Week.
The SOLID wild cherry of the Cherrybrook Group is finished in a warm, rich brown color called Fiddletone, reminiscent of the finish on old violins.
Cherrybrook, with its traditional styling, is one of our most popular groups, and harmonizes with either traditional or modern accessories. Its SOLID native cherry, fine cabinet-making and beautiful finish combine to create a bedroom suite you'll be proud to own. See it during Kling Window Week.

Out Of The Past

From the Files of the Star and Sentinel and The Gettysburg Times

FIFTEEN YEARS AGO

"Jack" Cessna Is Elected To H. S. Faculty: Plans for the development of a new course at Gettysburg high school which will prepare seniors for a future service in radio work, the signal corps and the air corps of the armed forces of the United States were made known today by the Gettysburg high school faculty with the announcement of the election of John P. (Jack) Cessna, Baltimore street, as a new member of the high school faculty.

Cessna, who majored in physics at Gettysburg college, will teach physics at the high school, while John W. Black, who has been instructor in physics, will take the position resigned by C. Russell Gilbert recently as instructor in biology.

The new teacher is an alumnus of the high school. He was graduated from Gettysburg College in 1940. He took a year of post graduate work in education and advanced physical sciences and since last December has been teaching science in the junior high school at Hershey.

• • •

35,000 Fish Are Placed In Local Streams: Thirty-five thousand fish have been stocked in Adams county streams since early September in the current stocking season that continues up to the middle of December, it was announced today by John S. Ogden, state fish warden for York and Adams counties.

Fish stocked to date have included bass, catfish, bream and suckers, but next month a number of trout will be released in the streams of the county, Mr. Ogden said.

• • •

Society Given Doctor's Book: Among the gifts to the Adams county historical society, recently acknowledged, has been found a copy of "A Physician's Handbook of Practice" for 1863.

The book contains the visting list carried by Dr. J. W. C. O'Neal of Gettysburg during the battle of Gettysburg.

A note by Doctor O'Neal on the title page states that after noon on July 1, 1863, the book was within the fighting lines all of the time.

In addition to lists of patients he treated during his regular practice there are many notes on the battle apparently made by as Doctor O'Neal visited and treated wounded and received reports of the progress of the conflict.

• • •

Corporal Arthur E. Rice Weds In New York: Miss Muriel Larsen, daughter of Mr. and Mrs. Peter Larsen, Staten Island, New York was married to Corporal Arthur Edmund Rice Jr., son of Mrs Arthur Edmund Rice, of Biglerville, and the late Mr. Rice, Saturday evening in Zion Lutheran Church, Staten Island. The ceremony was performed by the Rev. Lars P. Qualben.

Mrs. Philip Jones, of Gettysburg, sister of the bridgroom, was matron of honor. Major John S. Rice, U. S. Army Air Force, of Gettysburg, uncle of the bridegroom, was best man. Among ushers was Ensign Philip Jones, U.S.N.R., of Gettysburg.

• • •

George Inskip Heads County Unit Of PSEA: George B. Inskip, of Biglerville, was elected president of the county branch of the Pennsylvania State Education Association this morning at the closing session of the 86th teachers institute held in the Majestic Theatre.

Mr. Inskip, who is principal of the Biglerville grade school, succeeds Clyde A. McCauslin, principal of the Franklin township consolidated school, in the presidency. Other officers chosen today to serve the P.S.E.A. for the coming year follow: Vice president, Lewis M. Bosserman, Arendtsville; secretary, Grace E. Kane, Franklin township; auditors, Edgar J. Smith, Huntington township, and Robert E. Sheads, New Oxford.

Delegates to the PSEA convention, C. P. Keefer, New Oxford, and William S. Whiteley, Arendtsville, and alternates, Grantas Hoopert, York Springs, and Lloyd Stavely, Littlestown.

• • •

Bulleit Named Welfare Chief In Emergency: Two appointments to the county defense council staff were made at a meeting of the council here Thursday evening.

At the direction of the state council of defense a chief of emergency welfare services for Adams county was chosen and Eugene V. Bulleit, Esq., already a member of the county council as chairman of the civil liberties division, was named to the post.

• • •

Girl Reserves Name Officers: Freshmen and sophomore Girl Reserves have elected officers for the current year.

Ruth Fortenbaugh is president of the freshman girls; Kathleen Flattenburg, vice president, and Jane Swope, secretary-treasurer. The president of the sophomore group is Nancy Berkheimer; vice president, Freda Coffman, and Doris Ann Gaines is secretary-treasurer.

Today's Talk

WALKERS

For years I have studied the footsteps of people. The walk of a person is always very revealing. It's something that the person himself has created. The walker is always putting something of himself there, as he does in the lines and planes of his face. Character keeps throwing out its signs.

The servant in the home of Wendell Phillips once said that his footfalls were "like music"! They charmed people, like his words did in his great lectures throughout America. I have known people who seemed to enter a room as though accompanied by the soft strains of a violin, while there are others who echo their footsteps.

I once read that when Daniel Webster visited London his face and his upright, dignified bearing so fascinated people on the street that they would turn to get another glance, for it seemed as though a god had been dropped among them!

There have been many famous walkers, among them the late Dr. John H. Finley, a great editorial writer and educator, and the great football coach and athlete A. A. Stagg, who recently celebrated his 95th birthday! Stagg once invited me to take an early five-mile walk with him.

Walkers not only do a great service to their bodies by habitual long walks, but they enrich their minds as well. All nature gives to them its choicest smile, and every bird offers a serenade. Thoreau was a noted walker a good part of his life, but he was a silent walker and usually wished to walk alone.

Tomorrow Mr. Adams will talk on the subject: "Ageless."

Protected, 1957, by The George Matthew Adams Service

Just Folks

QUIET

No more baseball games to see,
Football maybe once a week;
Long the hours have grown to be;
Evenings, politicians speak,
Now and then a western scene
On the television screen.

Winter's near and action slows,
River races are no more.
All that's left: the movie shows
That we've often seen before.
Have no great desire to look
At lessons what and how to cook.

Now and then the President
Rouses me to watch and hear,
But somehow I'm not content
Though he makes his purpose clear.
Even jumpers on their skis
Long ago have ceased to please.

Time moves on, and so does life,
Things grow old, and so do we.
Spats between a man and wife
Hold no interest for me.
Writer's near, and all's serene
On the television screen.

SPY TRIAL IS GIVEN TO JURY

NEW YORK (AP) — The case of Russian Col. Rudolf Ivanovich Abel, aurused of transmitting American military and atomic secrets to Moscow, today goes to the jury in Brooklyn Federal Court.

The panel of nine men and three women will retire for deliberation after being charged by Judge Mortimer W. Byers.

Abel, 55, is the first foreign national in American history to be tried by a civilian court for espionage. If found guilty he would face a possible death penalty.

In summing up yesterday, Asst. Atty. Gen. William F. Tompkins termed Abel, a former Soviet secret police officer, a "master spy, a real pro entitled to no sympathy," adding:

"This was this man's chosen career. He knows the rules of the game. So do his family."

Tompkins did not specifically urge a death penalty, which is up to the judge.

Defense Atty. James B. Donovan lashed out at the government's chief witnesses and said the Russian officer was entitled to acquittal.

"Certainly on counts one and two," said Donovan, referring to the vital part of the three-count indictment which could carry the death penalty.

P. T. BARNUM:

Phineas Taylor Barnum, The World's Greatest Showman—Nobody Like Him Before—Nobody Like Him Since.

By Leighton C. Taylor

This is how Barnum portrayed his giant elephant "Jumbo" in one of his circus pamphlets. It is supposed to show Jumbo in a heroic mood.

(Continued From Page 1)

General and Mrs. Thumb, placing wine and ices on a chair within comfortable reach. Later, while the bride and groom were taking a quiet promenade by themselves up and down the big drawing room, the President gazed after them with a smile of quaint humor; but, in his sorrow-shadowed eyes, there was something more than amusement — a gentle sympathy in the apparent happiness and good fellowship of this curious wedded pair — come to him out of fairy land."

A Washington Star reporter heard the President during the evening say to General Tom:

Toured Europe

"General, you are now the great center of attraction — you have thrown me completely in the shade." And Leslie's Weekly ran an item to the effect that when General Tom Thumb was introduced to the President, Mr. Lincoln said "Well, General, what is your opinion of the war as a military man?" The General replied, "My opinion is, Mr. President, that my friend Barnum would settle the whole thing in a month." At another time, Commodore Nutt and Minnie Warren also visited President Lincoln at the White House, and, later, the General and his wife and Commodore Nutt and Miss Warren made a tour of Europe.

After Barnum had sensationally married his midgets, he had time in his fifty-fifth year for rest, reading and recreation, but he did not take it. He wrote a book "The Humbugs of the World." He also became a state legislator, developed East Bridgeport real estate, lectured on success and temperance, and projected forerunners of what was to make him immortal — **The Circus.**

It was inevitable that before the end of Barnum's career, he would get into politics and in 1865 he was elected to the Connecticut legislature. It was while he was making a speech in the House that a telegram was handed him to the effect that the American Museum was in flames. He read the message without batting an eye, laid it on his desk and continued with his speech.

Defeated For Congress

Four months after the fire he reopened the museum with new curiosities gathered from all over the world. After one term in the Legislature Barnum retired, but in 1867 he was nominated for Congress only to be defeated by a Democratic at the general election, due, it was said, to the "forces of corruption, fraud and bribery."

It is unfortunate that Barnum never was in Congress. His speeches, which in his own Congressional District were "full of patriotism" and "special with humor," would, in Congress, have been the source of much amusement to the nation, even if they wouldn't have contributed much to its political philosophy.

Now we come to **The Circus:** In 1870 W. C. Coup and Dan Costello, experienced showman, called upon Barnum to join them in forming a great travelling show. They wanted the power and prestige of his name, as well as his financial support. They arrived at the right time for Barnum was tired of his semi-retirement. He agreed to join them. Coup devoted his time and energy to organizing **THE GREATEST SHOW ON EARTH**, and Barnum advised and furnished the sinews of war.

Opens Circus In 1871

The show opened April 10, 1871 in Brooklyn with the largest area of canvas ever spread for a circus. More men, horses, and other animals were employed than by any like organization, either in the United States or Europe. The name "Barnum" was a great attraction, and the circus was a success from the start. His 30 years in the amusement field had carried his name throughout the United States and Europe. General Tom Thumb, Jenny Lind, and The American Museum formed a background of notoriety which finally made the name of **Barnum and Bailey** a national institution. Coup's health broke and he sold his interest to Costello who, for personal reasons, also left the show. The Barnum Circus depended for its patronage, among other things, on its size and in 1872 another ring was added making The First Two-Ring Circus, and which eventually grew into The Famous Three-ring Show.

Elected Mayor

President Grant and his Cabinet, governors of states, and other public officials visited the great show and congratulated Barnum on a stupendous achievement. In 1875 Barnum's fellow-citizens in Bridgeport, recognizing his preeminence and civic spirit, elected him mayor. He was the only Republican on the ticket to be elected. After one term he refused to serve longer. His circus was making more money than ever. Moreover, it was the centenary of the Declaration of Independence and Barnum made the most of it. His printed program contained the boast:

"And the Star Spangled Banner
In triumph shall wave
O'er the grandest of shows
Even Barnum e'er gave."

The church had always been opposed to shows, and especially the circus, but Barnum really forced recognition upon his clerical brethren by advertising his circus as "Barnum's Great Moral Show." He gave passes liberally to clergymen, editors, and orphans. To others who bothered him for passes he gave a card that read:

"Search The Scriptures"

"In those days there were no passes given — Search the Scriptures.
"Thou shalt not pass." Numbers xx, 18.
"Suifer not a man to pass." Judges iii, 28.
"The wicked shall not pass." Nahum i, 15.
"None shall pass." Isaiah xxxiv, 10.
"This generation shall not pass." Mark xiii, 30.
"Beware that thou pass not." 2d Kings vi, 9.
"There shall no strangers pass." Amos iii, 17.
"Neither any son of man pass." Jeremiah li, 43.
"No man may pass through because of the beasts." Ezekiel xiv, 15.
"Though they roar, yet they cannot pass." Jeremiah v, 22.
"So he paid the fare thereof and went." Jonah i, 3.

The clergymen were grateful for their passes, and sometimes mentioned the circus from the pulpit advising their congregations to attend this "strictly moral exhibition."

In 1880 James Anthony Bailey associated himself with Barnum, and the firm became **"Barnum and Bailey — The Greatest Show on Earth."** Bailey was the perfect partner for Barnum. They were opposites in character, but never antagonistic in business. Bailey was born July 4, 1847 in Detroit, Mich. The contrast between Barnum and Bailey extended even to their physical characteristics. Barnum was more than 6 feet tall, robust, strong, and corpulent. Bailey was short, thin, alert and nervous. Barnum was pleased and serene — Bailey always worried and anxious. Barnum lived for publicity — Bailey hated it.

A Sucker A Minute

Barnum reveled in the title "Prince of Humbugs;" and in the remark attributed to him, "There's a sucker born every minute," while Bailey detested every form of humbug. There was one point on which they agreed — the value to the circus of temperance. Barnum advocated it on moral grounds, Bailey believed in it for the sake of efficiency; in fact, Bailey was the efficiency expert of the circus.

(Continued Tomorrow)

George Sand, the French woman writer who flaunted a short haircut, was versatile. Before she died in 1876 she wrote memorable romantic, socialist and pastoral novels.

The distance from London to Bombay, India is 10,800 miles around the Cape of Good Hope and only 6,300 miles through the Suez Canal.

Lack Of Leaders Blamed On Women

PITTSBURGH (AP) — Women themselves, not men, are responsible for the lack of top-ranking female political and government leaders, in the opinion of the first woman to hold a state-wide elective office in Pennsylvania.

Secretary of Internal Affairs Genevieve Blatt said yesterday that too many women are either unable or unwilling to accept political responsibility.

She said she has found that men don't make it difficult for the fair sex to scale the political heights.

Her remarks were contained in an address at a Chatham College Forum.

Miss Blatt told her female listeners that politics often is a rewarding and satisfying career.

Weather Forecast

Extended forecast for Saturday, Oct. 26; to Wednesday, Oct. 30.

Eastern Pennsylvania, eastern New York and Midatlantic States: Temperature will average 4 to 8 degrees below normal, quite cool and well below normal over weekend, warmer Tuesday and Wednesday, rain over south and along Middle Atlantic coast line late Sunday or Sunday night, totaling ¼ to ½ inch.

Western Pennsylvania, western New York and West Virginia: Temperature will average 4 to 8 degrees below normal, quite cool and well below normal over weekend, warmer Tuesday and Wednesday, few snow flurries near the lakes Saturday; chance of rain south Sunday night, light precipitation.

Sees Bright Hopes For Arms Control

PHILADELPHIA (AP)—Harold E. Stassen, President Eisenhower's advisor, says now that Russia has Sputnik, she may be more amenable to an arms control plan.

Stassen told a United Nations Day commemoration service yesterday in nearby Haverford that Sputnik, in circling the globe, "intangibly rips holes in the Iron Curtain."

Stassen said the main reason Russia has objected to previous arms control plans is its reluctance to permit inspection.

"With its success in outer space, the Soviet Union may now be willing to spell out such acceptance in the kind of detail and specifics which are essential for successful negotiation," he said.

SAVE MONEY, SPACE

HARRISBURG (AP)—Property and Supplies Secretary Andrew M. Bradley said today the commonwealth will save $50,000 a year under a new plan whereby five-drawer filing cabinets will be purchased instead of four-drawer units.

He said the five-drawer cabinets also will save floor space in the commonwealth's many offices. Part of the saving, Bradley said, will be as a result of making the cabinet purchases in large lots.

JUDGE DIES EARLY TODAY

UNIONTOWN, Pa. (AP) — Judge S. John Morrow of Fayette County Common Pleas Court died early today in Uniontown Hospital.

The 78-year old jurist suffered a paralytic stroke last Sunday. He never regained consciousness.

Judge Morrow was hospitalized several weeks this past summer with an ear infection. He suffered that ailment in Milwaukee while attending the annual convention of the National Juvenile Court Foundation, Inc. He had been secretary-treasurer of that group since its establishment in 1950.

A Republican, Judge Morrow first was elected to the Common Pleas Court bench in 1925. He was defeated for a second term in 1935, but was given an interim appointment in 1939 following the death of Judge Harry A. Cottom. Later the same year, Judge Morrow won election to a full 10-year term and was re-elected in 1949.

Judge Morrow was born on a farm in Summerhill Twp., Crawford County, and educated in local schools. He graduated from Allegheny College in 1901.

He was first assistant district attorney of Fayette County from 1912 to 1916 and district attorney from 1916 to 1920.

Surviving are the widow, Mrs. Caroline Longanecker; two sons and two daughters.

SPORTS

Bullets In Poor Shape For Scrap With Muhlenberg At Allentown Saturday At 1:30

A Gettysburg College football squad, weakened by illness and injuries, invades Allentown Saturday afternoon for an engagement with Muhlenberg at 1:30 o'clock.

Probably the worst situation on the Bullet squad is at end where Herb Payne, 200-pound junior, is the only player in tip-top condition. Chet Knight, 205-pound sophomore, was confined to the infirmary from Sunday until Wednesday and will see very limited duty. Barclay Boyd, 225, junior, has not drilled for two weeks although he played briefly last week. Arloe Olson, 196, junior, has a minor hip injury and Mack Hicks, 165, sophomore, has a leg injury. On the bright side is the return of Stan Musser, 180, senior, who has been out of action since the Western Maryland game. He will also be given limited duty.

In an attempt to solve the end situation, Coach Gene Haas has indicated he may move Dick Davidyock, 180, sophomore fullback, to a wing position inasmuch as Davidyock has had some experience at that position. Don Harman, 197, senior guard, may draw an assignment at end or tackle.

Tackle Problems

Al Kempton, 215 senior, is the only tackle in normal condition. Marty Hoffner, 210 junior, and Bob Barkley, 210 senior, are nursing leg injuries which has prevented them participating in stiff workouts Henry Coyne, 205 junior, is nursing an old shoulder injury and Fred Mink, 210 soph, has been ill.

The guard and centers positions are intact where all players are in good condition.

Most of the backfield performers are also in good condition although Don Hafley, halfback, and Neil Hickoff, quarterback, have been among those felled by illness. Earl Yost, another halfback, suffered a slight injury but will be available.

Muhlenberg, after a 20-13 loss to Lafayette, has come along fast with victories over Albright, Scranton and Lebanon Valley and is confident of upsetting the Bullets.

SPORTS IN BRIEF

GOLF

HESPERIA, Calif.—Frank Boynton, of Orlandon, Fla., fired a six-under-par 66 for a one-stroke lead in the first round of the $15,000 Hesperia Open Golf Tournament.

GENERAL

HARRISBURG, Pa. — England held on to the lead in team scoring although failing to pick up a point as Ireland tallied its first points with a first and a second at the 12th Pennsylvania National Horse Show. England held a slim edge over the United States 58-55 with three events remaining.

RACING

CAMDEN, N.J.—I Geegee ($3.-60) with Willie Hartack furnishing the whip in the stretch, won the featured Executive's Purse at Garden State.

NEW YORK—Royal Lark ($20.-60) and Dainty Jane ($6.70) won the two sections of the Pulaski Purse at Jamaica.

College Football Games Cancelled

By THE ASSOCIATED PRESS

The flu blew several more college football games off the schedule again this weekend.

All were minor college contests, however. Most major teams have been hit by the illness to a degree, but there have been no cancellations or postponements.

In some cases, teams suddenly left without opponents have gotten together for substitute games. Such was the case with Northeastern and Brandeis, Wagner and Grove City (Pa) and Emporia (Kan) State and the Missouli School of Mines.

Davidson and Elon tried to make the same sort of match after their respective opponents, Presbyterian and Catawba, were stricken, but hours after the substitute game was arranged, Davidson became a victim.

Other games cancelled this weekend include:

Wagner - Dickinson; Potomac State-Concord (WVa); Grove City (Pa)-Susquehanna; Moravian-Lebanon Valley; Union (NY)-Hobart; Franklin & Marshal-Albright (Albright re-scheduled Waynesburg.

IN SEMIFINALS

PINEHURST, N.C. (AP) — A 73-year-old shotmaker, William H. Diddell of Carmel, Ind., met J. Wood Plat of Philadelphia in the semifinals of the North and South Seniors Golf Championship.

In the other semifinal of the tournament for golfers aged 55 and up, James H. Ackerman of Princeton, N. J., played John W. Roberts of Columbus, Ohio.

Diddell defeated Benjamin F. Krafford Jr., of Titusville, Pa., 1 up.

Platt won over Frank Ross of West Hartford, Conn., 4 and 2.

FIGHTS LAST NIGHT

LOS ANGELES—Charley Black, 160, Los Angeles, knocked out Chebo Hernandez, 159, Juarez, Mexico, 7.

REVERE, Mass.—Ray Lancaster, 144, Spartanburg, S. C., outpointed Bob Kennedy, 139, New York, 8.

Ben Schwartzwalder, Syracuse University football coach, coached Muhlenberg to victory in the 1947 Tobacco Bowl game.

NAME AL LOPEZ OF CHISOX AS TOP AL MANAGER

By BEN OLAN

NEW YORK (AP)—Al Lopez of the Chicago White Sox, who was out of a job at this time a year ago, today was named American League Manager of the Year for 1957.

Lopez' performance overshadowed those of Casey Stengel of the pennant-winning New York Yankees and Paul Richards of Baltimore in the opinion of the Baseball Writers' Assn. of America who participated in the Associated Press annual poll.

Eighty-three of the 180 voters felt that Lopez' direction of the second-place White Sox was the most outstanding. Richards was named on 70 ballots and Stengel on 25. Frank (Pinky) Higgins of the third-place Boston Red Sox received two votes.

The showing of the White Sox was one of the big surprises of the American League. With admitted weaknesses at several positions and little reserve strength, Lopez kept his charges on the heels of the Yankees until their elimination from the pennant fight in the final week of the campaign.

Lopez, 49-year-old native of Tampa, Fla., was hired to manage the White Sox last Oct. 29 following his release by the Cleveland Indians, who he had led for six years. With the Indians, Al won one pennant, in 1954, and finished second on five occasions.

PHILLIES TO BE ON NEW YORK TV

NEW YORK (AP) — Everything appears set for the televising of 78 games by the Philadelphia Phillies into the metropolitan New York area next season.

The deal which would beam the National League games here now that the Brooklyn Dodgers and New York Giants are no more reported was completed yesterday between Bob Carpenter, Phillies president, and station WOR-TV. No official announcement has been made, however, pending a formal notification of the New York Yankees, the only live club left in the Big Town, which makes this American League territory.

The Yankees, who telecast their home games and some of their road games over another channel, apparently can not bar the Phillies games.

Commissioner Ford Frick said yesterday "we're not permitted to make any kind of a restrictive rule on television between leagues."

The Phillies' TV schedule here, however, likely will coincide with Yankee road games, thus not representing competition for Yankee home attendance.

Band Volunteers For Team Berths

EAST MOUNTAIN, Tex. (AP) — Seven members of the high school band will reinforce the East Mountain team for its football game with Spring Hill tonight.

Coach Lonnie Senton appealed for volunteer players after a star tackle and fullback, Wendell Harvey, was killed in an auto crash and influenza further reduced the squad to eight players.

None of the musicians has played high school football.

"We might get beat 100-0 but we're going to play," Senton said.

NEW CONTRACT BUMP ON HEAD FOR W. ALSTON

LOS ANGELES (AP) — This was Walt Alston's initiation into managing a big league baseball team Wild West style: A lump on his balding head and a new contract with the Los Angeles Dodgers.

"A fine introduction to Los Angeles," said the veteran manager, who arrived at a downtown press gathering rubbing a goose egg bump on the back of his head.

He got the bump when his taxi cab, en route from the airport, was smacked from behind by a large limousine.

"Probably A Giant Fan"

"Probably driven by a San Francisco Giant fan," quipped a reporter, reminding the gathering that the traditional rivalry between the two former New York feuders will undoubtedly retain its intensity now that the teams are on the West Coast.

Dodger Vice President Emil "Buzzy" Bavasi promptly announced that Alston and team captain Pee Wee Reese have signed one-year contracts.

How much, asked the reporters. More than last year?

No Raise For Losers

"No one with the Dodgers gets a raise when we lose the pennant," laughed Bavasi, who wouldn't say exactly.

Alston drew $36,000 for 1957. Reese, the spark plug shortstop—although ailing most of the season—reportedly received $39,000.

In Washington yesterday, Calvin Griffith, president of the Washington Senators, announced that former Senators manager Charlie Dressen has asked permission to discuss an offer from the Dodgers.

Big Ticket Demand

It was understood that Dressen, who once managed the Dodgers, would become a special assistant to Alston. Dressen has been scouting talent for the Washington organization since being replaced as manager by Cookie Lavagetto in May.

Bavasi told the reporters that the Dodger office, which set up shop here yesterday, already has been swamped with ticket requests.

"We found enough money in the mail today for tickets to enable us to sign Alston and Reese," Bavasi said. "The ticket demand tops anything we ever experienced in Brooklyn."

FAVOR BUSSO OVER KERWIN

By MURRAY ROSE

NEW YORK (AP) — In the storybooks, Gale Kerwin, the understudy moving up to the starring role, would be a cinch to beat Johnny Busso, the fighter with the reputation.

Since this pairing is not in a novel and the fight is in Madison Square Garden tonight, cynical bookmakers have made Busso, ninth-ranking contender, a 13-5 favorite to win the radio-television (NBC, 9 p.m., EST) 10-rounder.

The rangy, 5-8, 140-pounder from Valley Stream, N.Y., via Ottawa, got the knock on the door when the Asian flu epidemic bowled over two fighters, Paolo Rosi of Italy and New York and Ernie "Sonny Boy" Williams of Washington, D.C.

Both Fast Comers

The promotion will mean a $3,-000 pay boost. Gale was scheduled to collect $1,500 for boxing Johnny Gorman of New York in the 10-round semifinal. Now he will earn about $4,500, of which $4,000 is from the radio-TV receipts.

A pro only 3½ years, Kerwin has a 24-4-1 record, including six knockouts.

Busso also has made a lot of progress in the past year. He gained a berth in the elite top ten by beating Larry Boardman on June 26. In his last start on Aug. 30, he lost a 10-rounder to third-ranking Ralph Dupas in New Orleans. Johnny's record is 30-5-1, including 14 kayos. The 23-year old New Yorker, about the same height and weight as Kerwin, has been a pro five years.

English Hold Slim Lead At Horse Show

HARRISBURG (AP)—The Pennsylvania National Horse Show went into its second to last day today with the English team holding a slim lead in the International jumping competition.

It was a great day for the Irish yesterday as the wearers of the green scored their first points in the international events at the huge State Farm Show Arena. They won first and second place.

For the first time, England failed to pick up a point in the contests but managed to hold onto its lead in team scoring with three events yet to be held.

England now has 58 points. The United States is second with 55 points.

OWNERS OFFER CHANCE IT TONY AS LONG SHOT

By RALPH BERNSTEIN

CAMDEN, N.J. (AP)—Looking for a long shot? Then here's a tip. Keep your eye on Chance It Tony, a $2,300 yearling buy, who runs in the richest race in the world at Garden State Park Saturday.

Tony and Anna Cannuli, New Jersey produce and fruit growers, passed along this good word on their steed for the fifth running of the Garden State Stakes.

Mrs. Cannuli explained that the Kentucky-bred Chance It Tony was named on her say so.

20 To 1 Shot

"Tony (her husband not the horse) is always taking a chance, either buying horses or stocks. After he paid $2,300 for this one down at Keeneland, I suggested the name Chance It Tony."

Chance It Tony's chances in the mile and a sixteenth jackpot for two-year-olds are 20-1 or more.

What has the Cannulis excited about the chances of their horse is an offer they received last Thursday for the colt — $100,000 for a $2,300 purchase. Trainer Willie Manzi said the offer was from Joe Hernandez for unnamed California owners.

Won't Sell Yet

The Cannulis have refused to sell their colt, which has earned $16,850, at least until after the Garden State. Maybe they figure he'll win the $156,332.50 first money. The second, third and fourth winnings aren't bad either —$55,-030, $36,272, $13,757.

Another outsider in the $275,150 gross Garden State is Terra Fairma, a 12-1 shot owned by R. Douglas Prewitt Jr. of Lexington, Ky. Terra Firma has won five, finished second three times and third once in 12 starts, earning $38,485.

Maine Chance Farm's Jewel's Reward is the 2-1 choice in the field of 12 probable starters. Willie Shoemaker will ride Mrs. Elizabeth Graham's colt which has won three of nine starts and earned $150,000.

SOUTH CAROLINA SUFFERS UPSET FROM CLEMSON

By JIM KENSIL
The Associated Press

Hurricane Upset ripped through South Carolina yesterday and today hovers over another weekend of college football.

Spawned nationally a week ago when powers such as Michigan State and Minnesota bowed to its force, the big storm turned up down South and the Clemson Tigers, 6-point underdogs, rode with it for a 13-0 victory over South Carolina. The annual "Big Thursday" contest, played before a record 44,500 persons in Columbia, S.C., ruined any hopes the Gamecocks may have had for the Atlantic Coast Conference Championship.

They are now 0-2 in ACC play. Clemson, the defending champion, is 2-2, while Duke and North Carolina State, who clash tomorrow at Raleigh, top the loop with unbeaten records.

Promising Targets

A pack of offensive-minded sophomores, guided by quarterback Harvey White, accounted for the Clemson touchdowns, and the first-string seniors, spearheaded by end Ray Masneri turned back repeated South Carolina thrusts. The Tigers TDs came late in the second period on a 15-yard pass, White to halfback Sonny Quesenberry, and in the third period with fullback Rudy Hayes going over from the one. White converted.

Miami, down where storm warnings are getting to be routine conversation, readied for tonight's invasion of Kansas, a 13-point underdog. There is no reason to suspect the Hurricanes won't whip the visiting Jayhawks, but a surprise result would certainly indicate which way the wind will be blowing when the rest of the big boys take the field tomorrow afternoon and night.

Upset may strike anywhere anytime, but if she wants to hit really hard the most promising targets are the unbeaten giants of Oklahoma, Texas A&M, Iowa, Duke, Auburn, Mississippi and Notre Dame. They are ranked 1 to 7, respectively, in the Associated Press weekly poll. Secondary targets are Michigan State, Army and Louisiana State, No. 8, 9 and 10 nationally and all once-beaten.

Should Follow Pattern

Although Colorado has been Oklahoma's most troublesome opponent while the Sooners have run off 44 straight triumphs and 61 straight in Big Eight competition, the Buffaloes, already beaten by Kansas, do not appear to have what it will take at Oklahoma tomorrow.

Neither does Iowa, the ruling Big Ten titleholder, nor Army, the East's leading eleven, figure to have difficulty with Northwestern and Virginia, respectively, but elsewhere the ranking teams are juicy prey for the upset.

Texas A&M tackles tough Baylor, and a Baylor triumph would throw the Southwest Conference into one of its conventional seasons of turmoil. A North Carolina State victory over Duke would give the ACC a big headache, because should N.C. State go on to win the crown, it could not represent the conference in the Orange Bowl. The Wolfpack, ranked 11th nationally, is on NCAA probation.

Auburn, currently riding high in the Southeastern Conference, risks only prestige in a night game against intersectional rival Houston, and Arkansas, still a Southwest contender, will be looking for some of that same prestige against the SEC's Mississippi. Louisiana State, an unexpectedly strong SEC member, will have any eye on both these games, but it can't afford to glance away from opponent Florida in a game that could go either way.

Notre Dame must be wary of Pittsburgh. The Panthers figured high in preseason pickings, but have been knocked off by Oklahoma and Army.

And Michigan State, the nation's kingpin a week ago before stumbling over Purdue, meets Illinois, the club that took the upset route in whipping Minnesota.

Other standout games include: EAST — Penn - Navy, Harvard - Dartmouth, Brown-Rhode Island, Columbia-Lehigh, Boston University - Holy Cross, Colgate - Yale, Penn State - Syracuse, Princeton-Cornell.

Littlestown-Susquehannock RescheduleGameForNov.13; Epidemic Wrecks Program

Littlestown and Susquehannock became the latest schools to be forced to postpone their football game because of illness, the game being rescheduled for Wednesday evening, November 13, at Susquehannock. The request for postponement was made late Thursday by Susquehannock officials. Originally the game was scheduled for this Saturday evening.

As the result of the wave of postponements in this area Delone Catholic will be the only county team in action tonight, the unbeaten Squires meeting Lebanon Catholic at Lebanon.

The entire slate of games in the South Penn Conference listed for tonight was wiped clean with the postponement of "title" game between Carlisle and Hanover at Hanover. The decision was made late this morning. No date has been set for the game.

Call Special Meeting

A special meeting of the South Penn officials has been set for next Tuesday evening at the Country House, near Carlisle, when efforts will be made to iron out the problems arising from the many postponements.

Waynesboro and Shippensburg are still on schedule to meet tonight at Shippensburg. The Mechanicsburg-New Cumberland game has been cancelled.

Junior High Postponements

Three South Penn Junior High League games scheduled for Thursday were postponed due to inclement weather and illness. Gettysburg will play at Hanover Monday afternoon at 3:30. Shippensburg and Washington Twp. will meet this afternoon on the latter's field, while Chambersburg will play at Waynesboro Saturday evening at 7:30.

Postponements and their makeup dates have been announced as follows for the following:

Hershey at Gettysburg, November 19, 7 p.m.

Scotland at Biglerville, Monday, 8 p.m.

Middletown at Chambersburg, November 23, 2 p.m.

Littlestown at Susquehannock, November 13, 8 p.m.

SELL FARM

Dr. and Mrs. George N. Ewing Jr., of Hillcrest Place, have sold their 153-acre farm in Cumberland Twp., near Barlow, to Frank M. Merriken and Elizabeth M. Merriken, of Odessa, Del. Early possession will be given. The sale was made by John C. Bream.

AMAZING JAPS TAKE LEAD IN TOKYO MATCH

By WILL GRIMSLEY

TOKYO (AP)—Sam Snead's blazing bulls'-eye putter became just another slab of cold steel today and a pair of amazing Japanese forged into a two-stroke lead over the United States in the Canada Cup International Golf Tournament.

The bullish Slammer from White Sulphur Springs, W. Va., skyrocketed to a two-over-par 74 after yesterday's record 67 and not even a sub-par 71 by partner Jimmy Demaret could salvage the day against the inspired Sons of Nippon.

Torakichi Nakamura, a 5 foot 4 shot-making machine from Tokyo, fashioned his second straight 68 over the Kasumigaseki Country Club course and his slender companion, Koichi Ono, added a 70 to give Japan the Canada Cup lead with an aggregate score of 279.

U.S. Team Second

In second place at 281 came the favored United States team strongly pushed by the rallying South African duo of Gary Player and Harold Henning, who had 283 after second rounds of 69 and 70 respectively.

Golf aces of the British Commonwealth moved into strong contention, ready to take over should Japan and the United States slip during the final two rounds Saturday and Sunday.

Peter Thomson, winner of three straight British Opens shot a 68 and young Bruce Crampton added a 71 to give Australia a total of 284.

A pair of sparkling 67s, matching Snead's course record of yesterday, moved both Wales and England into a tie for fourth place at 286.

Par for the 6,895 yard course, which played long after an early morning rain, is 36-36—72. Nakamura held the course record of 69 before the onslaught by the world's top pros this week.

SEARS OFFICER CHARGES FOUL LABOR ACTIONS

WASHINGTON (AP)—A Sears Roebuck & Co. vice president today accused Nathan Shefferman and some executives of the big mail order house of "disgraceful" unfair labor practices against labor union organization efforts at its Boston store in 1953.

But Wallace Tudor, vice president in charge of personnel and employe relations for the company, told the Senate Rackets Investigating Committee these were "glaring exceptions" to Sears' over-all history of dealing with its 205,000 workers.

He insisted most of its employees feel they are "better off than employes of competitors, whether organized or not," and described employe benefits they receive.

The committee, assigned by the Senate to search for evidence of racketeering and other malpractice in employer-employe relations, is deep in an investigation of the relations between employes and Shefferman, a Chicagoan described in the public hearings as a specialist in "union busting."

The committee is exploring what happened when the Retail Clerks Union attempted to organize Sears' stores in the Boston area in 1953. Tudor, reading from a prepared statement, told the senators:

"The handling of the Boston situation involved a series of mistakes highlighted by widespread use of pressure and coercion, discrimination against employes for union activities, favoritism, intrigue and unfair labor practices."

For this he blamed Sherrman's firm of Labor Relations Associate, Inc., and "certain company personnel," declaring.

"I want to state with the utmost candor and conviction, that many of the activities engaged in by Labor Relations Associates and certain company personnel acting with them were inexcusable, unnecessary and disgraceful.

"A repetition of these mistakes will not be tolerated by this company.

"The fact that our employes were at that time and are now receiving wages and benefits far in excess of employes in competing Boston concerns, whether organized or not, in no way justifies what took place."

Tudor said he hoped the committee would consider these as "isolated episodes, contrary to principle and practice" in a program of employe relations of which he said Sears is very proud.

Robert F. Kennedy, committee counsel, who announced earlier that the committee probe would turn today to the 1953 labor organizing attempts at Sears' Boston store, said Tudor had requested an opportunity to testify.

He said the committee plans to go into Sears' operations "rather extensively."

TANEYTOWN TO GREET SANTA

Santa Claus will visit Taneytown at 7 p.m. December 9, it was announced at a recent meeting of the Taneytown Chamber of Commerce held in the municipal building. There will be a parade, brief program and gifts wil be presented to children.

Committees appointed include: Parade and program, Alfred Heltebridle, chairman, Norman Sauble, Ellsworth Feeser and Andrew Mason; treats, C. G. Bowers, chairman, Delmar Riffle and Robert Polley.

The merchants prize plan will be headed by C. G. Bowers and David Hildebrick.

The annual chamber banquet will be held in the high school auditorium at 6:30 p.m. November 21.

Nominate Officers

The following officers were nominated: Merwyn C. Fuss, president; Merle Ohler and Andrew Mason, first vice president; Carroll Wantz and David Hiltebrick, second vice president; Robert Feeser and Frank Dunham, secretary; Charles Arnold and Raymond Perry, treasurer.

Mayor Raymond Perry announced that parking meters will not be policed from one week before Christmas until New Year's Day but all donations are to be turned over to the March of Dimes.

The Potomac Edison Company was engaged to place the Christmas street lights. The council and Chamber will cooperate in this project.

A committee will meet with the county commissioners relative to improving the road to Harney.

Alonzo G. Decker, executive vice president of Black and Decker, Hamstead, and deputy chairman of the board of directors of the Federal Reserve Bank, Richmond, Va., will speak at the November dinner.

EPIDEMIC OF ILLNESS TAKES 68 STATE LIVES

By THE ASSOCIATED PRESS

The wide-ranging wave of flu-like respiratory ailments rolled up a total of 68 deaths in Pennsylvania today.

Three more persons died in the hard-hit Lehigh Valley, bringing the total there to 29. In addition, two more patients at the Pennhurst State School for the Mentally Retarded in Chester Cunty died. Thirteen children and two adults have died at the institution since the flu outbreak earlier this month.

The Philadelphia health department said the total number of persons affected since the epidemic began in the city was 300,000. So far, no deaths have been reported by the city.

Thus far, the State Health Department has confirmed 49 cases of Asian flu in 18 of the state's counties.

Doctors at Clearfield Hospital are checking to determine if Asian flu caused the death of 13-year-old Anna Mildred Maines, of Clearfield R. 2, who died Wednesday of a respiratory ailment which developed into pneumonia.

The latest deaths in the Lehigh Valley area were those of Mrs. John Wehry, 35, Tamaqua; Sidney Vaughan, 66, Allentown; and Mrs. Mary Carney, Allentown. All three suffered from pneumonia which followed flu attacks.

State Horses Win At Show

HARRISBURG (AP)—Pennsylvania first place winners in last night's events at the 12th annual National Horse show here:

Eastern saddle horse breeders futirity (weanlings): Unnamed horse owned by Valley Farm, Ringtown.

$250 ladies' working hunter stake: Monty D, owned by Jenepher McLean, Fort Washington.

Western trial horses: Anita Adams, owned by Hillview Farms, Washington, Pa.

$250 ladies' three-gaited saddle horses stake: Courageous Spirit owned by Hillsview Farm.

Open pony roadsters, not exceeding 50 inches: Mustard, owned by Dr. R. S. Bordner, Millersville.

Ladies' single Shetland ponies over 52 inches: Night Editor, owned by Thelma R. Potter, Williamsport.

Open single roadster to bike: Duke Rhythm, owned by Mr. and Mrs. Herman F. Morgan, Uniontown.

Shopper Special

Queen Elizabeth, in surprie visit to a supermarket in West Hyattsville, Md., Saturday on the way back to Washington from the Maryland-North Carolina football game, chats with Mrs. Frank Riccardi, who happened to be shopping at the time with her son. The Queen questioned other shoppers on their shopping methods before leaving. (AP Wirephoto)

MAY QUIZ SPIES ON SPACE SECRETS

WASHINGTON (AP)— Two convicted atom spies—David Greenglass and Harry Gold—may be questioned next week about information that the Rosenberg spy ring gave U.S. space secrets to Russia in 1947 or 1948.

Robert Morris, counsel for the Senate Internal Security subcommittee said today the two may appear at subcommittee hearings next week in Memphis.

Julius and Ethel Rosenberg were executed as atomic spies in 1953. The testimony of Greenglass and Gold helped convict the pair. Mrs. Rosenberg was Greenglass sister.

Morris said in a telephone interview from Point PPleasant, N.J., that the Justice Department indicated it would try to have both Greenglass and Gold on hand when the Memphis hearings open next Tuesday.

Taneytown School News

Plans are progressing for the annual fall carnival to be held in the Taneytown High School November 1 and 2. Ham, chicken, or oyster platters with vegetables, beverage, and dessert will be served each evening beginning at 5 o'clock. A flower show, art exhibit, variety show, skits, games, and sale of baked goods will be on the program both evenings. A beauty contest will be held Friday night and on Saturday, there will be a food contest and a card party. The card party will be held at 2 p.m. A door prize will be given Saturday evening.

Christmas seals and literature are being mailed by students in the commercial department as a public service project. North Carroll, Robert Moton, and Westminster schools are also participating in this activity.

Excerpts

(Continued From Page 1)

order in the town. The troops passed through in admirable order. Before marching through I took down the U. S. colors which were flying over the town at the Market place. A very large stand of colors. Citizens in the streets dressed in their best all full of curiosity to see the Rebels. Marched through towards Wrightsville. Reached the enemy's position In attempting to get his position we frightened them off—all militia who ran as fast as possible and burnt the bridge. Town on fire. Rebel regiments which had marched 25 miles that day worked to stop the fire. Tear down houses and at last the fire stops after burning 6 or 8 hours. Wrightsville was a scene of confusion and excitement. But the splendid behavior of the rebel troops soon restored order. I again guarded the town.

June 29th. Monday. Marched back to York.

June 30th. Marched in the direction of Chambersburg. Encamped near Heidlersburg. Long weary march.

Heavy Firing July 1

July 1st. Wednesday. Marched towards Gettysburg from camp. Heavy firing heard in our front. Occasional skirmishing with cavalry by the cavalry of our advance. About 3 o'clock p.m. formed in line of battle about 2½ miles from Gettysburg. The 11th and 1st U. S. Corps were found in front of our Corps. About 4 p.m. an advance was ordered. The charge was handsomely made from all points, driving the enemy through the town and into the entrenched positions among the hills, and mountains. The slaughter of the enemy was very heavy. About 6,000 prisoners and a few pieces of artillery captured. I received a slight wound in my side, near the ribs, but not sufficient to force me from the field. The Brigade slept on the field of battle that night. I went to the hospital after dark.

July 2nd. Thursday. Had my wound examined and dressed. Dr. Butts gave me a certificate that I was unfit for duty on account of my wound. Put it in my pocket and rejoined my regiment. Brigade moved frequently during the day to various points. About 5 p.m. a very heavy artillery fight between our and the enemy's batteries. They were strongly and skillfully fortified. During the day our infantry charged the enemy in his entrenchments repeatedly, often taking them but unable to hold them.

At dark we were ordered to support Hays' Brigade in a charge upon the enemy entrenchments near the town. The assault failed of success. We held however an advance position all night within 800 yards of the Yankee redoubt.

Weather Was Hot

July 3rd. Friday. Heavy fighting all along the line. Repeated attacks upon our part. The enemy driven a little further but their strong position still held. The heaviest fighting of the war. Weather exceedingly hot.

July 4th. Saturday. Moved back the lines to afford the enemy an opportunity to attack. All day long battle was offered which he declined Rain falling in torrents. Our Brigade held in reserve. Battlefield becomes very offensive on account of unburied dead. For miles the dead Yankees lay scattered along. Yankee prisoners have been ordered to bury their dead but they work very slowly. All our dead have been buried.

July 5th. Sunday. Moved in the direction of the mountain Gap at Fairfield, towards Chambersburg. Our Brigade was placed in the rear of the army and mine and Col. Atkinson's regiment in the rear of the Brigade. A small force of infantry and artillery follow to harass us They then shell our Division from a good position but not a man is wounded.

LITTLE STIR IN EASTERN PENNA. OVER ELECTION

By LEE LINDER

PHILADELPHIA (AP)—A Republican fight over a Montgomery County judgeship gave Democrats the greatest hope of winning a generally solid GOP congressional seat, but elsewhere in eastern Pennsylvania the approaching Nov. 5 election brought little voter excitement.

Even in the 13th Congressional District, dominated by Montgomery County, there was no outpouring of electorate interest.

Throughtout the entire eastern section, with political contests predominantly local in scope, there was hardly a ripple of electioneering. The biggest moments for the politicians, as they hoped to boil up some statewide election news appeared to be in Philadelphia, Scranton and Montgomery County

The 13th Congressional District comes to national attention because it was the seat held for about 10 years by Samuel M. McConnell, Republican who resigned recently to become executive director of the National Cerebral Palsy Assns.

No Upset Expected

The seat has long been safe for the GOP—and no upset appears in the making, unless the Republicans manage to manufacture it themselves.

The GOP is embroiled in a fight over a common pleas court judgeship that President Judge Harold G. Knight is vacating at the year's end.

Republicans nominated David E. Groshens, over the objections of the Montgomery County Bar Assn., Judge Knight and a former judge, George C. Corson. Instead of Groshens they endorsed Thomas E. Waters, a Republication who promptly was nominated by the Democrats.

Heartwarming To Clark

U.S. Sen. Joseph S. Clark (D-Pa) says it is "heartwarming to see a resurgence of Democratic activity in the heart of Republicans."

Clark, like other Democratic leaders, hopes that enough voters will go for Waters on a straight ticket to let Glenn W. Preston, Oreland physicist, win the Congressional seat over Republican John A. Lafore Jr., a state representative.

Philadelphia, the state's largest city, and Scranton, No. 4, are expected to pile up easy victories for Democratic candidates.

LIQUIDATION OF ESTATE URGED

MEDIA, Pa. (AP)—The estate of the late Samuel D. Riddle, owner of the famed racer Man-O-War, is being drained by his Kentucky breeding farm, a state official said yesterday.

Pennsylvania Deputy Atty. Gen. Lois Forer asserted this in Delaware County Court and asked a one-year deadline for liquidation of the farm.

She said Riddle's estate, worth $3,013,000 when he died, now is worth $1,925,000. The bulk of it was left to establish a hospital in or near Media.

But Atty. Ralph Lindenmuth, speaking for the trustees, said the estate was worth $2,843,000.

He said a mandatory liquidation date would deter prospective buyers. They would wait until the last minute, he said, hoping to get the farm at a sacrifice price.

The court took the matter under advisement.

Prolonged Life Not All Blessing

PHILADELPHIA (AP) — Medicine's success in prolonging life may "become a curse rather than a blessing" unless people's minds and personalities are also preserved, says a leading psychiatrist.

Dr. Edward A. Strecker, professor emeritus of psychiatry at the University of Pennsylvania School of Medicine, said yesterday that preserving the mind and personality is "infinitely more precious than the body." He noted that many old people have sound bodies but are foregetful, lack interest in their surroundings, and suffer from infirmities due to deterioration of parts of the brain

Dr. Strecker spoke at a "Conference on Maturing Man."

Ever serve shrimp in a cheddar cheese sauce? Good! Season the sauce with Worcestershire and mustard.

Women Smuggled Whiskey In Girdles

PHILADELPHIA (AP)—Five women employes of the Publicker Industries Inc. were accused yesterday of taking from the plant 14 gallons of whisky concealed beneath their girdles.

Policewoman Alice Curran searched the women and said she found the secreted whisky in pints, half-pints and fifths. The women, employed as cleaners, were held in $300 bail for the Grand Jury.

U. S. AND RUSSIA TO RESUME U. N. DEBATE TODAY

By TOM HOGE

UNITED NATIONS, N.Y. (AP) — Russia and the United States squared off again today for resumption of the U.N. Assembly's debate on the Turkish-Syrian crisis. Each of the two big powers sought to prove the other responsible for the new flareup in the cold war.

Syria kept the pot boiling with a charge that five Turkish planes flew over her territory.

A government spokesman in Damascus said four Turkish aircraft, flying at only 600 feet, trespassed over Syrian territorial waters off Latakia, the port where Egyptian troop reinforcements landed recently. The spokesman said a fifth plane flew over Kameshli in northeast Syria.

Marshall New Arguments

Convinced that Syria will not accept a mediation offer by Saudi Arabian King Saud, Western delegates marshaled new arguments intended to prove that Russia cooked up the crisis as a propaganda vehicle to discredit the United States.

Russia in turn has accused the United States of goading Turkey into war against Syria in an effort to split the Arab world.

Syria made plain she would press demands that the 82-nation Assembly appoint a U.N. inquiry commission as soon as possible to investigate the border situation. The United States wants the commission to have the broader task of ferreting out who is behind the crisis.

Closed Door Meeting

An informed source said the leaders of the 11 Arab nations delegations met behind closed doors yesterday. One of the more moderate members reportedly suggested a resolution calling on both Turkey and Syria to pull back any abnormal troop concentrations on the border.

Syria has contended, however, that she is not at fault and needs make no move. This was given in Damascus as a reason for refusing to accept mediation.

Syrian Delegate Farid Zeineddine said last night "mediation was not offered at any time nor was it accepted." A Saudi Arabian source said Saud felt Syria accepted and then retracted but the offer still stands. Turkey accepted and sent a delegation to Saudi Arabia.

Charge Use Of Rumors

A Foreign Ministry spokesman in Damascus charged the United States and Turkey were using "rumors" of mediation to postpone the debate. The Assembly discussion was suspended last Tuesday for three days to await the outcome of Saud's offer.

Syrian Foreign Minister Salah Bitar and Zeineddine talked for an hour yesterday with Secretary General Dag Hammarskjold amid reports he would be asked to visit the troubled area. Both the Syrians denied they had extended any not think such a visit woul be useful at present.

In Beirut, Lebanon, bomb explosions last night damaged two pro-Western offices, one the headquarters of the Syrian Social National party and the other a newspaper. These and other recent explosions in Beirut have been blamed on Syrian Army intelligence.

WESTERN STYLE IN KHRUSHCHEV'S NEW GRAY SUIT

By STAN CARTER

ROME (AP) — The best-dressed man in the Communist world — Nikita Khrushchev, who else? — is getting a new suit that's continental at the hips and American where it meets the shoes.

Angelo Litrico, Sicilian proprietor of a Rome tailor shop, says he got the order for Mr. Communist's New Look while visiting Russia last month as a member of an Italian fashion delegation.

Litrico brought along an overcoat as a gift for the Soviet Communist party boss.

Delighted With Gift

"He was so delighted with the gift that he asked me — through his private secretary — to make him two more coats and the suit," the 28-year-old tailor reported.

Litrico said he will charge Khrushchev the equivalent of $160 each for the overcoats and $136 for the suit.

He said the suit will be mostly Italian-style — quite a bit tighter than American suits and a whole lot tighter than the sacklike chemises the Russians turn out

It will be double-breasted, a line that's making a comeback in America, and dark gray. One of the coats also will be grey, the other dark blue.

Asked For Cuffs

Khrushchev asked for cuffs on the pants, which Italian suits ordinarily don't have. And here's more New Look for the Soviet male — the bottoms of the trouser legs will be 10 inches in diameter. That's exactly what a pair of slacks purchased two months ago on Fifth Ave. measured.

The Italian style calls for 9 inches or less to put the feet through. Russian tailors favor bell bottoms measuring 12 inches or more.

Litrico said Khrushchev has broad shoulders, so there won't be much padding in the jacket. Brooks Brothers, take a bow.

"Verstaile Pretzels" To Be Bakers' Topic

BALTIMORE (AP) — The pretzel, a tidbit designed by 7th Century monks to represent a child's arms folded in prayer, will be analyzed by pretzel bakers at a meeting beginning today.

"Versatile Pretzels" is the theme of the 17th annual convention of the National Pretzel Bakers institute. Discussions will cover pretzels from baking them to enjoying them.

GIVEN FIVE YEARS

SCRANTON, Pa. (AP)—A Washington, D.C., man was sentenced to five years in prison yesterday for stealing an automobile and taking it from the capital to Hazleton, Pa.

Federal Judge John W. Murphy said, in pronouncing sentence, that the defendant, Elmo R. Kolb, 30, had been convicted on four previous car theft charges.

ASK COURT TO ACQUIT 9 REDS

PHILADELPHIA (AP) — The U.S. Court of Appeals was considering today a request to acquit nine Communist party figures convicted of conspiring to teach and advocate the violent overthrow of the government.

The court was asked yesterday by Joseph S. Lord 3rd, counsel for the nine, to order their acquital in view of a recent U.S. Supreme Court decision.

The nine were convicted three years ago under the Smith Act.

Later the Supreme Court ruled that the government must prove advocacy of action against it. In keeping with this decision, the government asked that two of the defendants be discharged and the seven others be granted new trials.

Lord, in his request for acquital said all nine had been found guilty only of the "'crime of speech.'" They had not advoacted action against the government, he said.

The government had asked acquittal for Walter Lowenfels, 39, and Sherman Labovitz, 32. It seeks new trials for David Dubensky, 49, alias David Davis; Joseph Kuzma, 35; Thomas Nabried, 54; Sam Gobeloff, 47; Benjamin Weiss, 32; Irving Katz, 38, and Robert Konsky, 38.

The luxurious Hawk-inspired PRESIDENT 4-Door

The all-new, action-styled
1958 STUDEBAKERS

America's family sports car . . . the versatile GOLDEN HAWK

This year, Studebaker-Packard steps away out front in automotive styling, value and performance. New longer, lower Flight-Stream silhouettes mark the entire line . . . from America's lowest-priced, full-sized automobiles, the famous Scotsman series—to the brilliant new President, Commanders, Champions and the famous Golden and Silver Hawks. Graceful Hawk-inspired fins, new grilles and dual headlights set in jet-sweep nacelles give these new cars a dashing appearance, in the best of taste.

Interiors, too, set these '58 Studebakers apart . . . from color-correlated, deeply cushioned upholstery to safety cone steering wheel and Flight-Style instrument panel.

Exclusive variable rate-springs and variable ratio steering for easy handling combine with a new Luxury-Level ride to provide driving comfort unmatched even by cars costing hundreds of dollars more.

All this, plus dependable service, unsurpassed operating economy, and proven resale value make a Studebaker the one automobile that every '58 car buyer should be sure to evaluate!

Visit your Studebaker-Packard dealer today . . . guest-drive the car of your choice . . . drive it home tonight!

BING CROSBY, KATHY GRANT ARE MARRIED

PALM SPRINGS, Calif. (AP) — Bing Crosby, 53, and his new bride actress Kathryn Grant, 23, are honeymooning near here at the singer's palatial ranch.

The couple arrived by plane yesterday after a surprise marriage in Las Vegas, Nev. The 45-minute ceremony was performed by Msgr. John J. Ryan.

The wedding party drove to the Sands Hotel for a post-wedding breakfast. A reporter addressed the bright-eyed bride as "Mrs. Crosby."

"Mrs. Crosby," she sighed. "Say that again."

Bing Is Nervous

A scattering of fans met the Crosbys when their plane landed here. Bing seemed slightly nervous when friends and strangers pushed forward to offer congratulations. The bride stood modestly aside.

Asked how she felt she replied: "Wonderful. Don't I look it?"

Crosby told newsmen he had never seen the new desert mansion to which he was taking his bride.

The singer indicated the honeymoon will be short.

"I've got to get back to Hollywood to tape a radio show on Monday," he said.

Asked whether now, as the wife of one of the entertainment world's wealthiest figures, she intends to continue her acting career, Mrs. Crosby said:

Was Lonely Man

"That's up to my husband."

"She can do anything she wants," said Bing, pecking her on the cheek.

In Hollywood, Bing's brother, Bob, commented that "he needed something like this. Bing was a very lonely man."

Bing didn't tell his four sons or the rest of his family about his wedding plans.

Kathy, a vivacious girl with a degree in fine arts from the University of Texas, has been Bing's most serious romance since the death of his first wife, Dixie Lee, in November of 1952.

She had bit parts in six pictures.

MATERIAL EFFECT — Novel touch to men's fashion show in Paris is achieved by draping three masked models with types of material males will be wearing in the coming season.

Macmillan Believed Urging Joint Aid For Middle East

By WARREN ROGERS JR.

WASHINGTON (AP)—British Minister Harold Macmillan ends his crucial talks with President Eisenhower today on a note, it was reported, of urging a joint economic aid program for the Middle East.

Macmillan has a final afternoon meeting with Eisenhower at the White House before taking off for home. His schedule called for a stop in Ottawa, to talk to Canadian Prime Minister John G. Diefenbaker, en route back to London.

As a luncheon guest, Eisenhower had Paul-Henri Spaak, secretary general of the North Atlantic Treaty Organization. Macmillan, Secretary of State Dulles and British Foreign Minister Selwyn Lloyd arranged to join them at coffee time.

Spaak's presence symbolized American-British efforts to keep the talks, which started Wednesday, from appearing to shut out the other Western allies.

Hope For Joint Statement

There was no definite advance word whether Eisenhower and Macmillan would issue a communique summing up their talks. But it was made clear by officials that the main burden was to seek a way of countering Soviet propaganda and political gains arising from the Reds' scientific advances.

The British are understood to have pressed for delivery of intermediate range missiles (about 1,500 miles). They were promised a supply at the Eisenhower-Macmillan conference in Bermuda last March. But so far none has been delivered because of delays in development.

British dissatisfaction with the Eisenhower plan for the Middle East is no secret. Nor have the Americans made any bones about what they consider the misguided and high-handed British intervention in the Suez Canal zone a year ago.

Nations Pool Efforts

Macmillan is reported to have brought to Eisenhower a suggestion that their two countries pool efforts to give economic aid to the underdeveloped but resources-rich Middle East.

A major goal would be to block the Russian economic offensive in the area.

But the major British concern has to do with science. What the British would like, it is understood, is a kind of international Manhattan Project, the setup with which America produced the world's first atomic bomb.

This, however, is impossible under present American law closely restricting the sharing of atomic secrets.

Eisenhower is expected to ask Congress to ease the restrictions.

The Americans are reported to have expressed interest in learning more about how Britain's atoms-for-peace industry operates. If any swap were in prospect, some officials said, it might involve Britain's peaceful atomic know-how for America's rocket missiles.

No atomic-type legislation curbs the sharing of U.S. rockets.

NEW CABINET MEMBER CLOSE NIXON ADVISER

By ED CREAGH
AP News Analyst

WASHINGTON (AP) — The old Herb-and-Bill firm is going out of business—officially, at least. Now the question being asked hereabouts is: what does this mean for Richard M. Nixon?

The Herb-and-Bill team, of course, is Herbert Brownell Jr. and William P. Rogers. They've been together since Brownell, an old pro in politics, called in up-and-coming young Rogers to help line up delegates for candidate Dwight D. Eisenhower in 1952.

It was a successful combination from the start. Their man was nominated and elected. Soft-spoken, balding Herb Brownell—a fast man with a "no comment"—became attorney general. Handsome, easy-to-know Bill Rogers became his deputy.

Rogers Friend Of Nixon

Now Brownell is quitting to go back to law practice in New York. Rogers moved into the Cabinet job, and that's where Nixon comes in. Rogers long has been Nixon's close friend and adviser. Does his entry into the inner circle help Nixon's chances of being nominated for president in 1960?

It would seem so, on the face of it. A powerful new friend at court seldom hurts anybody. But a couple of questions arise:

1. Rogers says his activities as attorney general will have to do with the government's law business, not with politics. In fact he won't even talk about politics in public, even say whether he's a Nixon man. This is an eyebrow-raising attitude for an attorney general. Most of them have been up to their ears in politics.

Worked For Both Parties

But Rogers—for all his past services to the Republican cause—has a reputation for doing his work nonpolitically. He has worked for both Democrats and Republicans and no complaints of partisanship are on record. Unquestionably he will try to help his friend Nixon behind the scenes. He might be willing to help more actively if he were not the new attorney general.

2. Some of the experts seem to forget that Brownell may have more to say than Rogers does about the 1960 nominee. And Brownell is not on record for or against Nixon. He's not likely to be, either, this far away from 1960. Professional politicians dislike going out on limbs, and Brownell would be the last to deny being a political pro.

Just what the personal relations between Brownell and Nixon are, few people know. There seemed to be a certain stiffness between thm at one time. But that was a long time ago and they have appeared cordial enough toward one another lately.

Now...perfect results every time you

Deep-frying's 100% foolproof with a new Burner-with-a-Brain Gas Range

Any cookbook will tell you if the temperature of the fat goes over smoking point, the flavor of your food is ruined. Yet it can't be too cold or the grease will soak through the food. Now—the new Burner with a Brain keeps the temperature *exactly* right—*automatically!*

You just dial the correct temperature. When it's reached, the GAS flame turns itself down. When you put in your cold, raw potatoes, the flame immediately turns itself up again to increase the temperature of the fat to where it should be.

Only GAS flame can raise the heat so fast that foods don't get a chance to become greasy. Even costly separate deep-fryers aren't fast enough.

So go modern. Get a new GAS range with an automatic top burner. Enjoy perfect French frying, no more burned foods, no more scorched pans, no messy boilovers—no more long hours of potwatching!

Reformation Sunday will be noted in the Adult Department of the Sunday School on October 27 at 9 a.m. A special subscription campaign is now being conducted for The Lutheran, publication of the United Lutheran Church in America.

Girl Scouts Plan Halloween Party

The Girl Scouts of Intermediate Troop No. 45 completed work on their nature badges at the meeting on Wednesday afternoon at the engine house. Plans were made to enjoy a Halloween party in conjunction with the meeting next Wednesday, 3:45 p.m., at the home of Martha Ritter, on Glenwyn Drive. Costume prizes for the ugliest, prettiest and most comical will be given.

The troop leaders, Mrs. John Kump, Mrs. William R. Keefer and Mrs. John H. Flickinger, announced that the girls are invited to attend the dance for the Intermediates and Seniors on Monday, 7 p.m., at the FOE Home. This will be the first of the monthly dances to be held this winter. The group chose the buttercup as the flower crest of the troop. A game period followed the business. Work on another badge will begin at the next regular meeting on Wednesday, November 6, at the engine house.

GIVE WEBELOS BADGES TO FIVE AT CEREMONY

Approximately 150 Cubs Scouts and parents were in attendance at the annual Awards ceremony and Halloween party held for Cub Pack No. 84 on Wednesday evening in the P. O. S. of A. Hall, E. King St., when five boys were presented with Webelos badges, the highest award in Cub Scouting. Recipients were Laurence Altoff, Ronald Benner, James Bowersox, Arthur Byers and Lowry Close. These five boys also received graduation certificates and three-year service stars, together with Charles Crouse, David Herring, and George Basehoar, and were instructed to report to Scoutmaster Edgar A. Wolfe, of Troop 84, at the next regular Scout meeting.

Nine new boys were welcomed into the Pack and were presented with Bobcat pins, with the parents of the boys in attendance to pin the Cub Scout insignia on their boys. The new Cubs are Gerald T. Altoff, Timothy C. Bigelow, Earl J. Black Jr., Allen B. Hartlaub, Kenneth N. Hartsack, Kenneth Mayers, Bernie Noble, James A. Rohrbaugh and Daniel Staley.

Cubmaster Stewart N. Long, assistant Beaven F. Hanlon and Pack Committee Chairman Robert J. Myers presented other awards to the Cubs as follows: Wolf gold arrows, Steven Renner and Jeffrey Crawmer; Wolf silver arrows, Robert Altoff, two, Steven Renner, Thomas Byers, Lynn Clabaugh, William Staley; bear badge, Charles Crouse; bear gold arrow, Larry Conover, Allen Ernst and Robert Horner; bear silver arrows, James Weaver and Robert Horner; lion badges, Larry Altoff, Lowrey Close, William Fuss Spencer Reaver and Paul Bowman; lion gold arrows, Larry Altoff, Lowrey Close, William Fuss and Paul Bowman; lion silver arrows, Larry Altoff, Lowrey Close, William Fuss, Timothy Stites, John Burgoon, Thomas Gingrow and Ronald Ruggles, two.

Certificates For Mothers

Den mothers' certificates of appreciation to those den mothers who are leaving the Pack, were presented to Mrs. Robert J. Myers, Mrs. William T. Gingrow Jr. and Mrs. Richard A. Maitland. Mrs. E. Paul Bigelow, a new den mother, was awarded a den mother's pin.

Announcement was made that several new den mothers are needed in order to properly assign the boys to dens and volunteers from among the mothers of the Cubs themselves or other women in the community were requested to assist by the pack officials. The new boys will be assigned to dens as soon as arrangements can be made. Those boys who will go into Webelos work will be notified by assistant Scoutmaster James P. Hahn, who trains the boys in this phase of Scout work.

The Halloween activities opened with a grand march, with assistant Cubmaster Hanlon at the piano. Judges were Mrs. Richard B. Hartlaub, Mrs. Kenneth Hartsock and Keith Heltibridle. The Cubs receiving prizes for costumes were Gregory Smith as "Sputnik" and Kenneth Mayers, a pig, as the most original; Ricky Maitland, a Mother Goose character, and Steven Renner, a little old lady, the funniest; Neal Leister and Larry Conover, the ugliest. All the boys were given candy bars.

The awards ceremony began with the flag salute, Ronald Ruggles, leading. Brief remarks were made by the Cubmaster and the assistant and the awards were given. Following the ceremony, a peanut scramble was held in three age groups with these winners: Eight-year-olds, Timothy Bigelow, John Hanlon and Lloyd Harner; nine-year-olds, Robert Altoff, Allen Trostle and Lynn Slabaugh; ten and eleven-year-olds, Timothy Stites, Edward Ruggles and Ronald Benner. Ice Cream and orange drink were served.

There will be a meeting of the Cub Scout officials and den mothers at 7:30 p.m. on Monday, at the American Legion Home, to make plans for the next few month's activities.

PLAN FOOD SALE

The Woman's Community Club of Littlestown and Vicinity will hold a food sale on Friday, November 1, starting at 3:30 p.m., in the Alpha engine house Arrangements for the event are in charge of the club finance committee, which includes Mrs. Joseph R. Riden, chairman, Mrs. Carroll E. Arter, Mrs. Walter F. Crouse, Mrs. Rchard A. Maitland, Mrs. Robert H. Miller, Mrs. John N. Sell and Mrs. Mabel Wilkins, and who will contact the club members concerning donations for the sale.

PARISH WOMEN PLAN FOR PARTY; HOSPITAL GIFT

Plans for sponsoring important future events were furthered at the October meeting of S. Aloysius Parish Council of Catholic Women Wednesday evening in the parish hall. Mrs. Thomas French, president, presided.

The annual Halloween party for the children of the parochial school will take place on Wednesday afternoon in the parish hall, when there will be prizes for costumes and refreshments will be served to all the children. The committee in charge of arrangements includes Mrs. Francis Prato, Mrs. Dniel Dietrick, Mrs. Albert Ozminski, Mrs. George P. Smith, Mrs. George Ernst, Mrs. John R. Rudisill, Mrs. Kenneth Stuller, Mrs. Clyde H. Rohrbaugh and Mrs. Robert J. Ekenrode.

The pastor, the Rev. Fr. William A. Boyle, spoke briefly explaining that a joint meeting of the men and women of the parish will be held on Monday at 8 p.m., in the parish hall to make plans for the annual three-day Thanksgiving supper and bazaar. The women are asked to go ahead of the meeting time in order to wash the dishes and clear the kitchen cupboards. Details concerning various phases of the bazaar and suppers will be decided upon at the joint meeting and preliminary discussions took place at the Wednesday sessions.

All those who served on the Villa Vianney solicitation committee, are asked to again contact the parish families, requesting donations of non-perishable foodstuffs or cash, for the Harvest Home party to be held in honors of the Sisters of Mercy on Sunday, November 3, at 1:30 p.m., in the parish all. There will be a program presented by the children of the school, under the direction of the Sisters, in cooperation with Marie Budde, chairman.

A pledge of $120 was voted to the Warner Hospital, Gettysburg, building fund drive, to be paid over a period of three years. It was decided to present a gold Miraculous Medal to each new baby born to a mother in the parish in the future. The president spoke briefly on the Conewago Deanery Council meeting held in Chambersburg on Sunday, attended by Mrs. Paul E. Altoff, deanery publicity chairman, and herself.

It was announced that the annual offering for the Bishop's Fund for Diocesan Needs will be received on Sunday, November 17, following the morning masses at St. Aloysius Church, by a committee of women from the Parish Council. It was also announced a member, Mrs. James P. Smith, is ill at her home on Lumber St. All members are requested to pray daily for vocations in the diocese. The guess package, contributed by Mrs. John Busbey, was received by Mrs. John L. Redding. At the conclusion of the meeting, refreshments were served by the October hostesses, Mrs. Thomas French, chairman.

The next meeting has been advanced from November 27, the regular meeting night, to Thursday, November 21 and the following committe will be in charge; Mrs. Z. W. Sanders, Mrs. Kenneth Stuller, Mrs. Urban Beford, Mrs. Roger Page, Mrs. Lester Redding, Miss Helen Dillman, Mrs Paul Bunty, Mrs. George Ernst, Mrs. B. Roy Kebil and Mrs. Charles Marker.

TO CONDUCT DEVOTIONS

Members of the Littlestown Ministerium will be in charge of the daily morning devotions over radio station WHVR, Hanover, from 8:30 to 8:45 a.m. during the coming week. The following schedule has been arranged: Monday the Rev. Rodney T. Yates, pastor of Centenary Methodist Church, will speak; Tuesday, the Rev. William C. Karns, pastor of St. John's Lutheran Church; Wednesday, the Rev. David S. Kammerer, pastor of St. Paul's Lutheran Church; Thursday, the Rev. G. Howard Koons, pastor of Christ United Church of Christ, and president of the Ministerium; Friday, the Rev. Louis J. Hammann, pastor pro tem of Redeemer's United Church of Christ.

News Briefs

Mrs. Arthur Burr, near town, along the Gettysburg Rd., will be hostess to the Littlestown Homemakers for a meeting at 7:30 p.m., Monday. Mrs. Walter F. Crouse and Mrs. Erwin A. Rebert will be in charge of presenting the program on the topic "Christmas Breads."

The first fall dance for the Intermediate and Senior Girl Scout troops of the community will take place at the Eagles Home, W. King St., on Monday evening at 7 o'clock. Light refreshments will be served at the conclusion of the evening. This entertainment is being made possible through the courtesy of the Littlestown FOE.

Kingsdale Volunteer Fire Company No. 1 will hold its October business session at 7:30 p.m. Monday in the engine house, along the Littlestown-Taneytown Rd. The evening's social committee consists of Claude Gerrick and Fred Gerrick.

Littlestown Spotters of the Ground Observer Corps will hold their monthly business meeting at the engine house on Monday at 7:300 p.m.

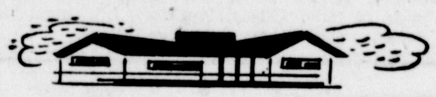

Brownie Scout Troop N. 61 will enjoy a Halloween party in connection with the weekly meeting tomorrow morning at 10 o'clock in the Apha engine house.

Rally Day will be observed on Sunday in St. Luke's United Church of Christ, near White Hall, on Sunday morning during the 9:15 a.m. Sunday School hour. Dr. A. Nevin Sponseller, a former member, will be the guest speaker and will also deliver the sermon at the 10:30 a.m. worship service.

BELIEVE YANK ROCKET SOARED 4,000 MILES UP

WASHINGTON (AP) — Air Force officers who conducted project "Far Side' expressed belief today that one of the rockets launched from a balloon went slightly more than 4,000 miles into space.

Under questioning at a news conference, they also conceded that "technologically" it might be possible to use somewhat the same balloon-rocket system for sending a rocket to the moon within a year.

But they insisted that this had not been the purpose of the six tests in Far Side, a series of experiments in the Pacific.

May Be More

Col. Eugene C. la Vier, one of the men who conducted the experiments at Eniwetok Atoll, told newsmen he would guess that the 4,000-mile level might have been surpassed "by a few hundred miles."

But he and Col. William H. Bowers insisted that exact data still is being compiled. Until it is complete, they said, there can be no precise height given.

The two colonels gave their replies about altitude reluctantly, repeating again and again that the figures still are being tabulated.

LANCASTER LIVESTOCK

Sign Union Pact, Now Faces Second

CAMDEN, N. J. (AP) — R. M. Hollingshead Corp. yesterday announced settlement with one striking union, but another was yet to vote on a similar agreement.

The plant, which makes automobile polishes, waxes and greases, shut down Oct. 16 after 450 workers walked out.

Hollingshead said a 2-year pact providing a package 19½-cent increase for laboratory workers was accepted by Local 572, International Chemical Workers, AFL-CIO. Previous wage rates were not announced.

The other union, Local 22130, Automotive Chemical Products Union, will vote later on similar terms, the company said.

PTA WILL MEET

The New Oxford Parent-Teacher Association will meet Monday evening at 8 o'clock in the grade school there with a program on "You and Your School Director" to be conducted by Clyde O. Garber, president of the board of school directors for the New Oxford Joint School district. Parents are invited to attend. The membership drive is continuing.

EXECUTIONER SHOT TO DEATH

NEW YORK (AP) — Albert Anastasia, gangland chieftain, was shot and killed today by two masked men in a hotel barber shop.

The gunmen pumped three bullets into Anastasia as he sat in a barber chair at the Hotel Park Sheraton in the heart of Manhattan.

The men then fled along W. 55th St. by automobile.

Identification was made by a brother, Anthony (Tough Tony) Anastasia, Brooklyn dock boss, who left weeping after viewing the body.

Anastasia, one of gangland's top figures for many years, was reputed to be the chief executioner for the old Brooklyn kill-for-pay ring, Murder, Inc. He had been implicated in at least 31 murders.

The killing took place about 10:20 a. m.

Scores of police immediately swarmed into the hotel and kept everyone out of the barber shop. However, Anastasia's body for a time could be seen through glass doors of the shop.

The Park Sheraton, formerly the Park Central Hotel, was the scene of another murder a generation ago—that of gambler Arnold Rothstein.

Lived Charmed Life

The hotel is at 7th Ave. and 55th St.

Anastasia, 53, has lived a charmed life—until today. He beat five different murder charges, as well as an attempt on his life six years ago.

After the 1951 attempt to kill him, the New York Anticrime Committee reported that he had been ordered to get out of town or face gangland execution.

Police at the scene declined to give immediately any details except that the dead man had been seated in a barber chair.

The barber shop was cleared of everyone except police. Through the shop's glass doors reporters could see the body of the black-haired victim on the floor. The victim lay on his back.

QUESTION 3 IN GEM ROBBERY

DOYLESTOWN, Pa. (AP) — Three Philadelphians arrested in connection with a $15,000 Chester County jewel robbery were questioned last night about seven Bucks County burglaries.

State police said the three—John C. Picieczko, 24; Robert Hawthorne, 23; and Robert P. Stratton, 20—admitted seven daylight burglaries neeting some $5,000 in loot.

The three men were held for a further hearing by Justice of the Peace James H. McQueen of nearby Thorndale.

They were arrested Monday in Westtown Township. Jewelry found hidden near a gutter-clearing project near the scene of their arrest were identified as part of the $15,000 loot taken from the home of Russell S. Stoughton, retired bus company executive, on Oct. 15.

State police said further investigation led to the three being implica'ed in the seven burglaries in central and upper Bucks County, the largest hau' was at the home of Mrs. Eleanor Stephenson in Spring Valley near Buckingham, where an estimated $',000 worth of jewelry was taken Oct. 14.

Wants To Raise Another Champion

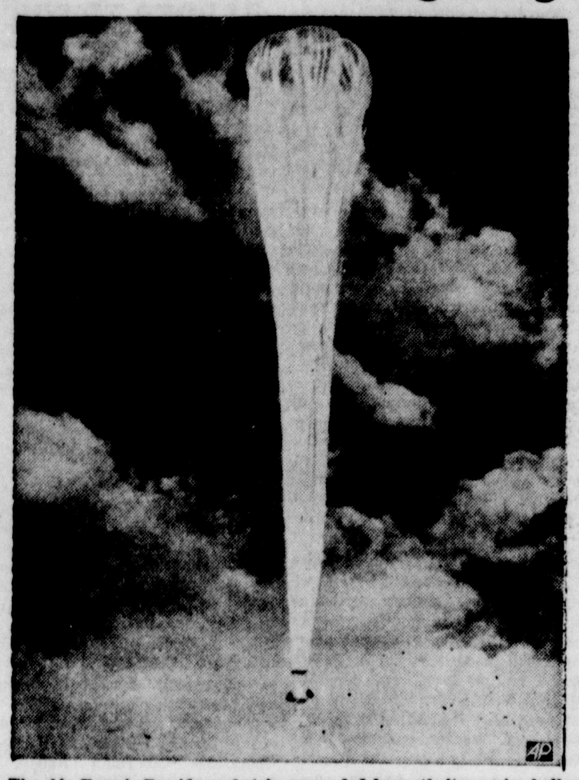

PITTSBURGH (AP)—Jack Decker, 17-year-old 4H Club member from Centre Hall R. 1 whose purebred Black Angus was named grand champion steer of the Pittsburgh Junior Livestock Show, plans to use money from sale of the animal to raise another possible prizewinner.

Decker's 1,750-pound Angus "Shorty," sold at auction yesterday for 69 cents a pound, or a total of $810.75. The animal was purchased by Kroger Co., a grocery firm.

The price for Shorty fell far short of $1.50 a pound received last year's grand champion steer.

Decker also won the Angus breed showmanship honors.

Headed For The Firing Range

The Air Force's Farside rocket is suspended beneath its carrier balloon as it rises over Eniwetok Atoll in the Pacific to a launching altitude of 100,000 feet. The photograph was released in Washington Thursday by the Department of Defense. After reaching launching altitude the rocket is fired straight up through the balloon. Successfully launched Oct. 21 the missile reached a height of between 1,000 and 4,000 miles.

Boxer Tippy Larkin Hurt In Collision

PARAMUS, N. J. (AP) — Boxer Tippy Larkin was injured and another man was killed early today in a head-on auto collision.

Police Chief Carl W. Jockish said Larkin was driving south in the northbound lane of the highway and crashed into a car driven by Thomas McDonough, 29, of Ridegwood. McDonough was killed.

Larkin, 40, was taken to Valley Hospital in Ridegwood with a broken left leg and multiple rib fractures.

A third motorist, William A. Stagg, 27, of Allendale, driving behind McDonough, piled into the wreckage and suffered bruises.

Larkin, whose real name is Anthony Pelleteri, lives in Garfield.

The lion became Columbia University's official symbol in 1910 when it was adopted by the College Student Board.

GOOD BUSINESS IS ANTICIPATED FOR NEXT YEAR

HOT SPRINGS, Va. (AP)—Softening of the business boom and a letup of inflation were foreseen by top industrial executives meeting here today with Secretary of Commerce Weeks.

Members of the Commerce Department's Business Advisory Council agreed generally that business is leveling off and that 1958, with possible minor ups and downs, will average out "about as good as 1957."

In talking privately with reporters, none used the word "recession." Some suggested the lull as "healthful," and few saw ill omens in the recent sinking spells of the stock market.

Several of the industrialists thought business activity might dip slightly after the yearend holiday rush, before resuming an upward march that has characterized the past 2½ years.

The council scheduled a closed door, round robbin discussion of the business outlook with Weeks and other officials including Chairman Raymond J. Saulnier of President Eisenhower's Council of Economic Advisers.

Vice President Nixon was invited to deliver an off-the-record talk tonight.

The government values the economic appraisal of the BAC, for its membership includes the heads of more than 100 of the largest U.S. corporations. Eugene Holman, board chairman of Standard Oil Co. (New Jersey), is BAC chairman. T. V. Houser, board chairman of Sears, Roebuck & Co. heads the council's economic policy committee.

Huge Output

Houser, it was learned, brought to the session a report estimating that national output in 1958 will approximate 445 billion dollars.

Over-all, the picture of 1958 drawn for BAC is one of fairly stable prices, slowly rising consumer income and retail sales, a weakening in some manufacturing industries but a rise in others, a gain in housing construction, and a decline in federal spending offset by a rise in state and local government outlays.

Daylight Time Ends On Sunday

By THE ASSOCIATED PRESS

Daylight sacing time will end at 2 a.m. Sunday in the northeastern section of the country and a few other areas. The time then reverts to 1 a.m.

Other sections employing daylight saving time went back to standard time Sept. 29.

Last to drop it this year are New England, New York, New Jersey, Delaware, the District of Columbia, parts of Ohio, Illinois, Maryland, Indiana and Pennsylvania; and the cities of St. Louis, Mo., and Louisville, Ky.

Fifteen central Kentucky communities, including Lexington and Frankfort, will retain "fast time" the year round.

DEATHS

PALACIOS, Tex. (AP)—Brig. Gen. Harry Hulen, 71, decorated veteran of World War II, died Wednesday. Hulen, a brother of the late Lt. Gen. John A. Hulen, organized the 347th Engineers early in World War II.

BRADFORD, Pa. (AP)—Forest D. Dorn, 63, board chairman of Forest Oil Corp., Bradford oil and gas producers, died Thursday. The firm has interests in 15 states, Canada, Columbia and Cyprus.

SCANS $30 DAY EXPENSE ITEM

HARRISBURG (AP)—Depty. Aud. Gen. Alfred T. Novello lifted an eyebrow today at a $30-a-day expense account for hotel accommodations for Secretary of Banking, Robert L. Myers Jr., but didn't say he would refuse to pay it.

Novello said that Myers turned in an expense account for $126 for four nights at a New York hotel while attending the convention of the National Assn. of Supervisors of State Banks.

Cabinet members are exempt from travel regulations for state officials below cabinet rank. The regulations place a limit of $7 a day for hotel rooms in Philadelphia and Pittsburgh and $6 elsewhere in the state.

Asked if he was considering refusal to reimburse Myers, Novello replied: "I'm not going to reject his account in the sense that I will refuse to pay it. But I certainly think it is right to ask him to justify incurring expenses in these amounts."

Myers said the hotel charges were minimum rates for a bedroom and sitting room, adding:

"It is necessary to have accommodations that admit of room to mee' in conference with other members of the association. We have many committee meetings and group meetings and it is advisable to have those accommodations which I had."

BREEZY WAVE SWEEPS EAST TO ATLANTIC COAST

Cool, windy and dry weather covered the major part of the nation today. Rains which have pounded broad areas for several days diminished in most places.

The cold air moved eastward to the Atlantic Coast during the night and nearly all sections, except southern Florida, felt the chill of the huge mass of breezy weather.

The center of the cold air was in North Dakota where temperatures were under 20 degrs and near zero in some places. However, they were in the 30s in the northern Rockies, the Central Plains and the Great Lakes region.

The temperature rise continued gradually in all directions into the 40s and 50s and up to the 60s near both coastal areas and the extreme southern sections of the country.

There were only a few wet spots. Scattered showers sprinkled areas in the northern Appalachians and in Illinois. The precipitation on the East Coast that preceded the leading edge of the cold air moved out to the Atlantic in most areas.

Light snow fell during the night from Wyoming through Nebraska, Colorado and Kansas, with snow turning to showers in the south and extending into the Texas panhandle.

Light rain fell in parts of Washington and Oregon.

Stiff northerly winds were expected to continue during the day in most of the eastern half of the country. Cooler weather was the outlook in the Atlantic and Gulf Coast states as well as in Oklahoma and Texas.

Clear skies were indicated in the Southwest, with some clearing in the Northern Plains.

FRENCH STRIKE MOST SERIOUS IN MANY YEARS

By GEORGE MCARTHUR

PARIS (AP)—A nationwide strike gripped France today in the midst of what newspapers called the most serious political crisis since World War II.

All the big unions except the socialist Workers Force were called out to protest the high cost of living and to demand more pay.

The nation s transportation network was badly crippled. Workers in heavy industry, metal plants, shipyards and docks stayed away from their jobs. Almost every segment of the French economy was affected.

Many of the striking workers milled about in the streets. Reinforced patrols of security police stood by in case of trouble.

One Worker Killed

One worker was killed yesterday and a hundred injured, most of them slightly, in a battle between shipyard strikers and police at the Atlantic port of St. Nazaire. The clash there followed almost a month of rotating wildcat work stoppages.

There were signs the massive labor protest might help the divided National Assembly to agree on Socialist Guy Mollet as France's 24th postwar premier.

Mollet's chances to win Assembly approval were bolstered by a decision of the Catholic Popular Republicans (MRP) to support him. He already had the backing of his own Socialist party, the (moderate) Radical Socialists and some splinter groups.

These should give him enough Assembly votes to form a government — barring the ever-present possibility in France of a shift in political winds.

Second In 10 Days

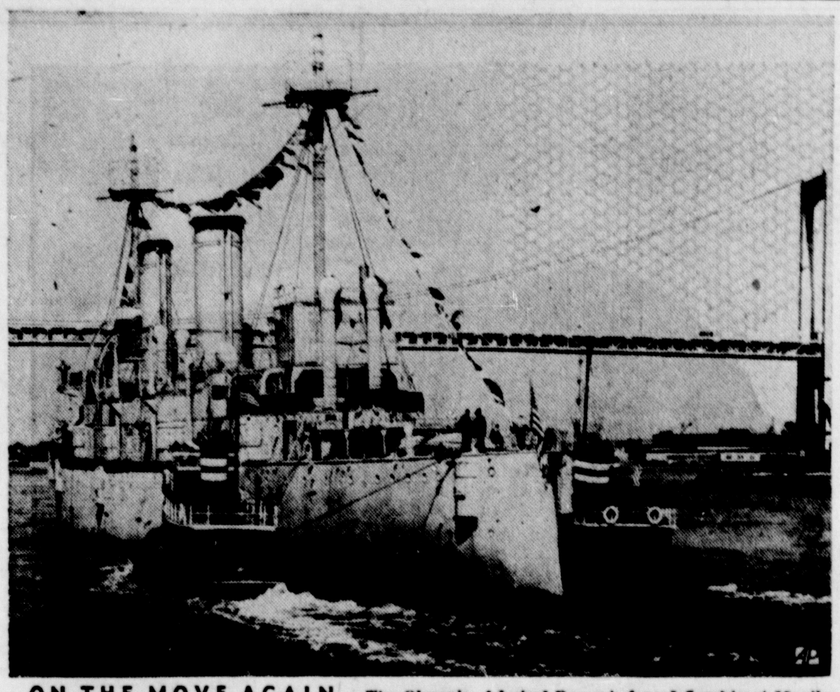

The strike today was France's second big labor trouble in 10 days. Utility workers walked out for 24 hours last week, shutting off gas and electricity. Those services seemed to be holding up normally this time.

The important auto industry was functioning at a near-normal rate.

Most train crews quit, but the nationalized railroads managed to send at least one train from Paris to each major provincial city. About half the huge suburban train network in Paris was functioning normally and 80 of the 400 subway trains were running. Many passengers stayed away, however, fearing a complete halt. City streets were littered with garbage left uncollected by strikers.

Heavy fog combined with a strike of weather forecasters and customs agents to hamper air travel through Paris.

Trans World Airlines ordered its planes coming across the Atlantic to fly on to Rome.

ON THE MOVE AGAIN — The Olympia, Admiral Dewey's famed flagship at Manila Bay, is towed under Walt Whitman bridge on Delaware river to Philadelphia dock for extensive overhauling. Ship will be berthed in Philadelphia as memorial to the Spanish-American War.

SOLUTION OF LITTLE ROCK'S BATTLE LOOMS

LITTLE ROCK, Ark. (AP)—Chances of a solution to the Central High School integration dilemma appeared somewhat brighter today.

Gov. Orval Faubus has revealed that "certain moves" are being made which could result in mediation of the federal-state deadlock.

Previously, Faubus had said that only the withdrawal of the nine Negro students who attend the 2,000-pupil school could end the crisis.

A definite sign of reduced tension is the new Army policy of allowing the three Negro boys and six girls to cross the campus without a military escort.

Army and school officials said yesterday that if all went well six soldiers now on guard inside Central High might be pulled out, although troops still would remain outside the building.

Chance For Change

In his statement about mediation yesterday, Faubus gave no details and declined to say who was making the moves. He said only that he was taking no part in them.

The governor said certain factors led him to hope there was "a definite possibility of a change in the attitude of the (Eisenhower) administration" and that something might develop in a week or 10 days.

In a news conference yesterday, the governor declared that U.S. Atty. Gen. Herbert Brownell was chiefly responsible for the Eisenhower administration's decision to send federal troops into Little Rock to enforce integration.

SEVEN DESSERT QUEENS COMPETE

HARRISBURG (AP) — An apple desert baking contest will be held Saturday in York as part of Pennsylvania's observance of Apple Week.

Seven regional desert champions will vie for the top honor in the contest at which a champion will be named to represent 25 counties of Pennsylvania.

Each is a county champion and was selected as a regional representative in seven semi-final contests during the past week.

The final bake-off is sponsored by the State Horticultural Assn. and the Homemaking Education Division of the State Department of Public Instruction.

Girls in the championship contest include:

Patricia MacPherson, Warren County; Maralyn Rose, Waynesburg; Sheryl Hostetler, Richland Township, Johnstown; Carolyn Starner, Mechanicsburg R. D.; Nancy Graybill Manheim; Joan Kent, Downington, and Rida Clark, Conneaut Lake.

THREE WORKERS DIE IN CAVEIN

BUFFALO, N. Y. (AP) — Three highway construction workers died yesterday when a rain-soacked wall of a ditch collapsed. Two others were injured.

The cave-in occurred as the men shored a 10 to 12-foot-deep excavation on a Niagara Thruway construction project.

Fellow workmen rescued the two injured men who were only partially buried.

Killed were Raymond M. Kissell, 30, of Lackawanna; Santo J. Lobello, 32, of Buffalo, and Willie Benton, 35, also of Buffalo.

Injured were John Mitchell, 45, of 529 Center St., Freeland, Pa., a foreman, and Constantino Franco, 77, of Buffalo.

They were reported in fair condition at local hospitals.

Scene of the tragedy was on Buffalo's west side, where the thruway runs north along the Niagara River toward Niagara Falls.

CANNOT QUELL DISTURBANCES IN GUATEMALA

By RICHARD G. MASSOCK

GUATEMALA (AP)—Guatemala's new military government negotiated today for an end to continuing street demonstrations by supporters of a presidential candidate who claims he was robbed.

The so-far-unsuccessful candidate, retired Gen. Miguel Ydigoras Fuentes, was no more satisfied with the military takeover than he was with the announced results of Sunday's election giving the presidency to the government candidate, Miguel Ortiz Passarelli.

Ydigoras demanded that the junta summon Congress to install 2nd Vice President Guillermo Flores Avendano as acting president and that Congress then schedule a new presidential election.

Continue Demonstrations

Ydigoras supporters demonstrated before the National Palace last night for the fourth straight night. The three previous turnouts protested the announcement of Ortiz' victory. Last night's protested the military takeover.

Ydigoras said in a broadcast the demonstrations would continue until constitutional government was restored. An ultraconservative, he carried Guatemala City by a sizable margin but claimed government chicanery tricked him out of the deciding country vote.

After the earlier demonstrations, during which two persons were killed, Army officers nullified the election results and yesterday named a junta of three young colonels to take over the government. Acting President Luis Arturo Gonzalez, the first vice president who stepped up at the assassination July 26 of President Carlos Castillo Armas, resigned in favor of the Army.

Seeks Solution

Col. Oscar Mendoze Azurdia, chief of the junta, said it had no political preferences but only was seeking a legal solution which would restore constitutional government. A major factor reportedly was a desire to get a government which the United States would recognize.

Mendoza assured a news conference that the junta was anti-Communist.

A charming picture of a lovely little girl reaching for a Bible. What could possibly be wrong with that?

Here's what!

1. The Bible is on the bottom shelf, hard to get at, which means the family doesn't use it frequently.

2. The Bible she's reaching for is written in grown-up language, too hard for her to understand all by herself.

3. The little girl is alone—and she needs help!

Why should the Bible be on the bottom shelf, and why should this little girl have to seek its truth by herself?

The Church stands ready to help your child—and you! It will help you to understand the Bible and its timeless message of God's undiscourageable love for you, your children and all mankind.

THE CHURCH FOR ALL . . . ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

Day	Book	Chapter	Verses
Sunday	John	5	30-47
Monday	1 Timothy	4	1-8
Tuesday	2 Timothy	3	10-17
Wednesday	2 Timothy	4	1-8
Thursday	Hebrews	4	9-16
Friday	2 Peter	1	16-21
Saturday	Revelation	22	17-21

Sunday School Lesson

By H. R. and M. C. Gold

THE PROBLEM OF CHRISTIAN FREEDOM

Key Verse: No temptation has overtaken you that is not common to man. God is faithful, and he will not let you be tempted beyond your strength, but with the temptation will also provide the way of escape, that you may be able to endure it. I Corinthians 10:13.

This lesson centers around the use or abuse of personal liberty. In a democracy where freedom is cherished as a right of every individual, the aspects of personal freedom are debated widely. These "human rights and fundamental freedoms" are protected by the United Nations and defined by the Universal Declaration of Human Rights.

Personal freedom does not give an individual license to do anything he wishes; it imposes a responsibility on the individual. Christian freedom goes a step further, for it involves the principle of love over personal liberty. "The original doctrine of Christian love, as Jesus taught it in his sayings and parables, received not only an application, but also a new development in the consciousness of the apostolic churches when the Apostle Paul experienced and moulded their life."

Paul's Interpretation

Paul's interpretation of Christian freedom in I Corinthians came as the result of questions and problems arising in the church at Corinth. The new converts were disturbed about certain customs and practices which arose from the pagan society in which they lived. The more sophisticated and intellectual members scoffed at the more ignorant who took seriously the matter of eating meat which had been offered to idols. Paul cautioned them that "religion is not knowledge about God but knowing and sharing His loving nature." He reminded the sophisticates that "knowledge puffs up, but love builds up." Superior knowledge acts as a barrier between members of the church. Real knowledge brings humility and thoughtful consideration of the problems of others. "But if one loves God, one is known by him."

Paul's first teaching, then, is loving consideration for our fellow members. We must set an example which will help guide the members who are "weak." Weak does not mean the physically weak, but those who are new in the faith and who are still influenced somewhat by the idolatrous community in which they live. They need encouragement and guidance, not criticism. Paul tried to teach the Christian truth that each believer has a personal moral responsibility for the faith of his fellow believers. This is Christian freedom in the highest sense.

Sacrifice Personal Whims

If we find that our personal habits or indulgence have a bad effect upon our fellow members, it is our duty to sacrifice personal whims or desires for the sake of the salvation of others. "Therefore, if food is a cause of my brother's falling, I will never eat meat, lest I cause my brother to fall." If we practice a personal freedom which tempts others or is misunderstood, it is wrong. The all-embracing love which limits freedom in the interest of the whole congregation is real Christian freedom.

The church at Corinth was no different from congregations today who are divided between "conservatives" and "liberals." Paul happened to agree with the practice of the "conservatives" and with the theory of the "liberals." When reduced to practical experience the question to be answered was, to what extent may a Christian participate in the heathen society around him? Even in western lands today the problems of social drinking, certain recreations in which there are strong moral temptations affect the Christian very seriously.

Jesus established personal freedom and the right to choose. Shall we use it for His glory or shall we abuse it? The true goal of freedom should be to limit our own freedom in the interest of all of our fellow believers. In this manner we achieve a higher kind of freedom — a desire to bring all men to the knowledge and saving love of God.

MARKET EASES BACK

NEW YORK (AP)—The stock market eased back quietly in early trading today after its wide gyrations earlier this week.

Key stocks took losses ranging from fractions to around 2 points. There were a few small gainers

The opening was active and the ticker tape once more was late in reporting transactions, as it has been every day this hectic week. Today's delay lasted only a couple of minutes, then turnover became very slow. Subsequently, trading picked up with prices declining.

LEGAL NOTICES

NOTICE

Notice is hereby given that on November 4, 1957, at 7:30 o'clock p.m., the Borough Council of the Borough of Bendersville, Adams County, Pennsylvania, will hold a meeting at The Bendersville National Bank, Bendersville, Pennsylvania, at which meeting the following ordinance will be proposed for enactment. The tax referred to in said ordinance is being imposed because of the need of additional revenue resulting from increased costs of operation. The amount of revenue estimated to be derived from said tax is $24.00.

AN ORDINANCE LEVYING AND ASSESSING A TAX FOR GENERAL REVENUE PURPOSES OF THE BOROUGH OF BENDERSVILLE, ADAMS COUNTY, PENNSYLVANIA, ON THE USE OR OCCUPANCY OF A HOUSE TRAILER SUITABLE FOR LIVING QUARTERS WITHIN SAID BOROUGH, PRESCRIBING THE METHOD AND MANNER OF PAYMENT AND COLLECTION OF SAID TAX AND IMPOSING PENALTIES FOR VIOLATION.

Be it enacted and ordained by the Burgess and the Borough Council of the Borough of Bendersville, Adams County, Pennsylvania, and it is hereby enacted and ordained by the authority of the same as follows:

SECTION I: A tax is hereby levied and assessed for general revenue purposes of the Borough of Bendersville, Adams County, Pennsylvania, of Two ($2.00) Dollars per month on the use or occupancy of a house trailer suitable for living quarters within said Borough, provided, however, that no such tax shall be levied and assessed for the first thirty (30) days in which such a house trailer is located within said Borough.

SECTION II: The tax imposed under Section I shall be paid by the adult person or persons deemed by the Borough Council of the Borough of Bendersville, Adams County, Pennsylvania, to be the head of the family using or occupying such house trailer.

SECTION III: The tax imposed under Section I shall be paid to the tax collector of the Borough of Bendersville, Adams County, Pennsylvania, on March 31, June 30, September 30 and December 31 of each year or portion of a year during which a house trailer suitable for living quarters is used or occupied within said Borough. The amount of tax due and payable on each of the aforesaid dates shall be the tax imposed for the month in which such payment is due and payable and the tax imposed for the two months immediately preceding the same.

SECTION IV: If the tax imposed by this ordinance is not paid when due, there shall be added as part of the tax interest at the rate of six (6) per cent per annum from the time when the tax became due until the same is paid.

SECTION V: Any person required under this ordinance to pay the tax imposed by this ordinance who willfully fails to pay such tax, any any person who willfully attempts in any manner to evade or defeat the tax imposed by this ordinance or the payment thereof shall, upon conviction before any Justice of the Peace, be fined not more than Twenty-five ($25.00) Dollars, together with the costs of prosecution, and in default thereof shall be sentenced and committed to the county jail for a period not exceeding twenty-five (25) days.

SECTION VI: This ordinance is enacted under the authority of the Act of June 25, 1947 (Pamphlet Laws 1145), and its amendments.

SECTION VII: If any section, provision or part of this ordinance shall be held unconhtitutional, illegal or invalid, such unconstitutionality, illegality or invalidity shall not affect the validity of the remaining sections, provisions or parts of this ordinance.

SECTION VIII: This ordinance shall take effect on the 4th day of December, 1957.

Enacted and ordained as an ordinance this 4th day of November, 1957.
PARKER L. KUNTZ
President of Borough Council
ATTEST:
CLYDE P. ORNER
Secretary of Borough Council
Approved this 4th day of November, 1957.
LEIGHTON C. TAYLOR
Burgess

AN ORDINANCE IMPOSING A TAX ON THE USE OR OCCUPANCY OF HOUSE TRAILERS IN THE BOROUGH OF YORK SPRINGS, ADAMS COUNTY, PENNSYLVANIA

BE IT ENACTED AND ORDAINED by the Burgess and Borough Council of the Borough of York Springs, Adams County, Pennsylvania, and it hereby is enacted and ordained by authority of the same as follows:

Section 1: A tax hereby is imposed, assessed and levied for general revenue purposes on the use or occupancy of each house trailer suitable for living quarters at the rate of $2.00 per month beginning on the 31st day after said trailer is placed or installed in any trailer camp or parking lot or other location in the Borough of York Springs so used or occupied.

Section 2: Said tax shall be due and payable to the Burgess on the First day of June of each year, provided, however, that in the event said house trailer is moved from the trailer camp or parking lot or other location to another location in the Borough or in the event it is removed from the Borough or its use and occupancy ceases, the accumulated tax shall forthwith become due and payable.

Section 3: If any tax or installment of taxes levied in pursuance of this ordinance shall not be paid within thirty (30) days from the date it becomes due and payable, a penalty of ten per centum of the amount of the tax due and unpaid shall be added thereto.

Section 4: The Burgess hereby is authorized and empowered to collect the taxes imposed, assessed and levied hereunder by suit or otherwise as permitted by existing law.

Section 5: This ordinance is enacted under the authority of the Act of June twenty-fifth, one thousand nine hundred and forty-seven (Pamphlet Laws 1145) and its amendments.

Enacted and ordained into an ordinance this 7th day of October, 1957.
J. ASTON CHORLEY
President
ATTEST:
(MRS.) JUNE L. RHOADS
Secretary
Approved this 7th day of October, 1957.
E. S. MYERS
Burgess

I, June L. Rhoads, do hereby certify that I am the duly elected, qualified and acting Secretary of the Borough of York Springs, Adams County, Pennsylvania; and I do further certify that an ordinance, of which the foregoing is a true and correct copy, was duly enacted by the Borough Council of the Borough of York Springs at a stated meeting thereof held October 7, 1957, at which meeting a quorum was present and voting, and was approved by the Burgess, and the same has not been repealed or amended; and I do further certify that prior to the enactment of said ordinance, notice of the intention to adopt the same was duly given in accordance with Section 1 of the Act of May 6, 1955, P. L. 39.
(MRS.) JUNE L. RHOADS
(SEAL)

FAMILY CHANGING NAMES

SANTA MONICA, Calif. (AP)—Louis Gendre wants permission to adopt the name he has become known by — Louis Jourdan.

And his wife, Berthe, would like to take the name of Quique Jordan, the 36-year-old actor said in a petition to the Superior Court yesterday. He was born in Marseilles, France.

The couple wishes to name their 6-year-old son Louis Henry George Jourdan, the document added.

Two Bank Robbers Use Planes And Car To Escape; Arrested

TAMPA, Fla. (AP)—Two bandits, using a fast shuttle of planes and automobiles, robbed the First State Bank of Fort Meade of $26,657 at gunpoint yesterday.

One man was arrested at a Tampa airport and another in an auto accident several hours after the robbers released a captured constable and escaped in a running gunfight with pursuers.

Sheriff Ed Blackburn said Irvin Suits, 26, arrested in a car mishap, admitted he took part in the holdup and named Donald J. Thompson, 32, as his companion.

Thompson denied any knowledge of the crime.

Suits confessed after several hours questioning and identification by three witnesses that he and Thompson had planned the holdup and practiced the plane maneuvers. Suits was reported ready to lead police to the place the money was hidden.

One Is A Pilot

Thompson is a pilot for a Tampa construction firm. He was arrested at Tampa IInternational Airport as he returned a Cessna airplane belonging to the firm and matching the description of one used by the bandits.

Suits, a Tampa airplane broker, was picked up after his car was involved in an accident in Tampa In the car were two pairs of coveralls similar to those worn by the robbers.

Polk County Judge Chester M. Wiggins charged the men with armed robbery and auto theft. Fort Meade is in southern Polk County, about 35 miles southeast of Tampa.

Federal authorities also planned to give the men a hearing before U.S. Commissioner Morison Buck here today on charges of violating the Bank Robbery Act.

Air Pilot Sails

Two planes were involved—the Cessna and an Aeronca stolen at Gilbert Field in Winter Haven by one of two men who flew to the field in the Cessna.

Apparently the men separately flew the planes to a small field at Plant City, went together in the Aeronca to Fort Meade, returned to Plant City after the holdup, left the Aeronca there and flew the Cessna back to Tampa.

ADVERTISE IN THE TIMES

Insurance Firms To Refund $700,000

PHILADELPHIA (AP)—The State Insurance Department has ordered 11 insurance companies writing auto collision policies to refund more than $700,000 to 25,707 car owners in the state.

Deputy Commissioner Bernard J. Kelley, head of the department's Bureau of Examination here, said yesterday that policy holders affected had been charged at Class 2 rates instead of Class 1. The Class 1 rates are for drivers over 25 and are less expensive.

Kelley said the average check to policy holders was about $30 but that some refunds ran as high as $134.

You can use either a teaspoon of vanilla or a half teaspoon of grated lemon rind and one teaspoon of lemon juice to flavor a four-egg sponge cake.

HI-FI EXPLAINED

DIAMONDS have literally leaped off the third finger and placed themselves between the record grooves. Advertisements read: "There is no permanent phonograph needle;" "Do you value your records?" and "Give your records the diamond touch." This has brought varied reaction. The old-timer has laughed and said, "So much foolishness; why I can remember when we bought a metal needle which lasted a lifetime." The audiophile has hailed the diamond stylus as the answer to tormenting record wear and annoying scratch.

Why the diamond? There are today three types of phonograph needles: metal, sapphire, and diamond. Due to the decreased size of the microgroove playing point the wear exerted on the point of the needle is much greater than with the former 78 rpm style record. A metal tip needle will last only 15 playing hours, a sapphire tip 65 playing hours, but a diamond tip will last up to 1,500 playing hours without appreciable wear. Is this important to the Hi-Fi oowner? Yes, because when a needle tip wears it takes the shape of a chisel and actually cuts and carves the sides of the record groove causing permanent damage to your valued records. It is cheaper to change needles periodically than to replace records. Though a single diamond tip may cost as much as $20 it is still up to 75% cheaper than a short-lived needle costing $2.50. One diamond tip will equal the life of 20 sapphire tips or 100 metal tips. The diamond craze is really a Hi-Fi advance in terms of record quality and the customer's dollar. MODERN LIVING WITH GAS

The Gettysburg Times
Gettysburg, Pa.
October 25, 1957

Modern Living, with its accent on comfort and leisure, is made possible with new automatic Gas Appliances.

Mrs. Lindwood Findley, new Mrs. America, is seen (top) with Gas Water Heater. Typical laundry area (center) shows how Gas Dryer lends itself to modern surroundings. Julia Meade (bottom), gas industry's TV hostess, points out how Gas All-Year Air Conditioning unit adapts to utility setting.

In today's homes—old or new, large or small, modern or conventional—you'll find *modern* appliances—GAS APPLIANCES! The reason: simply because they add attractiveness to *any* home; they add convenience; they add savings in fuel cost; they add dependable, uninterrupted service; and they add that extra leisure every homemaker wants—for GAS APPLIANCES save both time and work . . .

. . . in the kitchen!

Only a modern Matchless Gas Range offers the exciting new *"Burner-with-a-Brain"* that prevents foods from scorching, burning, boiling over. Puts an *end* to constant potwatching.

. . . in the laundry!

An automatic Gas Clothes Dryer dries clothes for just a Penny-a-Load—*much less than the fuel cost of other types.* And clothes come out *so* soft, *so* fluffy.

Automatic Family-Rated Gas Water Heaters provide enough hot water to meet *every* demand—for automatic dishwashers, laundry, kitchen, bath. And all without waiting.

. . . in the utility!

Efficient Gas Incinerators put an end to trash and garbage worries. There's *no* mess, *no* odor. *Low* first cost, *low* installation, *low* maintenance, *low* operating cost.

All-Year Gas Air Conditioning affords *one* compact unit that *both* heats and cools. It cleans, filters, circulates—gives the temperature and humidity *you* want with just a flick of the finger. It's dependable, silent, efficient.

Turn The Page For The Latest In Gas Appliances.
See Why, With Gas, You Can Live The Modern, Carefree Way!

HOT WATER HEAT STEAM SYSTEMS IDEAL WITH GAS

Natural gas is making it possible for an ever-increasing number of Americans to enjoy a new concept of luxurious comfort from hot water heat and steam heat systems.

Old homes as well as new ones are benefiting from this wonderful combination: Abundant, clean-burning dependable gas and brilliantly designed new equipment for making the most of it. Design advances extend through every phase of household operation, including new baseboard and other units for distributing heat.

Gas-fueled hot water and steam systems are proving practical for dwellings of almost every architectural style, from the largest to those of modest size. Compactness of equipment, mass production economies and new installation techniques have helped bring this heating luxury to greater and greater numbers.

In single-family dwellings, the gas-fired boiler for hot water heat is being installed in many parts of the home — in basements, upstairs recreation rooms, utility rooms and even compact kitchens. Usually they come in trim, square, brightly enameled jackets. Their good looks, silent operation and efficient insulation make them acceptable companions in living zones.

Counter Top Height

While dimensions vary somewhat with different makes, all are so compact that installation space can hardly ever be a problem. Many are only counter top height, and some occupy but three or four square feet of floor space.

While hot water heat has made fastest strides in the single-family home market, steam systems using gas also are enjoying favor. Gas steam and hot water systems also are meeting an ever-increasing part of the heating needs of multi-family structures.

Owners benefit from the latest in automatic controls, and from burners and boiler sections that are literally "made for each other." The long-lived boilers squeeze the last possible bit of heat out of every bit of fuel consumed; the shapes of flames and flues has been studied tirelessly to win this result.

Modern design has brought wide improvements in heat distribution techniques, too. The bulky, radiators of old have given way to trim baseboard heating units, recessed convectors and compact, low radiators. Hot water heating also is used with radiant panel systems, especially in the popular one-story slab-floor type of dwelling.

Whichever of these heat distribution methods is selected, the homemaker wins new decorating opportunities. There are no bulky obstacles to placement of furniture or drapes.

FLUFFY-WHITE AND SPARKLING is how clothes come from "penny-a-load" gas clothes dryer installed in modern all-gas homes. Fully-automatic, gas clothes dryers handle washer loads of 8 to 9 pounds, turn out clothes dried so perfectly and gently that fabrics last much longer. An average load is completely dry, ready to fold and put away in 30-40 minutes—or damp-dry and ready to iron in 20-30 minutes. Available at local gas appliance dealers, gas dryers come in twin washer-dryer units or in combined "duomatic."

LUXURY HOME FEATURE

Want to add a home feature popular in the most luxurious homes, yet practical and economical for modest budgets? If son, consider a utility room in your home modernization plans, says the Gas Appliance Manufacturers Association. Grouping of laundry and water heating units—sometimes space heating units and incinerators, too—makes for top efficiency and economy. And it can be in comfortable and attractive room as well as a useful one.

HOW SAVINGS GAIN WITH AN ALL GAS HOUSE

The all-gas house will help send many a boy or girl to college who might not be able to go otherwise. It will permit many couples to pay off their mortgages years ahead of time. It will allow countless home buyers to enjoy housing features they couldn't otherwise afford.

Surprising?

Not if you will check up on the fuel cost and other economies of the all-gas house, and then look at some of the financial tables showing how savings mount up. Remember, modern gas equipment can save money on maintenance charges as well as fuel costs. Often there are substantial savings in installation charges, too.

Just to take a round figure, savings of $5 a month may not seem like much. Many owners of all-gas homes save several times that much. But it mounts up, at compound interest. Compound annually at 5 per cent for 18 years — the time it takes a new-born baby to be ready for college — $5 a month totals over $1,680. Even at 3 per cent, the total would be over $1,400.

Which interest percentage should be used in your case depends on your saving plans, whether you hav a mortgage, and so on. But you can see it's well worth while.

Would you like $5,000 in 25 years — the length of many mortgages these days? It takes only about $9 a month, at 5 per cent interest, compounded annually.

Of course, there are many families, particularly those just buying homes, that are going to be most interested in plans for mortgage payment. Here again, the household operating economies possible with an all-gas home can actually help shape lifetime plans.

For instance, if you can use such economies to increase mortgage payments by only $9.57 a month — paying $68.03 each month instead of $58.46 — you can pay off a $10,000 mortgage, at 5 per cent interest, in 19 years instead of in 25 years.

Save With Gas

Or perhaps the 25-year term is acceptable in your case, but you're wondering if, at today's higher costs, you'll be able to afford the kind of house you want. Here again, a mortgage amortization table provides some really interesting reading, particularly when you think what can be done with the operating cost savings now possible with gas.

As an example, if you can, with the help of such savings, pay just $9.36 a month more than would otherwise be possible, you can be provided with $1,600 more in housing, on a 5 per cent, 25-year mortgage.

The best part of it all is that owners of the all-gas house don't have to do their saving by scrimping, or going without. They enjoy superior service and comforts, automation in heating, cooking and other household operations.

And they know that the tremendous investments the gas industry has made and still is making — everything from well drilling right up to new mains in suburban streets — backs up the home owner's investment and insures the comfort and convenience of gas service for many, many years to come.

CONTROLS MEAN "FREEDOM" IN GAS APPLIANCES

Ever stick your hand in the oven to check the baking temperature before sliding in your roasts and baked goods? Or hand-test the water in the bathtub or washing machine?

These were common scenes in grandmother's day. Today they have all but vanished—thanks to automatic, controlled gas appliances that make life easier in millions of American homes.

The revolution was brought about by a gadget known as a "thermostatic control." What does it do? Stated very simply, it measures temperatures and controls them.

Automatic Temperature

Today, these clever gadgets see to it that your gas oven stays automatically at the temperature you select on the dial, turning out meats that are done just right, with less shrinkage.

For better cakes, pies and pastries, the exact degree of oven heat is essential. So, next time the folks in your family lick their lips over your angel's food cake—bless the thermostatic gas oven heat control that helped it rise just right.

Thousands of housewives know that the best way to stay out of "hot water" with the husband is the keep him in hot water when he steps into the tub or shower.

"Perfect Answer"

Here again, an automatic, thermostatically controlled gas water heater is the perfect answer. Controls keep water always at the right temperature at the lowest possible fuel cost.

In a "penny-a-load" gas clothes dryer, controls have an even more complex job. They start and stop the appliances automatically. They control the drying cycle. And they maintain the precise degree of heat needed to do the job.

So when you dial a temperature or time on the modern gas appliances in your home, remember that the control is the heart of the appliance. Set 'em and forget 'em—and enjoy your freedom.

New Gas Range Needs Needs Little Care

Modern, fully automatic gas ranges are not only beautiful to behold. They're also the easiest to keep clean.

With just a minimum of care, your gas range will stay good looking and give satisfaction for many years to come.

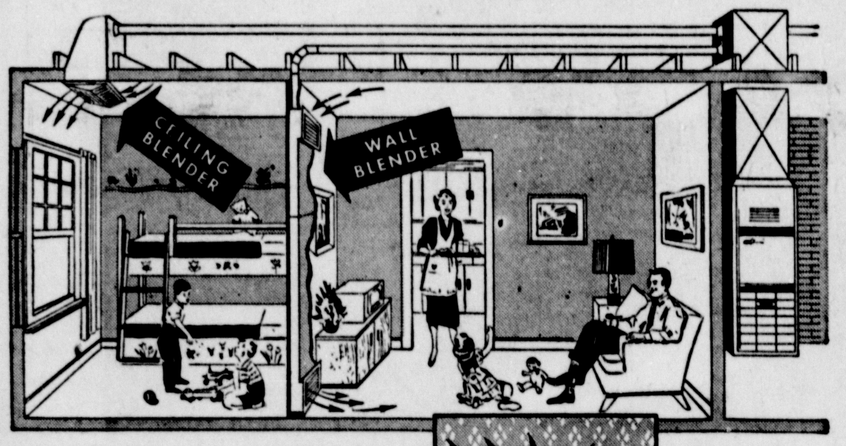

Here are some of the design features that make this true:

1. One-piece construction of burner tops and seamless ovens with rounded corners eliminate nooks and crannies where dirt can hide.
2. Snap-off front burner valves and panels do away with the difficulty of cleaning burner controls in place.
3. Removable burners, oven bottoms, doors and trays make it possible to clean individual parts in the sink, do a better, easier cleaning job.
4. Removable heat resistant oven windows can be cleaned without spilling water inside the oven.

A Servel "all year" gas air-conditioning system can maintain inside temperatures to 15 degrees cooler than outside.

BEST TEMPERATURE CONTROL

ever developed for heating-cooling

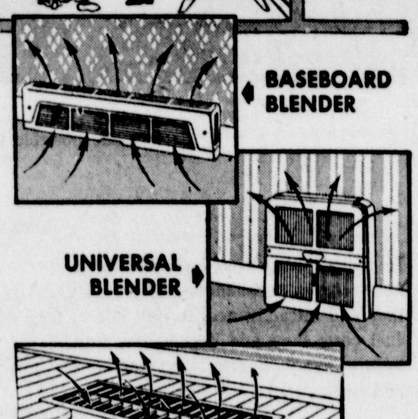

exclusive **Coleman** **Blend-Air® system**

Blending action is the secret — and only Coleman has it! Blenders mix fresh warm or cool air with room air...Gives every room its individual circulating system!

ONLY heating backed by $1000 Bond! No other system keeps temperatures so uniform — so only Coleman offers a $1000 Bond to guarantee your comfort.

Lowest cost cooling to operate. Add Blend-Air Conditioning anytime – cools your whole home for up to 49% less than ordinary systems. Gives driest, cool comfort of *any* system! Easy to install with Blend-Air or your present forced air furnace.

NO DOWN PAYMENT

Whether you buy, build or modernize — there's a blender for every home and need. Easiest system to install – 3½-inch ducts fit in walls. No costly alterations needed—cuts installation time in half!

Savings Are Possible With Latest Gas Air Conditioning

Installation of "all year" gas air-conditioning can save money for the homeowners in many ways.

Here are six areas of savings which help offset the cost of installing Servel "all year" gas air-conditioning instead of a conventional gas heating unit.

Health Savings: Elimination of dust and pollen in the air — together with controlled, year-round temperature and humidity — can vastly reduce doctors' and nurses' bills and the cost of domestic help that might be needed in case of illness.

Real Estate Savings: Air-conditioning increases the resale value of the home, makes for easier resale.

Savings In Repair: No screens are needed. There is less frequent need for interior repainting. And warpage is reduced — not only of window and door frames, but also of furniture.

Other Savings

Domestic Help Savings: "House-cleaning sprees" are not necessary because less dust means less cleaning.

Cleaning Bill Savings: Drapes, upholstery, rugs, carpets, bedspreads, table covers, etc., stay clean and fresh much longer.

Savings In "Escape" Costs: Those who live in an air-conditioned atmosphere need not make extra trips away from home to escape the stifling atmosphere of a house full of stale, hot and humid air.

When news headlines report a heat wave, or when a sub-zero cold snap sets in, you can still enjoy the cozy comfort of a bright May morning in your own home with gas air-conditioning.

"Atmosphere Controlled"

No climate in the world is as healthy and pleasant as the modern home air-conditioned with natural gas. The home is completely "atmosphere controlled," from from soot, dust and pollen.

Gas "all year" air-conditioning enables you to keep cool all summer and warm all winter. At long last, you — not the weatherman — control the climate in your home.

You simply set the thermost for 72 degrees or any other desired temperature, regardless of whether the weather outside is 110 in the shade or 10 below zero.

Gas air-conditioning is economical, too. It makes possible a big reduction in cleaning bills, home maintenance costs and medical expenses. Curtains, upholstery and furnishings stay clean much longer.

NEW GAS RANGE DESIGNED FOR MY FAIR LADY

Gone are the days when Milady could complain about slaving over a hot stove all day.

Today, gas ranges are designed for cool cooking—and, indeed, even "absentee" cooking. Not only is it unnecessary to stand over that stove—cool or hot—it isn't even necessary to stay in the same house with it. Of course, it's the array of automatic controls that makes absentee cooking a practical and highly satisfactory procedure nowadays, says the Gas Appliance Manufacturers Association.

With automatic controls on the range, there are no "overdone-or-underdone" worries, no concern about food burning, no need for frequent inspections of the cooking process for the homemaker.

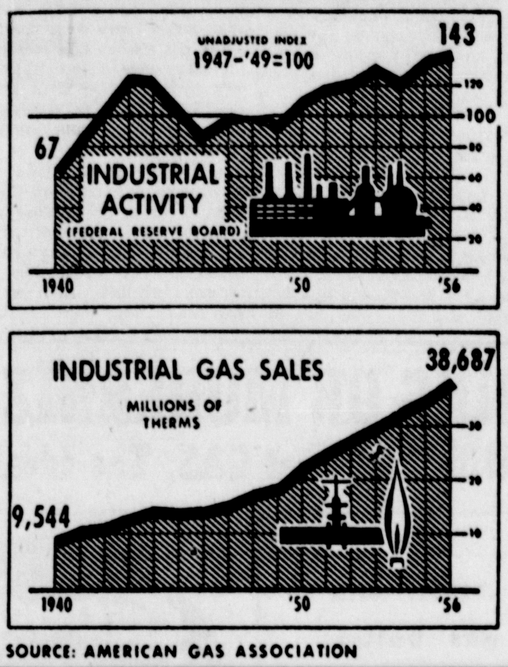

Automatic Roast Control

Take, for example, the automatic roast control that eliminates all the guesswork. Before leaving the house, the housewife decides at what hour the roast should be started and the degree of "doneness" she desires. Then she sets the dials accordingly, sticks a probe—like a skewer—into the meat, and her worries are over. In her absence, the gas will turn itself on, stay at a steady temperature until the roast reaches the degree indicated, and then shut itself off and the meat is ready to serve.

For top-of-the-range cooking, the "burner with a brain" takes over the housewife's job and acts as a mechanical brain. The automatic heat-controlled top burner or griddle maintains temperature in the cooking utensil or on the griddle and eliminates "standing over" the stove for long periods.

These time-saving and worry-proof features of automatic gas controls, says GAMA, not only allow Milady many extra hours from the kitchen, but help to relieve much of the strain while she's there.

NATION'S INDUSTRIAL ACTIVITY SPEEDS UTILITY GAS USE

SOURCE: AMERICAN GAS ASSOCIATION

INDUSTRIAL sales of the gas utility industry increased in 1956 three times faster than the nation's industrial activity. While the industrial activity index was rising 2.9 percent, industrial gas sales climbed 9.4 percent to 38,687 million therms.

MODERN GAS RANGE KEEPS KITCHEN COOL

Raw vegetables and crisp, cool salads may be fine summer fare, but most hard-working husbands demand meat and potatoes even in iced-tea time.

That means millions of hours of hot weather cooking for American housewives, but it doesn't have to mean "slaving over a hot stove." This is a cheering thought for the heat-harried homemaker.

Modern gas ranges are scientifically insulated to keep the heat inside the ovens and broilers for maximum efficiency and economy, and to keep the kitchen cool no matter what's cooking.

Top burners, too, are designed to keep heat under the pot instead of all over the kitchen. What's more, top burner heat controls are standard equipment on most new gas range models. All the homemaker has to do now is set the degrees from the pre-set figure.

Many Old Ranges

The Gas Appliance Manufacturers Association thinks it's unfortunate that millions of America housewives still swelter unnecessarily over antiquated cookstoves.

More than half of over 30,000,000 gas ranges in use in the U. S. are more than five years old. Nearly 10 million are over 10 years old, and more than four million are from 15 to 40 years old.

With no moving parts or elements to burn out, GAMA says, old gas ranges never die — they just cook on forever. But, without the advantages of today's design and construction, they may be cooking the cooks as well as the food.

There are still 30 cities in United States where gas is used to some extent for street and home lighting.

SPECIAL RANGE FEATURES

In addition to a wide variety of sizes and colors in conventional free-standing gas range models, there are special designs offering completely new styles. One, for example, features an aluminum-domed unit permitting baking, grilling, roasting and pan broiling on top of the range. Another, virtually a "cooking center," is especially designed to give the built-in look to older kitchens and is complete with upper shelves, a light and fan.

BASEMENT LOCATION IDEAL

Many home owners find basement locations ideal for installation of gas-fired incinerators. They are handy there for quick, safe disposal of wood shavings and other hobby by-products, and the family can be trained to limit all messy unwrapping and unpacking jobs to the basement. Incinerators also are installed in other parts of the home, including utility rooms and kitchens.

TYPE B VENTS APPROVED

Leading national authorities in the building, safety and home mortgage fields have approved use of metal type B vents with gas appliances and equipment. These vents, which make possible substantial economies in new construction and remodeling, can be boxed in at rooftop level to provide the appearance of conventional masonry chimneys. Use of type B vents with gas equipment is possible because vent temperatures are lower than is the case with other fuels.

IN NEW MEDIUM — William Warfield as "De Lawd" and Estelle Hemsley, the Sunday School teacher, rehearse for TV adaptation of "The Green Pastures," fable of the Old Testament.

A "laundry rated" gas water heater assures a constant supply of hot water in modern homes. Features include automatic shut-off thermostats, 100% safety pilots, and fiberglas insulation to reduce heat loss.

In a recent survey of families having gas air-conditioning systems, over 70 per cent reported savings in home cleaning and maintenance costs. Cleaning bill savings alone ranged up to $300 a year.

DAD'S IN THE KITCHEN

Husbands are doing more cooking and that is one of the facts spurring kitchen modernization, gas range manufacturers report. Men appreciate automatic, labor-saving features, it is found, and are learning more and more about foods as they help out in shopping.

SAVES SPACE TWO WAYS

Improved design in gas-fueled boilers for hot water heat systems save space in several ways. Not only are the boilers themselves compact, but required clearances are such that the heating equipment may be close to walls, or to other items.

The smooth, silent operation of a gas refrigerator preserves food much better than a motor-driven refrigerator. That's because it's continuous rather than an on-again, off-again system. A tiny blue gas flame does the whole job —silently, economically and automatically.

Because of the extensive use of natural gas appliances, all-gas model "Blue Flame" homes are economy homes in the truest sense —capable of being operated with a maximum of economy, convenience and efficiency.

Automatic clock controls in modern, matchless gas ranges take over cooking chores if the homemaker wants to go shopping. The oven turns itself on and off. The meal is ready when the cook comes home.

With all this going on at your house on the same day, would you have enough hot water? You would, with a Family Rated GAS Water Heater.

get all the hot water you need

with a Family Rated GAS Water Heater

Automatic washers, as you can see, take the lion's share of your hot water supply. Chances are your old water heater can't deliver enough hot water for other chores while the washer's going. The answer is a modern automatic FAMILY RATED Gas Water Heater.

first, find out the Family Rating of your washer

Your plumber or gas appliance dealer has a chart which shows exactly how much 160° water your particular automatic washer needs per hour. That is its Family Rating.

but why pay for more hot water than you need?

Why pay for a bigger storage tank? Only GAS Water Heaters are fast enough to keep pace with your washer and to supply all your other needs at the same time. Only Family Rating can tell you which GAS Water Heaters are right for your particular washer.

then, match it with the right GAS Water Heater

Your gas appliance dealer or plumber will show you the new GAS Water Heaters with the same Family Rating as your automatic washer. It's that easy to make the right selection.

GET A FAMILY RATED **GAS** WATER HEATER NOW!
Only GAS heats water faster, and GAS does it better for less!

GAS BOILERS CAN UPGRADE OLDER UNITS

Theoretically, it always was possible for the owner of an old house to visit a new one, look around for ideas, and then go out and buy the things his own house lacked.

But, in days of old, it usually happened only with relatively minor furnishings and fixtures. When it came to a big job, such as home heating system, the owner of the old house was apt to sigh and just wait until he could move into better quarters.

Now that's all changing, says the Gas Appliance Manufacturers Association, and the modern gas-fired boiler for hot water or steam heating systems is one of the most important factors behind the change.

One reason is the higher value of the typical used home today—it's an investment worth safeguarding and enhancing with major improvements. Another is the fact that gas-fired units for hot water or steam heat can be installed much more quickly and simply than could the bulky giants of an earlier era. And they're much more pleasant to live with, once installed.

96,000 Gas Boilers

Last year the number of gas-fired boilers shipped by manufacturers rose to 96,100, an all-time high. The total for 1956 was 6.7 per cent ahead of 1955, even though the number of new homes started declined. This was possible because of the great new home modernization market—a market in which owners of older homes move ahead to standards of living never possible with their old equipment.

The modern automatic gas boiler, streamlined, compact, and engineered for long life, often can pay its own way, through fuel savings, GAMA reports. Its small size and appliance-like appearance make it particularly suitable for first floor installations, or for a place in the upgraded, comfortably furnished basement which has gained so important a place in modern home life.

At the same time, it has the quick heating and other characteristics so important with the modern heat distribution units that have been replacing bulky old-styled radiators.

Baseboard units are outstanding favorites in this role. They include copper finned-tube types, which heat by a combination of convection and radiation, and cast iron baseboards, heating largely by direct radiation. There are modern radiators, better in appearance and much smaller than their predecessors, and a number of arrangements for built-in convectors.

The owner using these units in home modernization obtains every benefit of the most modern design and top flight engineering skill—just as the new home buyer does, GAMA points out, and just as he does with modern boiler.

However, the gas apliance group adds this reminder: Each older house will present its own particular needs as to system size, design and planning, and for changes in piping and other portions where necessary. Therefore it is particularly important to have the advice and service of experienced dealer or utility representatives.

Gas is used for cooking in some 85-million homes.

SAVE WITH GAS—Daughter's piggy-bank is a good place for savings made possible by use of gas for family water heating. Hot water costs less because gas heaters are designed for peak efficiency. Gas burner supplies direct heat at tank base. This gives maximum heat at lowest fuel cost. Once water is hot, fiberglass insulation keeps it hot, reducing heat loss. Gas water heaters are fast, automatic and dependable, too. Using thermostat, housewife can select the water temperature desired. Automatic controls then take over, delivering tankful after tankful of clean, HOT water at low cost. To select proper sized tank for your family, ask gas appliance dealers about "laundry-rated" gas water heaters.

"Economy, Dependability Spark Today's Trend To Gas," Estep

Public acceptance of natural gas and of modern, automatic gas appliances is at a record level in this area, according to Julian Estep, local manager for the Manufacturers Light and Heat Co.

"Instead of leveling off . . . as might be expected after ten years of unprecedented growth . . . the trend to gas is still going strong, and promises to continue strong," he added.

Underlying the popularity are the attributes which combine to make natural gas today's "most wanted" fuel . . . economy, dependability, efficiency, cleanliness and convenience.

"Important Factors"

"The economy of gas, together with the public's sense of 'cost consciousness' . . . inevitable in a period of high prices and inflation . . . are probably the most important factors," the manager said.

"Homemakers have found that they are money ahead every year by going 'all gas' in preference to electricity, oil, coal or any combination of other domestic fuels.

"Dependability is important, too. With gas appliances, people don't have to contend with storms and power failures. Meals can be served on schedule. Refrigeration is a sure thing, always.

"Gas cooking is also clean cooking. Only with gas can you broil with the broiler door fully closed. It never pours hot, greasy smoke into the kitchen. Pots and pans stay mirror-bright.

"All these things point to ever-increasing sales of gas appliances by local dealers, plumbers, and distributors, and to greater public enjoyment of modern living conveniences, through natural gas," Estep added.

Gas Incinerators Safeguard Health

The automatic gas incinerator is rapidly becoming popular with modern homemakers. No other disposal method gets rid of garbage and waste so quickly and thoroughly.

Health experts say that the gas incinerator is one of the most effective safeguards against disease, since garbage is a breeding ground for bacteria and flies.

There is nothing to watch or worry about with a modern, automatic gas incinerator. You simply put in your garbage and walk away. Gas dries out wet garbage, reducing the load, then consumes every scrap.

It turns bushels of refuse into a mere handful of white ashes, which need emptying only occasionally. The ashes, incidentally, make wonderful fertilizer for your garden or flower bed.

Natural gas is used to heat more homes in the U. S. than any other fuel.

"DRYER WOMAN" WAGES ADD UP TO "NOTHING"

The "poor washerwoman" of yesterday actually was well paid compared with the housewives still playing "dryerwoman," according to Gas Appliance Manufacturers Association calculations.

For the "dryerwoman," says GAMA, is working for just about nothing-per-hour. She may even be paying for the privilege of straining her back, chapping her hands and cluttering up her back yard with washlines.

What can she save by using her energy, and the sun's, instead of the clean, inexpensive energy already piped to her home and ready for the gas clothes dryer? The gas dryer's fuel consumption is so modest as to be measured in pennies. The cost of the dryer itself comes in the same category, when spread out over years of trouble-free service.

Wind Damage

In contrast to these small sums is the damage wind, freezing and mildew can do to clothes. There's the sun-faded garment that has to be replaced. There's the extra inventory of clothing that has to be kept on hand for children to outgrow. Then add the clothesline apparatus, a few baskets and hampers. Plus soap and hot water for the times things have to be rewashed, because of air pollution or clothesline accidents.

And so the dryerwoman's wages are close to, or even below the zero mark. Realization of this has helped make the gas dryer one of the fastest growing appliances on the American scene. Annual sales have doubled since 1954, they're up more than twenty times over 1949 figures.

Gas Clothes Dryer Saves Many Hours

It's been estimated that an automatic "penny-a-load" gas clothes dryer saves housewives four-and-a-half hours every week compared to the old clothes line method.

It takes only a few seconds to load the dryer. Drying time is then controlled by means of an automatic timer control that can be set for any drying time desired.

When clothes are dry, the dryer shuts off automatically. Clothes need not be removed until the homemaker is ready. Once the drying cycle is started, she's at her leisure or free for other chores.

An automatic gas dryer saves money, too. A smaller inventory of clothes is possible because they can be washed and dried faster and used more often.

The use of a gas dryer reduces a child's washable wardrobe to half, and results in a clothes saving of up to one-third in a family with two children.

ADVERTISE IN THE TIMES

Home Economist Always Available

Twenty-two college trained home economists are employed by Manufacturers Light and Heat Co to help gas users obtain the best possible service from their appliances.

Last year these home service representatives made eanrly 5,000 home calls and answered over 3,000 telephone requests for cooking and homemaking assistance.

The local home economist, Miss Lee Ann Leaphart, is available to assist homemakers in this area by calling Gettysburg 1275.

Over 3 million families in the U. S. have gas refrigerators.

Room-By-Room Gas Heating Fills Many Comfort Needs

Of all members of the gas appliance family, none fills a more varied role than the individual room heater.

This appliance, known also as a direct heating, zone heating or space heating unit, is finding a place in castle-like mansions and modest cottages alike. It figures in home improvements in many congested urban areas, and also is gaining at a fast pace in rural and camp markets.

Last year about 1,700,000 such units were sold, for a gain of 15 per cent over 1955, according to Milton T. Clow, chairman of the direct heating division of the Gas Appliance Manufacturers Association.

The fact that nearly 27 per cent of these heaters were made for use with liquefied petroleum gas testifies to their popularity in rural areas. At the same time, Clow adds, they are growing in popularity as a means of replacing obsolete heating equipment in multi-family city dwellings without central heat.

Major Considerations

Clow, who is heating division manager of James B. Clow & Sons, Chicago, says that fuel economy and low installation costs are major considerations among millions of owners of single-family homes depending on room-by-room heating. Temperatures can be made to order, and thermostatically controlled, to provide exactly the right heat level in each portion of the dwelling.

Thus, for example, a sleeping room may be kept cool normally but made warmer the instant it needs to serve as a sick room. A TV room, with its participants inactive, usually will be kept warmer than other spots.

Compactness and modern styling in a variety of finishes have been major selling points, Clow reports, along with such features as automatic temperatures controlq and automatic ignition.

Additional factors favoring the industry last year include the trend toward larger family size and more diversified recreation activities. Both have spurred modernization to obtain maximum benefits from available living space. These heaters have been added as supplementary units in many dwellings with central heating, particularly when enclosure of porches, development of basement recreation areas or other projects have added to heating needs.

They have been major beneficiaries of the growing national investment in summer homes and camps.

GAS PLAYING KEY ROLE IN MODERNIZATION

Abundant supplies of natural gas are helping speed one of America's most vital jobs — the modernization and preservation of millions of dwellings that will be urgently needed to provide for the country's great increase in population.

Even with new home construction greatly expanded during the 1960's, the Gas Appliance Manufacturers Association points out, the demand for housing in that period will be so great that fullest use will have to be made of older buildings, too. Thus every home modernized now will help meet urgent needs in years to come, and those carrying out the improvements are performing patriotic service as well as making sound individual investments.

Expanding natural gas pipelines, and efficient, attractive gas appliances and equipment for best utilization of the increased fuel supply have had a key role in making home modernization what some authorities figure to be the country's second biggest industry — larger even then new housing, and second only to food.

Curb Fuel Storage

Compact gas heating equipment, eliminating need for fuel storage in the home, has helped create attractive and useful living space in millions of basements that formerly were dark and ugly. Gas heat has helped create additional living space in countless homes where rooms have been built on or porches enclosed.

As growing families added second bathrooms, improved kitchens and modern laundries, the automatic gas water heater has had an ever-increasing job. Dishwashers, too, depend on these hard-working water heaters.

New gas ranges and refrigerators have had a big role in the modernization. Gas clothes dryers, one of the country's fastest-gaining appliances, have earned a place in the trim new laundries and utility rooms made a part of so many efficient improvement projects. Gas household incinerators have helped neighborhood improvement through elimination of garbage cans and unsightly backyard burners.

Automation Helps

The desire for automation in the home, for economy and durability, has helped give gas such a big role in the country's huge modernization undertaking. Space-saving compactness is another important factor.

Gas is such a versatile fuel that equipment can be selected for virtually any older home. Gas central heat, for example, has been added to everything from huge old mansions to small bungalows.

SWEET-SMELLING CLOTHES

Clothes that come out of a gas clothes dryer smell as sweet and fresh as if they had spent the day in the sun, caressed by warm breezes. Towels dry fluffier. Delicate fabrics dry gently. Rain or sunshine, the wash can go on when there's a gas clothes dryer in the house.

SOFT-SPOKEN FAVORITE

The gas-fired forced warm air furnace now is the most popular single type of central heating equipment in the entire country, says the Gas Appliance Manufacturers Association. Among many improvements developed during its sensational postwar rise are features that cut blower noise to th eabsolute minimum.

"GOOD LOOKIN' COOKIN'" is a cinch with the new "burner-with-a-brain" being demonstrated by this attractive homemaker. Featured on modern, matchless gas ranges, the burner takes all guesswork out of cooking. It automatically raises or lowers flame to desired setting. Food can't possibly overcook or undercook. Every pot and pan becomes an automatic appliance with a thermostatically controlled top burner.

Cleanliness Of Natural Gas Proven

As a home owner, you probably don't ever have occasion to order a burner with 20,000,000 BTU capacity, such as used sometimes in industry. That's a couple of hundred times as much as the capacity of a household gas furnace.

And you probably won't need boilers like those in a huge new community shopping center — they consume enough gas to heat 400 average-size homes.

But such huge installations are of interest and importance to the home owner for a number of reasons. For one, they show the extreme cleanliness of gas; when such vast quantities can be burned without interference to neighbors you can be sure of freedom from nuisance with the much smaller amounts for household use.

Moreover, big users like these are one reason why natural gas is such a bargain. Throughout years of rising prices, residential consumers have benefited from mass production and mass distribution economies with this preferred fuel.

Additionally, there's demonstration how natural gas can help create industrial and commercial jobs in many sections, without lowering neighborhood standards. Many new "industrial parks" and research centers, set amid park-like surroundings, use huge quantities of gas.

ECONOMY AND SPACE-SAVING

Modest installation costs and space-saving advantages are among the features of gas-fired wall heaters and floor furnaces. Wall heaters fit snugly between beams, and take no floor space at all. Gas floor furnaces usually require less than two feet of space below floor level—it isn't necessary to have a basement or even a crawlway.

COOKING MADE EASIER ON NEW SERVEL RANGE

With a modern "matchless" gas range, you can cook better and easier, say gas appliance dealers here.

Gas gives instant maximum heat. This is a time saver and convenience. You don't have to preheat a gas flame. Of course, lighting is automatic.

With a gas range, the cook has absolute control over the heat. Ranges equipped with a thermostatically-controlled "burner-with-a-brain" can be set for the exact cooking temperature desired, converting pots and pans into automatic appliances.

Clean Cooking

There's no wasted heat in the kitchen. Gas range ovens are so well insulated that the heat stays in the oven where it cooks the food, instead of warming the cook.

Gas means clean cooking, too. And gas ranges cost less to install and less to operate. There are no expensive parts to wear out or decrease in efficiency. Therefore, service costs are low.

With a clock-controlled gas range, the housewife can place the food in the oven, set the clock, and then go shopping or take a nap. The oven will turn on, cook the food, and turn off again automatically.

When it comes to various colors, makes and models, gas ranges simply can't be beaten.

On a hot summer day, a three-ton gas air-conditioning system removes 120 quarts of moisture from the air in a 24-hour period.

CAPITOL CLEANUP— District of Columbia firemen bring hose to play on the Senate side of the U.S. Capitol as the building is cleaned in readiness for next Congress session.

A built-in meat thermometer that registers the heat inside the roast—guaranteeing "doneness" to rare, medium or well done—is featured on many late-model gas ranges and ovens.

A survey of public housing projects in 27 states shows that 83 per cent specify gas cooking ranges in bid requests. Seventy-one per cent ask for automatic gas water heaters.

A "bar-b-kewer" meat oven that cooks with radiant heat—retaining the natural, juicy flavor in ribs, hams, a leg-of-lamb or the holiday bird—is a feature of some late-model gas ranges.

EXTRA BATHROOMS IN DEMAND

Bigger families and upgraded standards of living are keeping extra bathrooms high on the list of most-wanted home improvements. This need is one of many taken into consideration by manufacturers of gas water heaters—a two-bathroom family will use more hot water. Proof of the popularity of extra bathrooms came in a survey that showed 48 per cent of new houses constructed last year to have more than one bath. There were 20 per cent with one full and one partial bathroom, 21 per cent with two full bathrooms and 7 per cent with more than two full bathrooms.

WIDE CHOICE OF SETTINGS

The home improver adding a built-in range has a wide choice of settings for it, points out the Gas Appliance Manufacturers Association. Not only are there many finishes to select from among the metal and wood cabinets most often employed for build-ins, but there are possibilities in tile, brick natural stone and artificial stone.

Often a do-it-himself carpenter, tile setter or mason can handle some of the preliminary work. But actual installation of the appliance should be left to a qualified utility or dealer representative, GAMA says, adding the recommendation that the expert be consulted in advance on size and other specifications.

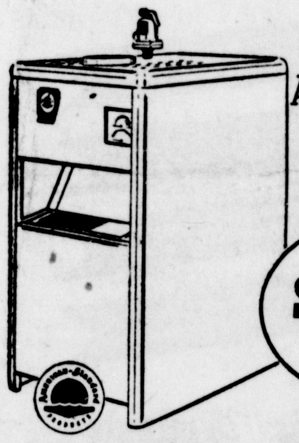

SAVES SPACE UPSTAIRS, TOO

The compactness of modern boilers for hot water or steam heat means an important saving in basement or utility room space. Modern heating saves space in living quarters, too, when bulky old-fashioned radiators are replaced by baseboard units, modern compact radiators or recessed convectors.

Blue Star In White Circle Is SymbolOfConsumerProtection, Appliance Advancement Work

Gas appliances with college diplomas are working for homemakers throughout the nation.

The diploma — a Blue Star in a white circle — is the Approval Seal of the American Gas Association Laboratories. This seal is the symbol of one of the most extensive consumer protection and appliance advancement programs ever sponsored by American industry.

The exams gas appliances must pass to earn the Approval Seal consist of hundreds of stringent tests for safety, durability and performance. A gas range, for example, must pass more than 300 major tests before it graduates to a sales floor with its blue-star diploma. About 95 per cent of all gas appliances sold today carry the Approval Seal.

Fine Testing Tools

Testing tools used in the A.G.A Laboratories range from an ordinary flour sifter used in making layer cakes for oven tests, to the latest infra-red equipment used for analyzing the chemical content of flue gases.

Domestic appliances — ranges, clothes dryers, water heaters, incinerators, refrigerators, room heaters, furnaces — are tested at the A.G.A. Laboratories in Cleveland, Ohio, and Los Angeles, California. So are conversion burners, hotel, and restaurant equipment and accessories such as thermostats and valves. More than 6,000 models of gas equipment, divided into 31 classifications, take the A.G.A. exams every year.

Test New Models

How does a new gas appliance take its comprehensives? When a manufacturer develops a new model, he ships a sample to the A.G.A. Laboratories. Then the gruelling series of tests for construction, safety and performance is launched.

A range must be neat, sturdy, and smooth-edged. It must be easy to install, repair, clean and adjust with no special tools. And, for the sake of housewives who are not mechanized wizards, it must be impossible to reassemble removable parts improperly. Mrs. Homemaker just can't put her range together wrong after taking it apart for cleaning. Further, it must be so easy to do — that it's child's play.

After inspecting the range, test engineers get rough with it, squeezing, pushing and loading it down with weights to test its sturdiness. Gas supply lines are given twelve separate checks for safety and performance. Valves are put through a lifetime-of-the-range test in a cycling machine which turns them off and on thousands of times to test their durability.

Minute Inspections

Burners, thermostats and pilots are inspected minutely and tested under conditions far more taxing than those they are apt to meet in the home, for safe operation is an essential feature of A.G.A.-approved appliances.

Many of the test points are for the cook's convenience. For instance, burner trays must meet five requirements, including raised sides and tight corners to catch spill-overs, smooth edges, rust-resistant finishes and easy removability.

For the sake of both safety and customer comfort, test engineers take the temperature of walls and floors adjacent to the ranges while they are operating at capacity, complete with large pots of water on each top burner Wall and floor temperatures must remain far below the danger point of causing fire.

Expert Cake Bakers

A.G.A.'s test engineers become expert at baking cakes, for each range must take the cake test in which four layers, two on each oven shelf, are baked, then examined through a delicate instrument for evenness of browning. Broilers take a toast test which involves covering the entire broiling area with bread slices. Each slice must be toasted to a golden brown in not more than 10 minutes

These are just highlights of the hundreds of trials by fire, force, inspection and chemistry that each gas range must weather before it wins the Approval Seal. Other appliances go through similar scientific tests under both normal and unusual conditions which simulate actual operating conditions in the home. Tests are conducted using every type of gas normally distributed by gas utilities and bottled gas companies.

Few new models make the grade the first time; according to Edwin L. Hall, director of the A.G.A. Laboratories in Cleveland. If an appliance fails one of the hundreds of tests, the manufacturer's representative may make minor adjustments on the premises. But if an appliance fails repeatedly, it is shipped back to the factory for further modification.

To Description Room

Once an appliance has passed all tests and has been awarded the Approval Seal — a cigar-passing event among the 40 or so manufacturers' representatives usually present at the laboratories — it is sent to the description room. There it is photographed and detailed drawings and descriptions are made of each of its parts. From then on, the manufacturer can produce that model with the Approval Seal, but only if each appliance is exactly like the one that passed the tests.

On the staff of the laboratories is a team of engineers assigned to check the models coming off the production line of manufacturers The inspection engineers, whose visits are usually, unannounced may check appliances at the manufacturer's plant, in dealer display rooms, or in homes to see that they do not vary from the original.

Can Be Renewed

Once granted, the A.G.A. Approval Seal can be renewed each year for five years. After that the appliance must be tested again for requirements are constantly being up-graded as the gas industry, through scientific research develops appliances, parts and accessories with even greater safety, performance and durability factors

Some of the most significent improvements in gas appliance engineering have been made at the A.G.A. laboratories in Cleveland, where a complete department devoted to research helps keep gas consumers supplied with ultra-modern appliances.

The A.G.A. laboratories Research Department proved that silicone seals could be used successfully for gas oven doors, thus keeping the heat in the oven and out of the kitchen.

SURROUNDED BY LATE MODEL GAS APPLIANCES, this modern homemaker has found the ideal answer to pleasant, convenient, economical living. She's shown here in utility room emptying garbage into an automatic, gas-fired incinerator. Home is cooled in summer, heated in winter by Servel "all year" gas air-conditioning system at right. Behind her is a "laundry-rated" gas water heater, assuring an abundant supply of hot water. At left is a fully automatic, "penny-a-load" gas clothes dryer. They illustrate how more and more modern homemakers are going "all gas" in preference to any combination of other fuels.

COLORS SERVE TO DRAMATIZE COOKING AREA

The hearth in coolonial times didn't need any special color scheme to make it the center of interest. It was the source of heat and light as well as nourishment, and the very symbol of hospitality.

Today's modern, efficient gas range has no such varied role despite its new-found versatility as a cooking appliance. But many homemakers have learned how to get much the same effect, the same pleasant symbol of glowing hospitality, through special attention to appliance selection and decorating plans.

Essentially, explains the Gas Appliance Manufacturers Association, the trick lies in using sharp contrasts in colors and materials to dramatize the cooking area and focus attention on the range That's jjust the opposite, GAMA notes, from the practice, still preferred by many, of having the range blend unobtrusively into a lineup of sink and cabinets.

It's a matter of taste and room size, too. Of course, a small, narrow kitchen usually lends itself best to the conventional plan.

For those who do want to make the kitchen cooking area a center of attention, just as the fireplace is in the living room, there are many possibilities, GAMA points out. One of the most effective is use of a contrasting color for the range. The free-standing range may be a bright splash of color, contrasting with both its background and with adjoining appliances or cabinets.

Color And Texture

In the case of built-ins, the contrast is obtained through both color and texture. That's why so many built-in oven-broiler units, with their bright metal finishes, are put into walls of rough brick or stone, or against materials designed to simulate such a setting.

Sometimes the floor pattern itself is so designed as to draw the eye to the range. Ventilating noods may also serve to focus attention on the cooking area. The room's lighting, and the lighting within the range itself, may help.

The total color combination possibilities are almost endless, and there's one to fit every temperament, says GAMA. As a general, but not infexible, guide, it is pointed out that kitchens with windows on the south or west get warm light during the day, and may work out best with so-called "cool color" ranges, for instance, a light green.

For kitchens with other exposures, warm, bright colors are more apt to be favored.

Whatever the situation, there's much great variety in the new lines of modern gas ranges that the homemaker can use them to express her personality in decor, as well as in culinary efforts.

FOE OF COLD FLOORS

Blowers near floor level are a feature on a number of gas-fired room heaters. They spread warm air out over a wide area, and are a solution to "cold floor" problems. Room heaters come in a wide variety of sizes and styles, and a number of new finishes have been added.

Appliance Glitter Has Practical Side

If time is money, there's gold in that glitter of new gas applianks.

The gleaming porcelain enamel and metal surfaces, designed to stay smooth and bright for many years, just won't hold dust or grime. And, as in the case of the seamless tops of the new ranges, style and shape have kept easy cleaning in mind.

In hidden spots, too, such as range ovens and broilers, smooth, shining surfaces mean minutes saved in clean-up time. Just seven minutes a day points out the Gas Appliance Manufacturers Association, adds up to more than 40 hours a year.

DOUBLE DUTY HEATERS

Air circulation during summer months is a "bonus" service obtainable from some of the newest gas heaters. The same fan, filter and vents that deliver clean, healthful heated air in winter can be put into action to keep air moving during hot weather.

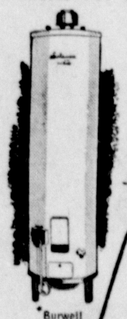

PROTECTS YOUNG AMERICA

Gas is helping America's schools practice what they teach in the way of personal hygiene. Large, fast-recovery water heaters make youngsters' hand-washing an effective, germ-removing function.

Heating Modernization Adds To Comfort, Home Valuation

Central heating systems, usually out of sight, too often become out of mind.

As a result, the gas heating industry says, many an ancient furnace plugs along in solitary boredom — unseen, unsung and unreplaced.

Experts of the Gas Appliance Manufacturers Association point out that the tendency of many home-owners is to re-decorate or renovate only what they see everyday, or what a visitor is likely to see — the living room, the kitchen, the bathroom or the lighting system.

But in many instances where attention has been focused on these upstairs repairs, the furnace or boiler has passed from youth through maturity to old age, handed along from houseowner to houseowner or from generation to generation.

Unfortunately, GAMA says, the level of family comfort begins to drop as the heating unit becomes obsolete, and so does the stability of the house.

Greater Livability

On the other hand, it has been found that greater livability and higher evaluation of homes is made possible by modern heating systems, particularly those operating on gas. Now the most sought-after heating fuel, gas owes much of its popularity to its adaptability to any kind of home construction or modernization.

New gas furnaces, for example, are compact, along the lines of filing cabinets; thus they can be installed either in a minimum of basement space or can be given an upper-floor location without being considered an encumbrance. Furthermore, for those with an eye to year-round comfort, it is noteworthy that gas furnace blowers, ducts and filters can do extra duty as parts of an air conditioning system.

In homes without basements and in dwellings that are hard to heat, gas equipment lends itself to perimeter heating, wherein the ducts are placed along the outside walls. For rambling homes, the industry now offers decorus room heaters to take care of rooms located at a considerable distance from the central heating system.

DECLARES GAS PREVENTS FIRE

The swing to gas for house-heating, which last year made it the nation's number one heating fuel, is regarded also as an important move toward fire prevention.

The National Fire Protection Association, in a recent accounting of fire losses, cited gas as near the bottom of its list of its list of 24 fire causes. The same listing showed fixed electrical services fourth and electrical appliances 10th among the fire causes, with defective or overheated heating and cooking equipment of all typs ranking second as a group.

Of the 100,500 fires started by the latter types of equipment, NFPA reported that oil-fired systems were to blame in 47,600 cases, while only 6,700 fires were traceable to gas-fired equipment. The balance of the total, according to the association, was laid to "other and unknown" types of heaters.

Commenting on the NFPA findings, officials of the Gas Appliance Manufacturers Association accredited modern design, adaptability to automatic control, and the clean-burning characteristics of the fuel as having accounted for the favorable safety record of gas-operated household equipment.

Smoking and matches continue to be the ranking cause of fires in the home, according to NFPA. Other principal offenders are rubbish, lightning, flammable liquids and spontaneous ignition. Fires of "unknown" or "miscellaneous" origin account for losses running into many millions of dollars.

In the past four years, U. S. gas companies have added new customers at a rate of better than 880,000 per year.

GRIDDLE MAGIC—Mmmm, pancakes and bacon! And done to perfection on the griddle of a modern, "Matchless" gas range. With automatic, thermostatic controls to provide the exact degree of heat, there's no smoke, no constant watching. They also keep breakfast warm till ready to serve. Griddle can be removed for easy cleaning. On many gas ranges, griddle makes way for a fifth top burner. When porcelain cover is lowered, it gives extra rangetop work space. Ask to see the late model "Matchless" gas ranges—with thermostatically controlled griddles—at your gas appliance dealers.

Taneytown

TANEYTOWN — Mr. and Mrs. George Motter and family, York St., will spend the weekend with Mrs. Motter's parents, Rev. and Mrs. Paul Dundore, Oley, Pa.

The third annual dinner was held recently at the Carroll County Agriculture Center. The toastmaster was Lester F. Stern. The invocation was given by Rev. C. R. Simmons Jr. Music was furnished by a trio, David and Kenneth Reifsnider and Vesta Null, accompanied by Mrs. Leonard Reifsnider. An address, "Present Day Philosophy," was given by Dr. William H. Johnson.

A hymn sing will be held Sunday at the Silver Run Reformed Church at which Johnnie Reaver, Uniontown, Md.; Vesta Null, R. 1; David and Kenneth Reifsnider, Bruceville, will participate in the program.

The Women's Guild and Men's Brotherhood of Baust Church met recently in the parish house with Mrs. Raymond Baker as the leader. The theme was "Forward Together" with emphasis on National Missions. Committee chairman reporting included: Survey and Study, Mrs. Miles Reifsnyder; property, Mrs. Monroe Wantz; building, Mrs. Ardel Stonesifer; finance, Mrs. Bernet Arrington; evangelism, Mrs. William DeGroft; program, Mrs. Kenneth Feeser.

By visual aids a tour of missions of the U. S. was taken with the leaders, Rev. Mr. Reifsnyder and Noah Warehime. The group was invited to attend the dedication of the first unit of the new mission church of Rockville, Md. During the closing worship service Mrs. Baker was assisted by Mrs. Denton Wantz and Mrs. Grover Morelock. The business meeting was in charge of Mrs. Elizabeth Feeser. Refreshments were served by Mrs. Raymond Baker and Mrs. Thomas Baker.

Mr. and Mrs. Harry Lamberton, and family have returned to their home in Washington, D. C.

Mrs. Emma Rodgers, E. Baltimore St., spent several days recently with her sister-in-law, Mrs. Hattie Brown, Hanover.

Charles Flesher, Baltimore, spent several days this week with Mr. and Mrs. Clyde Wilhide, Keysville Rd.

Mrs. Blanche Callahan, of Haddon Heights, N. J., is visiting Mr. and Mrs. Ernest Bankard, Roberts Mill Rd.

Miss Ruth Preston, Baltimore, was a weekend guest of Dr. and Mrs. James Teeter and family, E. Baltimore St.

Mr. and Mrs. Paul Marks, of Palmyra, Pa., were Sunday dinner guests of Rev. and Mrs. Miles S. Reifsnyder, Baust Church.

A group from the EUB Christian Endeavor attended the Carroll County hymn sing Sunday evening at the Church of God in Carrollton.

Miss Mary Fringer, W. Baltimore St., and Mrs. Clyde Hesson, E. Baltimore St., attended the dedication ceremonies of the Lillian Brown Dodson, science hall and the R. Paul Smith, residence hall at Hood College, Frederick.

Mrs. Marion Rue, and son, George, York St.; Mrs. Fern Hitchcock, Franklin St., and Mr. and Mrs. Elwood Myers, and son, Kelly, of Uniontown, were weekend guests of Mr. and Mrs. P. W. Rue, Cambridge, Md.

Rev. Dr. Guy P. Bready, Frederick, and Miss Mary Fringer, W. Baltimore St., were Sunday dinner guests of Mr. and Mrs. Clyde Hesson, E. Baltimore St. .

Mr. and Mrs. Edward Sell and family, of Williamsport, Pa., spent the weekend with Mr. Sell's parents, Mr. and Mrs. Norris Sell, Antrim St.

Mr. and Mrs. Merwyn Wantz, E. Baltimore St.; Miss Margaret Shreeve, and Mrs. Emma Rodgers, W. Baltimore St., attended the dedication service Sunday of the new Hanover Home for the Aged in Hanover.

Gas cooking now accounts for 95 per cent of the more than 65 million meals served daily in public eating places and institutions.

Gas-fired incinerators can dispose of up to 60 pounds of garbage and waste in a 24-hour period. Smokeless and odorless, they handle practically everything except cans and bottles.

Fairfield

FAIRFIELD—The infant daughter of Mr. and Mrs. Chester Cornwell has been named Kimberly Anne.

Mr. and Mrs. Howard Plank, Hagerstown, visited Sunday at the home of Mr. and Mrs. Frank Weikert.

Frank M. Moore observed his birthday anniversary at his home Sunday. Visitors during the day included Mrs. Ethel Buckey, Baltimore; Miss Grace Rowe, Winchester, Va., and Mrs. Pauline Seabrook, Emmitsburg.

Miss Mary Harbaugh spent the weekend with her brother-in-law and sister, Mr. and Mrs. Frank Conrad, Waynesboro.

Miss Ethel Koontz, Aberdeen, Md., visited Sunday at the home of Mr. and Mrs. Joe Harbaugh and Miss Mary Harbaugh.

John P. Snyder, Cape Vincent, N. Y., is visiting at the home of Mr. and Mrs. Walter Crouse.

Mr. and Mrs. Edgar McCleaf and daughter, Columbus, Ohio, spent the weekend at the home of his mother, Mrs. John McCleaf.

Mrs. Olmer Spence is visiting relatives in Michigan.

The Junior Class of the Fairfield Joint High School sponsored a class dance in the high school auditorium Friday evening.

Mr. and Mrs. William Caskey and daughter, York, spent the weekend at the homes of their parents, Mr and Mrs. J. Warren Martin and Mr. and Mrs. Charles Caskey.

A meeting of the volunteer workers from this area for the Warner Hospital Drive will be held at the Fairfield High School Friday evening at 7:30 o'clock.

The Ladies' Auxiliary of the Fairfield Community Fire Co. will serve a roast pork and sauerkraut supper at the fire hall Saturday evening. Serving will begin at 4 o'clock. Games will be played in the evening.

Miss Ethel Grace Allison, a member of the faculty of the Hagerstown Junior College, represented that school at the dedication of the new science hall at Hood College, Frederick, Saturday.

Robert McCullough and children, Michael and Ann, Falls Church, Va., visited Sunday at the homes of Mr. and Mrs. S. L. Allison and Mr. and Mrs. Maurice McCullough, Gettysburg.

Mrs. Robert Fitez, president of the NCCW of St. Mary's Church, Mrs. Harry Kane and Mrs. Howard Reindollar attended the NCCW Deanery meeting held in Chambersburg, Sunday.

Stamp News

By SYD KRONISH
The Associated Press

Admiral William Brown, an Irish seafarer from County Mayo who began his famous career in Philadelphia and later led the Argentine Navy to many victories on the seas, is honored philatelically by the land of his birth with two new stamps. The adhesives commemorate the centenary of his death in 1857.

In 1810 when the Spanish-American colonies were in revolt, Brown threw in his lot with the freedom fighters. From small beginnings he created the Argentine Navy and led his forces to many successes over the Spanish fleets. These victories helped pave the way for the winning of independence by his adopted country.

Special ceremonies for Admiral Brown have been held both in Ireland and Argentina.

The new stamp bears a likeness of Brown and his dates 1777-1857. The denominations are 3 pence blue and 1 shilling 3 pence red.

Collectors in the United States may obtain first day covers of these stamps by writing to Irish Cachet Covers, 947 East 32nd St., Brooklyn, 10, N. Y. The cost per cover with a complete set of stamps is 75 cents. No envelopes are necessary.

• • •

Iran has issued two new stamps to honor the recent visit of the Italian president to Iran. The 2 rials shows the portraits of the Shah and the president flanked by flags of both nations. The 6 rials depicts the flags of Iran and Italy. On either side are scenes showing the ruins of Persepolis and the Colosseum.

• • •

To commemorate the completion of the first Japanese atomic reactor Japan has issued a special 10 yen purple commemorative stamp, reports the New York Stamp Co. The reactor constructed at Tokai-mura is pictured on the new stamp.

• • •

Here's how collectors may get first day covers of the United Nations Day stamp scheduled for issuance on Oct. 24. The denominations are 3 cents and 8 cents.

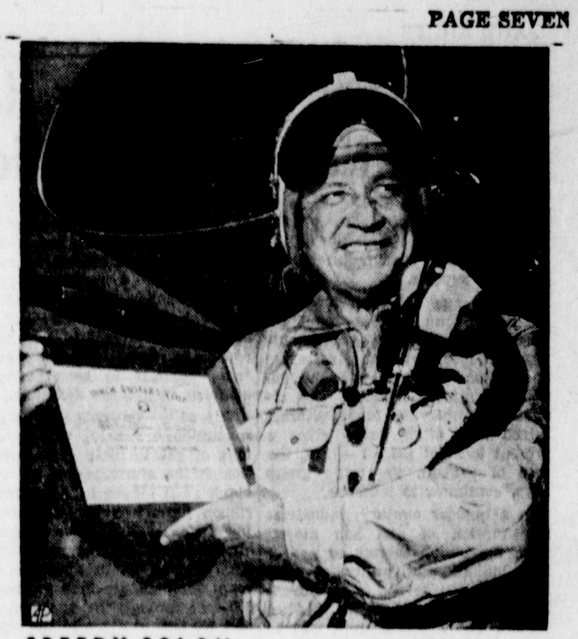

Send your unstamped envelopes to the U.N. Postal Administration, United Nations, N. Y., together with money order covering the cost of the stamps to be affixed. The denomination and quantity of stamps should be clearly marked in pencil in the upper right hand corner of each envelope.

The outside envelope should be clearly marked "First Day Covers — U. N. Day." Requests must be received prior to Oct. 24.

• • •

Argentina has issued a new set of two stamps honoring the centenary of Argentine railways. The 40 centavos brown shows an engine in use in 1857. The 60c green airmail depicts a modern engine.

Over 75 percent of all natural gas used here is piped in by long-distance supplier pipelines from Southwest U. S.

"You mean, you didn't know a gas range could be built in?"

See "Playhouse 90" with lovely hostess Julia Meade on CBS-TV. Watch local listings for time and station.

TV's glamorous Julia Meade couldn't quite believe it. "I was shocked to learn that some women actually didn't know that a Gas range could be BUILT-IN. Why, any kitchen—old or new—can have a built-in Gas range. You even have a choice of colors, stainless steel, or copper . . . 4 burners, 6 burners . . . one oven, two ovens if you like. And the surface units, the Gas oven, the broiler unit can be fitted into any counter or wall. Or you can get standard metal cabinets to fit any brand of built-in Gas range made."

See the sensational new automatic top burner heat control adjust the clean, blue Gas flame—automatically! Gas does it better for less.

All these famous built-in Gas ranges can be as automatic as you want:
Caloric * Florence * Roper * Suburban
Tappan * Universal * Western Holly
Magic Chef * Hardwick.

Here are the automatic features you can have: automatic top burner heat control . . . completely automatic gas ovens . . . automatic-lighting broilers . . . built-in griddles that regulate their own heat automatically!

Today's new Gas ranges are automatic all the way. Call your local Gas Company office for more information!

Use Of Gas By Industry Has Reached New Peak In Nation

The use of natural gas as a precision tool of industry has reached record proportions, the Gas Appliance Manufacturers Association reports.

Utilities now deliver natural gas to more than 108,400 industrial customers as compared with only 22,000 in 1932, the year gas started contending seriously for the industrial market. Adding the industries employing manufactured, mixed and other gases gives a present total of 126,900 — and the rate of growth, the trade group says, continues to increase.

In a quarter century, industrial consumption of gas has moved from 4½ billion therms to nearly 38.4 billion, and utility revenue from this source has risen elevenfold, from $90,674,000 to $1,059,000,000. The increase from 1955 to 1956 alone amounted to 13 per cent.

26,000 Processes

"These figures prove that natural gas has had a greater impact on the modern industrialization of America than any other single fuel, and most of this progress has been recorded in the past few years," the GAMA report says "Actually, there are now 26,000 adaptations of more than 2,500 individual uses of gas in the fabrication and production of almost every item required in the daily life of the nation."

Recently, GAMA's industrial equipment division polled principal companies in all leading U. S. industries to determine the multiple uses of gas and elicit details as to quantities used and opinions on the fuel's replaceability or indispensability.

A leading radio and television manufacturer reported that "the use of gas for glass firing of vacuum tubes is the only practical process for handling this fundamental operation." Of particular importance in this field is the employment of precise gas heat to fuse glass and metal.

No Storage Problem

Observing that "gas is safe, easy to handle and requires no investment for space or storage," a producer of surgical supplies said there is "practically no substitute for gas for melting resin or for inert gas generation or sprayed enamel drying."

Approximately 42 billion tin cans are manufactured in the U. S. annually, and almost all require gas heat treatment. A prominent firm in this field not only uses gas for tin can body making but also for large scale bean baking, a process that requires a rapid, dry heat, and for boiler steam generation. Its fuel utilization engineer described the versatility of gas as especially important in meeting rapid changes in heat rating to conform to process demands.

One of the nation's largest glass manufacturers said, "A precision task of gas in plate glass production is the annealing of the glass blank as it moves in a continuous ribbon through a lehr (glass-making furnace. The glass is gradually lowered in temperature from 2,400 degree F. to approximately room temperature in a journey of 300 feet through the enclosed lehr and 100 feet or more in the open."

Gas Processes

More than a thousand gas processes are used in the plants of a roller bearings manufacturer who reported that "'approximately 40 heat treating operations would be extremely difficult to replace with any other fuel."

A processor of a variety of materials, including paint and varnish, floor covering, cosmetics, confections, lubricants, chemicals and fatty acids, as well as foods, reported that gas figures in all instanes. He pointed out that the use of gas for puffing cereals and heat treating of metals is "highly preferable."

Chemical companies, GAMA says, are big users of gas. One of the main firms in this group employs something over 30 billion cubic feet of gas a year, both as a raw material and as a heat source.

Calls Gas Important

A leading business machines manufacturer called gas important in the preparation of protective atmospheres for copper brazing, carburising and sintering metal parts.

In the field of automatic controls for domestic and commercial use, a major firm acknowledged 10 vital uses of gas. These include annealing, tool hardening and tempering, metal finish processing, plastic molding, die casting, paint drying and brazing. "Gas is preferred here because it is a clean fuel, convenient of supply and easily controlled," the company said.

The mass printing of national "slick-paper" magazines is made possible by speedy gas drying of inks. The ranking greeting card publisher also reported this use of gas in drying sheets of cards after they have run through the presses. The same manufacturer employs great quantities of gas for a process in which a greeting design is coated with an adhesive, then sprinkled with a resinous compound and finally "backed" to obtain a facsimile of engraving.

Economy A Factor

Both elevator and automobile manufacturers make extensive use of gas. A top elevator producer told GAMA it uses gas for brazing, tempering, annealing, heating, preheating for welding, shrinking and metal finishing. "The cost of changing to electricity or other heat source would be prohibitive," the report said. "Gas is more economical, flexible and available." More than 80 different gas processes are involved in the assembly of an automobile. These range all the way from block-testing of engines to quick-drying of body paint.

A large-scale baker said, "We can get excellent zone heat regulation using gas as a fuel in our cracker, cookie and bread ovens." This respondent emphasized the value of gas in enabling the baker to produce and isolate various baking temperatures in different sections of the same oven.

Both the ferrous and non-ferrous metal industries are gas customers, the GAMA report shows. Gas is used to process steel, copper, zinc and manganese ores. A steel industry man explained that one of the most delicate uses of gas as a precision tool is in metallurgical laboratory analysis.

In the rapidly growing field of petrochemistry, natural gas is used both as a raw material and as a fuel. Last year petrochemistry produced approximately 30 per cent of the nation's chemicals. In 10 years this figure is expected to double, particularly in the production of ammonia, alcohols, plastics and fibers, synthetic rubber and detergents.

STUNNING NATURAL BIRCH KITCHEN with automatic built-in gas range and oven is typical of high-styling and modernity found in "all-gas" Blue Flame Homes. The built-in gas range and oven allow complete freedom in kitchen planning and blend perfectly with birch cabinets and natural woodwork. Besides affording fast, clean, uniform cooking, the gas-fired range and oven are as economical as they are practical—far less expensive than with other fuels.

Gas Heat Figures Reflect New Trend To Larger Homes

Gas-fired central heating equipment is keeping up with the trend to greater floor areas in new and remodeled dwellings. A study by the Gas Appliance Manufacturers Association, analyzing furnace and boiler sales over a five-year period, shows a market swing to units of higher capacity.

Five years ago 62.3 per cent of all gas-fired furnaces shipped by manufacturers were rated 75,000 or more BTU input per hour. Last year the figure was up to 77.2 per cent. It covers both the forced warm air and gravity types. The BTU, or British Thermal Unit, is a unit of heat.

In the case of residential models of gas-fired boilers for hot water and steam heat, units of 75,000 BTU and over increased their share of an expanding market from 78.3 per cent in 1952 to 88.5 per cent in 1956.

Keith T. Davis, chairman of GAMA's furnace division, and F. J. Nunlist, head of the boiler unit, said that in addition to larger dwelling size, factors behind the increase include:

Extend Heat Outlets

1. An upgrading of heating standards and a tendency to extend heat outlets to basements, sunporch, and other areas sometimes not included previously.

2. Increased availability of natural gas for heating in various northern regions of the country.

3. Inclusion of new heating systems in many modernization projects designed to provide additional rooms for growing families. Increased use of basements for recreation purposes prompts better heating for this area of the home

Davis, an official of the Carrier Corporation, and Nunlist, of the Mueller Climatrol Division, Worthington Corporation, commented: "To a certain extent, the trend toward larger dwelling units, better equipped, offsets the decline in housing starts. This, of course, should not divert attention from the country's need for more dwelling units to house a rising population.

Spectacular Gains

"The figures underline the fact that the spectacular gains of gas as a fuel for central heating are even greater than indicated in the figures on shipments and total number of users."

During the five-year period covered by the GAMA study, annual shipments of gas-fired furnaces rose from 463,700 to 812,600. For boilers, the 1956 total of 96,300 compares with 68,500 for 1952.

The survey brought out that gas-fired furnaces of 75,000 or more BTU capacity but less than 100,000 accounted for 41.3 per cent of units shipped in the latest year. The figure is lp from 34.9 per cent in 1952. The next higher capacity, 100,000 to 150,000 BTU, rose from 23.6 to 31 per cent, and for 150,000 and over the gain was from 3.8 to 4.9 per cent.

Every one of the capacity classifications of 75,000 BTU or higher held even or increased its relative share of the gas boiler market. In the latest year, boilers in various capacities between 75,000 and 150,000 BTU accounted for 59.9 per cent of all units shipped. Units of 250,000-and-over BTU increased their share of the total to 14 per cent, reflecting widespread use in multi-family structures.

It was noted that a continuing trend toward compactness in gas-fired central heating equipment permits owners to utilize units of greater heating capacity while giving up relatively little space for this purpose.

DECOR PLANS DEPENDENT ON GOOD HEATING

Flowers and furniture have a lot to do with furnaces. And whatever the homemaker's decorative talents, she can accomplish only about as much as her heating system will let her.

Thus, says the Gas Appliance Manufacturers Association, appearances as well as performances are a major factor behind the tremendous surge in home heating modernization. People don't merely want to keep warm, comfortably and economically They want to do all that, but do it in style.

Modern style in home furnishings make more demands than ever on heating, GAMA points out. The trend is to wide-sweep large open spaces, and use of light colors and other devices to give the illusion of space when it actually is limited. Space-saving features, freedom from dust and grime and noiseless operation take on special importance.

Instead of a few scattered plants, a few windows and a few curtains, the modern living room may have a "planter" lineup of live greenery, an expanse of picture window, concealed after dark with draperies. Uneven or inadequate heat, or bulky old-fashioned heat distribution units limit decorating possibilities, says GAMA.

Sometimes household storage problems lap over into living quarters so badly that an older home takes on a warehouse sort of look — definitely not recommended with modern trends of coordinated decorating. The space-saving qualities of new heating equipment may be a big help. Gas furnaces and boilers have been made more and more compact, it is pointed out, and often are tucked away in closets or become part of utility room lineups.

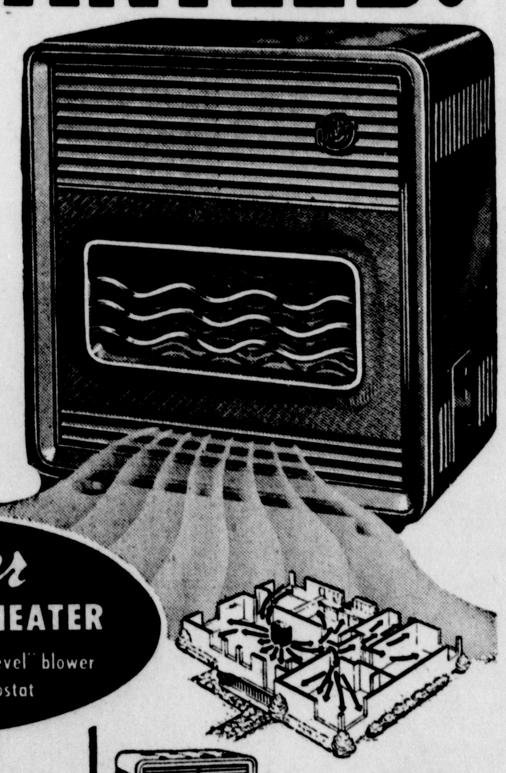

Gas wall and floor furnaces take up practically no living space at all, while compactness and furniture styling feature many lines of direct heating equipment.

Additionally, upgraded heating gives more flexibility to furniture placement. There's no greater freedom of choice — obstacles are removed and prospective locations no longer need be rejected as too cold or too hot.

Widespread use of automatic heat controls marks the most prominent advancement in late-model gas ranges. Many ranges feature automatic temperature devices on both top burners and griddles.

Latest Gas Clothes Dryer Eases Work For Housewife

Say, Mrs. Homemaker, ever let your husband hear — in miles walked, pounds lifted and time wasted—just how much work you do in a year drying the family laundry?

Well, the next time your spouse starts the old refrain—"you wives have it easy with your modern appliances"—cite him a few statistics.

That is, of course, unless you own a gas clothes dryer. If not, these washday facts probably apply to you:

(1) You're walking 40 miles a year along a three-mile-long clothes line a gas dryer would eliminate.

(2) You're lifting yearly 2½ tons (or a good-sized milk truck) of laundry.

(3) You're wasting 20 work days every year because a gas dryer is 15 times faster than a clothes line.

Removes Wrinkles

(4) Your ironing time is much longer—even weekly because a gas dryer's damp-dry action takes wrinkles out of towels, cotton knits, flannels and corduroys. And that time wasted sprinkling clothes before ironing is eliminated, too

Now let's look at it from a financial standpoint. Your hubby might like to know the family budget can really suffer without that automatic gas dryer.

Here's how. Regular clothes-line drying wears, fades and tears clothing—a dryer saves clothes by prolonging their life. And then, too, more clothes are needed in every wardrobe and linen chest because clothes-line drying takes longer . . . everyone waits longer for a clean supply.

How about your disposition, Mrs. Homemaker? Naturally it suffers without a gas dryer. When the weather is bad, you can't get the drying job done. And that often means someone is without an important item at a crucial time! That awful delay irritates the family . . . and you! With a dryer the weather's always perfect.

Incidentally, Mrs. Homemaker, stringing out those three miles of clothes line a year often puts you out in the open in damp weather. Don't let hubby overlook that! Sniffles and sneezes that go with hanging out the laundry disappear with a gas dryer.

So get together with your husband soon. It's time you saved yourself miles of weary walking, bushels of heavy weight, days of needless work and even medical bills.

• See your competent gas appliance dealer and let clean, economical and safe natural gas work for YOU!

NEW KITCHENS EFFICIENT AND HAVE MORE ROOM

In days of yore, the "efficiency kitchen" pretty much meant the small, compact kitchen. It signified revolt from the endless cleaning, needless walking and tiresome chores of the old-fashioned big kitchen.

But today's trend to larger kitchens, says the Gas Appliance Manufacturers Association, is producing efficiency far beyond anything that could be hoped for in the smaller ones. It's sort of a counter-revolution, made possible only by improved appliances and fixtures, better design, and the countless advances in various furnishings.

Everything in the room is bright, pleasant, easy to clean — and modern appliances fill this bill in every respect. Whatever the material and surfacing selected for wall, floor, counter and cabinets, they meet the easy-to-clean requirement so thoroughly the homemaker needn't worry about having a wider expanse of them to contend with.

Automatic Control

Automatic control features on the modern gas range add more free time — and the desk, telephone and other items that have moved kitchenward in recent years help use it to better advantage. The old sense of isolation is lost as the kitchen blends with family living and recreation areas.

Quite aside from all the gain in gracious living, the larger kitchen makes real contributions to efficiency as the engineer knows it, getting more done with less effort. Here are some of the ways this is done:

1. Less crowding means less fatigue. Nothing is more tiring than trying to work without elbow room, because you have to think constantly both of what you're trying to do and what's in the way to keep you from doing it.

2. Counter space can be arranged to provide ready help for whatever job is at hand.

Adequate Storage

3. Adequate storage eases many tasks, simplifies shopping, and permits wide choice in use of prepared foods. A new gas refrigerator can help in this respect, as well as the new cabinets.

4. Monotony, a prime cause of fatigue, is defeated. The best modern kitchens, for all their built-ins, leave plenty of room for shifts in furnishings as times and moods dictate. They're linked to the outdoors through a good view, and to the rest of the house by an open, easy-flow sort of design.

And so, concludes GAMA, the larger kitchen, and particularly the kitchen combined with a family room, draw favor for solid reasons. They're proving that efficiency and elbow room really do go together.

"EASY AS APPLE PIE" becomes full-flavored reality when baking is done in the clock-controlled oven of a modern, matchless gas range. Pies, cakes and baked goods are done to perfection, thanks to complete circulation of constant, even heat. See how easily this 30-inch oven handles six pies at once. Other features include clock controls, adjustable racks, oven insulation and thermostatic controls. Ask for a demonstration at any gas appliance dealer store.

HOMEMAKERS PLEASED WITH SERVEL BOX

Homemakers who have inspected the Servel gas refrigerator at gas appliance dealers are already sold on its styling, roomy freezer, food storage space and automatic icemaker.

But the question sometimes arises, "How long will a gas refrigerator last?" And "How does it hold up over long use compared to other type refrigerators?"

Actually, no one knows how long a gas refrigerator will last. The first ones came out 25 years ago. Any many of them are still in use. Significantly, the ten-year guarantee is twice as long as that offered with any other refrigerator.

Preserves Food Better

The ten-year guarantee is possible because gas refrigerators have no moving parts to wear out, break down, rattle or vibrate. A tiny blue flame does the whole job, silently, efficiently and automatically.

The smooth, silent operation preserves food much better because it is continuous rather than an on-again, off-again system. Unlike a motor-driven refrigerator, it maintains a constant cold in every zone.

Meats and frozen foods retain their flavor longer in the dry cold of the frozen food locker. Dairy products, ready-to-serve dishes, leftovers and opened jars are protected from drying out.

The most revolutionary feature is, of course, the automatic icemaker that makes ice cubes without trays and drops them in a never-empty basket. When you remove cubes the unit refills the basket.

Cite Ten Features

Why is the Servel refrigerator so different from other makes? Here are a few of the reasons:

1. No moving parts to rattle, vibrate and wear out.
2. Lowest operating cost of any refrigerator.
3. Complete silence of operation.
4. Long life, covered by a ten year warranty.
5. Dependable, uninterruped operation.
6. Constant supply of ice cubes.

With Servel's exclusive absorption system, there are no moving parts in the freezing system to wear out or be replaced. That also accounts for its long-life silent operation and low operating cost.

Servel's famous "ice server" is the only refrigerator that makes ice cubes automatically and drops them dry frozen into a never-empty basket ready for instant use.

Because the Servel is fueled by a tiny blue gas flame, it can't be knocked out by electrical storms or power failures. There's no costly spoilage of foods—another big savings.

Railroad Men Are Considered Most Time-Conscious In World

By JACK MAGUIRE

If there exists an inseparable partnership in railroading, it is between a railroad man and his watch. In a job where seconds have to be met accurately, interpreted precisely and acted upon exactly, the bulky watch appended to the heavy gold chain has made railroaders the most time-conscious individuals in the world.

• • •

A railroad man buys his own watch and must pay for its upkeep. Its type, design and precision, however, must meet the unvarying rules of his employer. Among other things, it must have an open face, a crystal that is unmarred and a jeweled movement that doesn't vary more than thirty seconds from absolute accuracy in 168 hours. To make doubly sure that it is accurate, its owner is required to compare it daily with a standard mercury clock or with the watch of another employe who has made such a comparison recently.

• • •

It was 74 years ago this month that a good watch became a necessity to train operation. On November 11, 1883, the American railroads gave standard time to the nation. Before that, each section of the country set its clocks by local or "sun" time, a calculation based on the sun's passing the highest point overhead — the local "noon." Since noon occurs about one minute later for each thirteen miles of westward movement across the country, the time a train used to arrive or depart was dependent on its point of origin or destination.

• • •

Even with a good watch, the pre-1883 railroader had to be a minor mathematician to calculate with reasonable accuracy the time of his train's expected arrival at destination. To aid travelers of the period, **Appleton's Railway and Steam Navigation Guide** (predecessor of today's **Official Railway Guide**) published a "Time and Distance Indicator." Tis was an elaborate table which represented the time and distance from New York and Washington, D. C., to the principal cities east of the Mississippi River. By comparing the local "noon" time in Washington, for example, with that of St. Louis and subtracting the difference, the traveler could get some idea of about when he would arrive. But at best this was an educated guess.

• • •

The man who did more than anyone else to get standard time adopted never saw a railroad watch. He was C. F. Dowd, principal of the Temple Grove Young Ladies' Seminary in Saratoga Springs, N. Y., who, in 1869, began a one-man movement to standardize the nation's clocks. Professor Dowd proposed four time belts across the nation, using the Greenwich meridian as a base. Next, he carefully calculated the correct local time, based on longitude, for each of the nation's 8,000 railway stations. He published his findings in pamphlet form and mailed a copy to every railroad executive in the U. S. Three years later, the railroads began the move that was to standardize time across the continent.

• • •

The railroad watch, in its modern version, was not to come until eight years after time was made standard. On April 10, 1891, two trains rammed together at Kipton, Ohio, and eleven people died. Investigation showed that the wreck might have been averted except for the fact that the watch carried by one of the engineers was slow. Worried by this tragedy, Webb C. Ball, a watchmaker and railroad enthusiast, concluded that fine watches with perfect accuracy were necessary. He designed the first standard railroad watch and set up the industry's first coast-to-coast watch inspection service.

• • •

Long before the railroad watch was designed, other watchmakers were making contributions to railroading. James Watt, the Englishman who is credited with launching the age of steam, was a watchmaker. So was George Stephenson who in 1825, built the first practical steam locomotive. Five years later, Phineas Davis, a York, Pa., clock mender, built in York, the nation's most powerful locomotive at the time, and went on to become chief mechanical officer for the Baltimore and Ohio. Matthias W. Baldwin, founder of the great Baldwin Locomotive Works, was an early-day watchmaker.

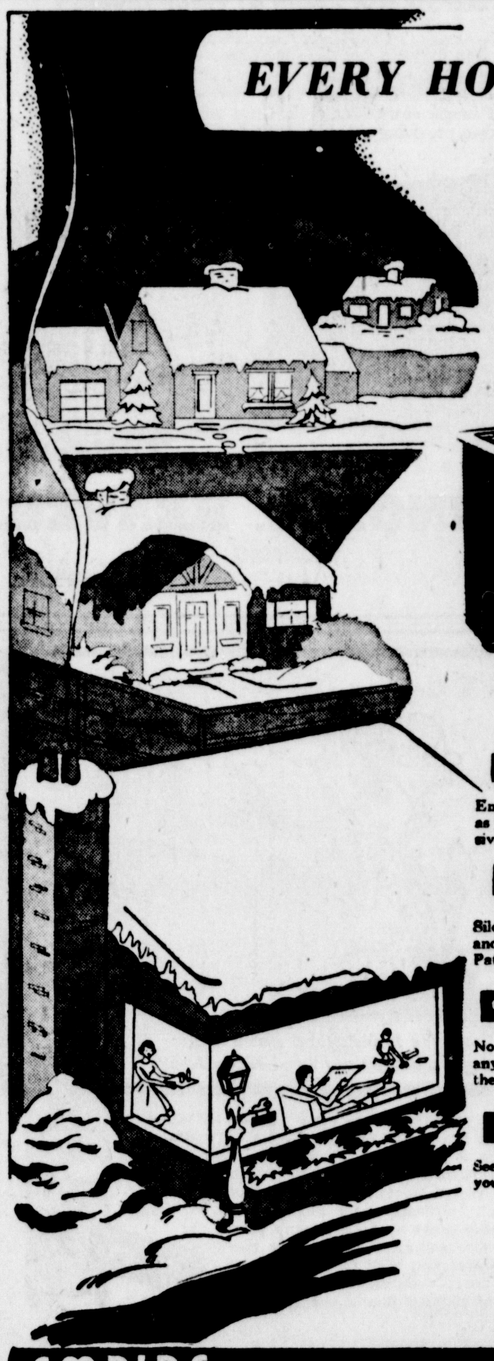

• • •

The partnership of a railroad man and his watch is less specific in this age of centralized traffic control than it was in the days of single track, train order railroading. Still the average railroader wears out the watch pocket of his uniform while the rest is still good. As any railroader will agree, shortwave radio and train dispatching by electronics are necessary today. However, it's the big gold watch with the black Arabic numerals and the sweeping second hand that still brings the train into the terminal "on time."

OFFER NEWEST CONTROLS

Even an old furnace or boiler can operate with the newest automatic controls when a gas-fired conversion burner is installed, the Gas Appliance Manufacturers Association points out. The home owner can benefit from newest design features in controls built into the burner and also in the the thermostat in living quarters.

EVERY HOME CAN AFFORD AN EMPIRE gas FLOOR FURNACE

NO BASEMENT NEEDED!

HEAVENLY WARMTH . . . LOW COST!

Enjoy clean, uniform healthful heat . . , save money as you modernize with a New Empire! Easy, inexpensive to install. Burns thrifty, odorless, fume-free *gas*.

SILENT . . . SAFE . . . CAREFREE!

Silent as a kitten . . . no boom, no bang! Set controls and forget them. No coal to shovel, no ashes to haul! Patented *Thriftmatic* Burner is absolutely *safe!*

CLEAN . . . HANDSOME . . . ECONOMICAL!

No more ugly oil film! Floor-level register beautifies any room. Practically no servicing needed. Burns just the right amount of gas for *warmth* without *waste*.

FOR NEW HOMES . . . FOR OLD HOMES!

See how Empire can solve *your* heating problem. Visit your dealer today. Absolutely no obligation.

Queen Of Wild Frontier Is Today's Modern Homemaker

Davy Crockett may have been the King of the Wild Frontier a hundred and fifty years ago, but what about Mrs. Crockett What was her life like? Pretty rugged, you can be sure of that.

Home was a rough-hewn log cabin, furnished with only the bare necessities. For household aids, Mrs. Crockett had only her own two strong hands. She cooked over an fire, washer the family in the nearest creek, and seldom had a moment to herself.

But that was a century and a half ago. The Crocketts have come a long way since then. To be sure, young Davy is still King of the Wild Frontier, but he's even wiser to the ways of Indians, thanks to the modern television set in the living room.

And Mrs. Crockett keeps house in a modern miracle of glass and steel, wood and brick. She has plenty of leisure, too. In fact, she's Queen For a Day—every day—thanks to the array of modern, fully automatic gas appliances ready to do her bidding.

Use Gas Appliances

Instead of the nearest creek, Mrs. Crockett does her family's laundry in an automatic washing machine and gas dryer—and without ever having to leave the kitchen. It's no chore at all to do an entire week's wash, including folding and putting away, in a matter of hours. And because the washing and drying is completely automatic, Mrs. Crockett is free to perform other household tasks while her push-button servants take over the laundry chores.

Cooking over an open fire was a far cry from today's fully automatic gas range cooking. Mrs. Crockett no longer has to chop the wood, carry it to the house, lay a fire, and struggle to keep it going. She merely twists a knob and a tiny blue flame responds instantly. If she wants to, she can set her automatic timing device to control the burner unit and shut it off automatically when she dictates.

Automatic Timer

If it's an oven meal, Mrs. Crockett has another automatic timer at her command. This enables her to prepare an entire meal hours ahead of time, place it in the oven, set the clock, and forget it. The automatic timer will start the oven at an appointed hour, and shut it off the time indicated by Mrs. Crockett. She, meanwhile, is free to take the afternoon off, secure in the knowledge that her family's dinner will be ready when she returns hours later.

Laundry and cooking are but two of the seven basic requirements for comfortable living which have been pioneered by the gas industry. House heating, hot water heating, incineration, refrigeration, and air conditioning, are the other five. And there are literally hundreds of modern appliances which help make our standard of living the highest in our history.

New Frontier

The Wild Frontier of a century ago has been replaced by the New Frontier of Modern Living. Mrs. Crockett and young Davey were too preoccupied with the rugged chores of every day life to dream about life a hundred or more years later. But you who can look back on a century of progress—can you predict what it will be like a hundred years from today?

Probably not. But one thing you can be sure of. The gas industry will play an important role in bringing us the miracles of the future.

WASHER-DRYER

Like ham and eggs, today's washers and fully-automatic gas clothes dryers go together. The gas dryer finishes the job the washer starts, turning out clothes dried so perfectly and gently that fabrics last much longer.

Besides being easy on clothes, today's "penny-a-load" gas dryers are economical to operate, too . . . much more so than any other type dryer.

Twin washer-dryer units are available at all gas appliance dealers in this area. If a combination unit is desired, ask to see the new Bendix "duomatic."

ASSURING YEAR-'ROUND COMFORT in the home is this two-ton Servel "all year" air-conditioning unit, fired by natural gas. Providing cool air-conditioning in summer, and gas heat in winter, it is a crowning feature of all Blue Flame Homes. A real boon to family health, the "atmosphere control" system de-humidifies the air, eliminates dampness, dust and pollen. Gas air-conditioning means cleaner homes and more economically operated homes, too. Furnishings and decorations remain cleaner and in good condition much longer. The system is designed for use in homes already built as well as in new homes.

AUTOMATIC TOP BURNER FIGHTS BATTLE OF W'S

Automatic top burner heat controls in the new gas ranges drastically reduce the tiresome "three W's" of cooking.

The three W's are Work, Watch and Wait. Maybe some people would just call it all work — and you certainly couldn't call it play. But analysis of many cooking operations shows that much time and energy is lost just waiting and watching, points out the Gas Appliance Manufacturers Association.

Until the uncanny automatic top burner heat control came along, the homemaker had to spend too big a part of her life just waiting for food to reach a desired temperature. Other minutes daily — growing to many hours over the course of a year — had to be devoted just to watching to see that things stayed at the right temperatures, without burning, drying out or boiling over.

Often the cook didn't dare go more than a few steps from her chore. And certainly she couldn't concentrate much on anything else.

Automatic top burner heat controls change that whole picture. A temperature is dialed, and the utensil and its contents reach that temperature and stay within a few degrees of it, for as long as is desired. It may be a high temperature for deep fat frying or a low one for cooked custard or soup. The "burner with a brain" will do all the work. The flame will rise or fall, all by itself, in answer to the demands from a sensing element.

Reduce Stirring

Where stirring usually would be required, the need for it is greatly reduced, and sometimes even eliminated, with the automatic top burner. The home maker doesn't have to stand and watch. She can broaden the range of her activities while meals cook, sit down with a cup of coffee, go see what the younger set is up to out in the yard.

Automatic top burner heat controls do more than just substitute for the homemaker's "watch and wait" time. They do the watching, waiting and flame adjusting far more accurately than the human wrist possibly can. Thus it can do things, in the new gas range, that just couldn't be done otherwise.

Foods can be kept warm an hour or more. Tasks such as caramelizing of sugar, ordinarily exacting chores, become simple and sure-fire. The fact that 80 per cent of all home cooking is done on top of the range assures frequent use.

FIRST U. S. GAS RANGE

The first gas cooking range was produced by James Sharp, an Englishman, in 1832. The first American gas range was built about 1850. At the beginning of the Civil War only a few hundred families in America were cooking with gas. In 1950 more than 3,100,000 gas ranges were sold and it was estimated that nearly 30 million families were using gas for cooking.

Health experts state that no other disposal method gets rid of garbage and waste as quickly and thoroughly as a gas-fired incinerator.

GAS DRYER WILL SOLVE "RAINY DAY PROBLEMS"

New automatic gas clothes dryers seem like miracles after the endless drudgery of hanging out washings 52 times or more a year.

Gas appliance dealers of this area point out five ways that automatic gas dryers save the homemakers money and hours of unnecessary labor. They are:

1. Economical. A "penny-a-load" gas clothes dryer costs less to operate than any other dryer, often up to four times less.

2. Dependable. A gas clothes dryer is the most dependable, reliable dryer on the market. Lightning storms don't phase its drying action. It's always safe, sure and successful.

3. Saves time. Much faster than other automatic dryers, the gas dryer turns out lightweight ready to iron fabrics in 15 minutes or completely dry in 20 minutes.

4. Saves clothes. A gas dryer is kinder to clothes than any other method. It doesn't over-dry and weaken fibres. Uniform heat, possible through gas, is the perfect answer.

5. Completely automatic. All you do is dial the required drying time and heat you want. It goes on by itself. During the last few minutes the heat shuts off and dries clothes with stored up heat.

There are dozens of other reasons why homemakers will want to inspect a modern, automatic gas clothes dryer at local appliance dealers. Dealers are pleased to demonstrate their gas dryers.

It Pays To Keep Heater Pilot On

A burning question in millions of U. S. homes every springtime is "Should the pilot light in our gas furnace or other heating equipment be kept on during the summer?"

The answer, says the Gas Appliance Manufacturers Association, is, "By all means, yes!" It will pay dividends in comfort and savings.

GAMA points out that the constant burning pilot will keep the heating equipment dry during the summer, preventing rust and thus prolonging its life.

The comfort pay-off comes in the fall at the first sign of cold weather. That's the time when so many people want their pilots relighted that it's almost impossible to pay prompt attention to all service calls.

On the other hand, if your pilot has been burning year round, all you do is turn up your thermostat and the quick comfort of gas heat is yours.

Incidentally, the cost of keeping the pilot on all the time is hardly noticeable in your gas bill, a fact that's appreciated in many communities where, GAMA reports, more than 70 per cent of all heating customers on the gas companies' lines keep their heater pilots lighted throughout the summer months.

DAMP-DRY CLOTHES

You can begin your ironing before your washing is done with a gas clothes dryer. Sound impossible? Here's how: Simply "damp-dry" all items that require ironing. Taking them "damp dry" out of the dryer saves sprinkling time, makes them easier to iron. As they require less drying time, you can begin ironing while the rest of the load is still in the dryer.

CLAIM SERVEL ICE CUBES ARE CHEAP TO MAKE

The modern answer to one of man's oldest problems—the safe and convenient storage of food—is demonstrated in the Servel "ice server" gas refrigerator.

Cooled by energy from a tiny blue flame, it's the only freezing system that is both continuous and automatic.

Designed for economy as well as comfort and convenience, the attractively styled Servel gas refrigerator has a spacious freezing compartment, varied low temperature zones and the new magic "ice-server."

An unlimited supply of sparkling "dry cold" ice cubes flows from the futuristic ice-server without the muss and fuss of ice cube trays. As one ice cube is removed, another is produced automatically to replace it.

The huge freezing locker has helped to bring about a new way of life in the American home — the more extensive use of handy frozen foods in the family's menu.

Is "Storm Proof"

One of the big blessing is that it's 100% "storm proof" — won't be knocked out of action by a violent wind or electrical storms with resulting spoilage of food and milk.

Along with dependability, the gas refrigerator has convenience and efficiency built right in. There are adjustable shelves that can be made to fit the needs of each household.

Over three million families have gas refrigerators today. And, year after year, thousands more install new automatic gas refrigerators to give the modern touch to their homes.

Good Gas Burners Fit Specific Jobs

Just what shape of flame would work best in your furnace or broiler converted to gas heat? How high should the flame be, and how much should it be spread out?

Those are some of the questions that can be answered precisely and solved by just the right type of gas conversion burner, points out the Gas Appliance Manufacturers Association. There's broad selection in many aspects besides that of size, or heat input.

Thus it is that just about every existing heating plant, if in good condition, can be converted to gas, regardless of its size, shape or capacity. Automatic control features, such as now part of the finest new heating systems, are proiveded.

The user gets instant benefits in silent, efficient operation with a clean, complete-burning fuel. In many cases elimination of fuel storage space will permit new household projects for recreation and other facilities. Besides fuel economies, there are important savings in maintenance costs.

Now at last you can DRY your clothes in smooth, sparkling STAINLESS STEEL guaranteed for life

the NEW '58 Golden Anniversary SPEED QUEEN GAS DRYER

Definitely the GREATEST dryer of all time!

Home Automation Helps 20 Million Women Hold 2 Jobs

If you don't see any connection between gas appliances and the fact that today nearly 20,000,000 American women hold jobs in business and industry, the Gas Appliance Manufacturers Association does.

To get the connection, GAMA says, all you have to do is find out why women work. According to various census and sociological studies consulted by the gas equipment people, women work for at least four main reasons:

One, necessity. Two, because social pressures require keeping up personal and community living standards. Three, to avoid or reduce housework. Four, to occupy their time.

The offerings of the gas appliance industry, GAMA says, have a bearing on all four reasons, and vice versa.

Economical Tools

If a woman works because it's necessary, then GAMA claims it's just as necessary that the things she buys with her earnings be efficient and economical, not only in terms of original costs but also as to upkeep.

As to appearances and living standards, what's called for in labor-saving equipment today is modernity and automation as well as attractive and functional design. Here again, GAMA points out, gas appliance manufacturers have profited by taking a cue from their customers and by leading the way in designing compact, easy-to-live-with equipment for kitchen, laundry and basement.

And speaking of the third and fourth principal reasons why women work—to cut drudgery and occupy their time—GAMA points to the 30 or 40 automatic controls that activate the battery of appliances in a completely gas-equipped home.

In the course of a single year, a working woman discovers she can save hundreds of hours of housework via the "set it and forget it" features of today's gas ranges, clothes dryers, central and room heating equipment, refrigerators, water heaters and incinerators.

For example, there's the automatic top burner heat control—the "burner with a brain" on the gas range that holds heat to within two degrees of a pre-set temperature for any kind of top-of-the-stove cookery—and there are the established oven time and temperature controls that eliminate pot-watching.

Modern Heating Systems

Then, GAMA says, there is the compact modern gas heating system—furnace or boiler—that eliminates janitoring and controls comfort automatically through day-and-night settings of a thermostat.

A grievous time and energy consumer was the old-time tub-and-washline laundry routine. Nowadays, the washing machine and gas clothes dryer—they can be had in a single unit—take the backbreak out of laundering, and built-in controls take care of the timing.

Automatic gas water heating is so automatic that users are inclined to forget this all-purpose blessing. While many people leave the temperature dial at its original setting, most housewives with outside jobs have learned the advantages of changing the setting to produce water at just the right temperature for laundering, hand or mechanical dishwashing, personal hygiene and general housekeeping.

Finally, GAMA says, there's the gas incinerator to simplify the job of garbage disposal and elimination of all types of combustible trash.

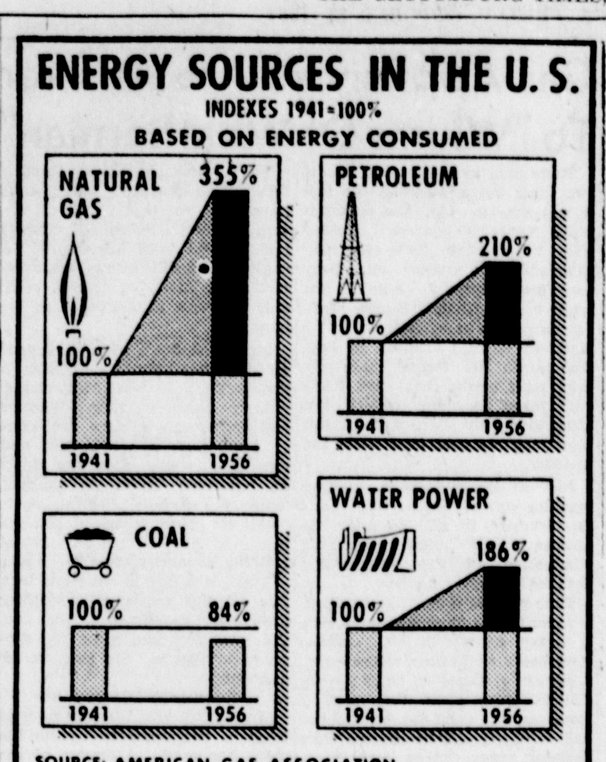

HOT WATER FOR OUTSIDE CHORES

If you've just discovered the joys of an outdoor hot water connection with mixing faucet, you're probably wondering how you ever got along without this inexpensive home improvement before you had your plumber install it.

As each season rolls around, you'll find more reason to enthuse as you note that hot water reduces the time and labor involved in once-despised seasonal chores, says the Gas Appliance Manufacturers Association. For example, you'll be able to clean garden furniture, the patio floor and window screens in record time by hosing them down with hot water.

GAMA suggests adjusting the temperature of your automatic gas water heater to 130 degrees for these and similar clean-up jobs, all year round.

Like gleaming skillets on a wall, many modern appliances feature the attractive glow of metal finishes. For example, copperstone, chrome and stainless steel are used in various parts of convention gas ranges and gas built-ins. Such finishes blend with almost any background,

CONSUMPTION of natural gas in the United States increased 9.6 percent last year to a record 10,115 quadrillion Btu's (the usual unit of heat measurement). Natural gas accounted for 24 percent of the nation's total energy consumed in 1956, without including liquids extracted from natural gas. Although natural gas consumption last year was 3½ times as much as 15 years ago, proved reserves are at an all-time high.

MISS LEAPHART GIVES TIPS ON BUYING RANGE

By MISS LEE ANN LEAPHART
Home Economist
Manufacturers Light and Heat Co.

In a lot of ways, choosing a gas range is like buying a new hat. You love them all, but keep looking for one which suits you best. If you like to fuss with fancy pastries and delicacies you'll want the gas range with the double oven If you entertain a great deal and lean toward broiled foods, the two-broiler range is your ticket.

We know through surveys that 80 per cent of our cooking is done on top of the stove. So the number of burners is important. You can buy an eight-burner range . . . burner arrangements staggered, clustered, with divided top, or arranged along the back.

"Silent Helper"

If you work or are socially active, you undoubtedly spend a great deal of time away from home, and the clock control, which turns off and on automatically, is your silent helper.

Hidden values are the many virtues a gas range might have which don't always meet the eye at first glance. Have your dealer point them out to you. Ask to see specification sheets. Check the range's insulation most carefully . . . it's important.

Color is the keystone of the modern gas kitchen. Today's gas ranges come in a wide variety of colors and decorator's tints, making them not only economical, efficient and dependable, but highly attractive as well.

Remember to look on the range for the seal of the American Gas Association Laboratories, which means the range has been fully tested and approved.

If you are buying a matchless, automatic clock-controlled gas range . . . as most modern housewives are these days . . . it may also bear a circular "Certified Performance" seal of the Gas Appliance Manufacturers Association.

How much to pay is naturally up to the individual homemaker. Sometimes, however, it's smart to pay a little more if in return you get the invaluable benefit of time saved and labor reduced.

Think of your new gas range as an investment (which it is). The proper choice cannot help but pay big dividends in modern living for you and your whole family.

After you buy your new gas range, I'll drop in at your home to make sure it's operating properly and show you a few ways how to get best performance. Be seeing you.

SUNPORCH OR GREENHOUSE

A modernization project can turn into a lifelong hobby. That's the experience of many home owners who have added facilities permitting them to grow tropic plants the year-round. Whether he's a green-thumber planning a full-fledged greenhouse, or just someone thinking about a glassed-in sunporch, the home improver can find his gas heating dealer helpful. Gas is heating an ever-increasing number of commercial greenhouses.

RETAINS JUICES

Careful laboratory tests prove conclusively what many a camper has known all along—that flavorful meat juices are retained more effectively when the item cooked is turned on a spit. Rotisseries, used in greater number in the new gas range lines than ever before, provide a convenient way of securing this advantage. Economy is another benefit; the housewife with a rotisserie-equipped gas range is in an especially good position to take advantage of seasonal bargains in meat and poultry.

WORKS HARD IN HOSPITALS

Gas is hard at work in the nation's hospitals, points out the Gas Appliance Manufacturers Association. It helps these institutions meet their exacting demands for cooking and heating, and provides the oceans of hot water they need. Gas-fueled air conditioning, refrigeration and incineration services are important, too, and gas dryers help with the huge laundry problem. Hospital laboratories depend on the famous gas Bunsen burner for many tasks, and in some cases gas fuels emergency power generating equipment.

BURNER CLEANING IS EASY

Making burners easier to clean has been one of the major design achievements of gas range manufacturers. The new burners, sometimes combined as a unit with drip pans, lift out readily, snap back in place just as easily after their trip to the sink, and make an easy job out of what sometimes used to be a messy operation.

OUTDOOR PAGEANT — **Townsfolk costumed as Roman legionaries take up positions before huge cross prior to start of Passion play at Sezze Romano, south of Rome. Almost entire town of 3,000 takes part in three-act, 45-tableau pageant.**

Because it adapts itself to zone and intermittent heating, natural gas is the ideal fuel for heating churches, schools, hotels, hospitals, municipal buildings and other public buildings.

A gas clothes dryer is easier on clothes than any other dryer or drying method. It doesn't over-dry and weaken fibres. Uniform heat, possible thorough gas, is kind to clothes.

MULTI-FURNACE HOMES

The practice of using two gas-fueled forced warm air furnaces in a single large dwelling is spreading, says the Gas Appliance Manufacturers Association. Sometimes even three or more are used. Savings in ducts help offset the cost of the equipment, and different temperatures may be maintained in the separate zones. Air conditioning may be added to either or both installations.

ENDS BACK YARE HAZARD

A back yard becomes safer as well as better looking when a gas dryer permits elimination of clotheslines. There is a long record of accidents resulting when persons walk into lines, or when clothesline poles break or become uprooted under the burden of wind-whipped loads. Another hazard is that young children, kept from their usual back yard play, may seek out less safe haunts.

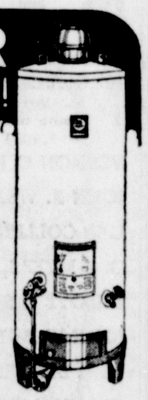

NO BASEMENT NEEDED

Gas fueled floor furnaces offer special advantages in compactness and ease of installation. Theydo not require basements, and only a small space is needed below the floor level. Shallow models extend but two feet or so below the floor.

"STORES UP" COLD

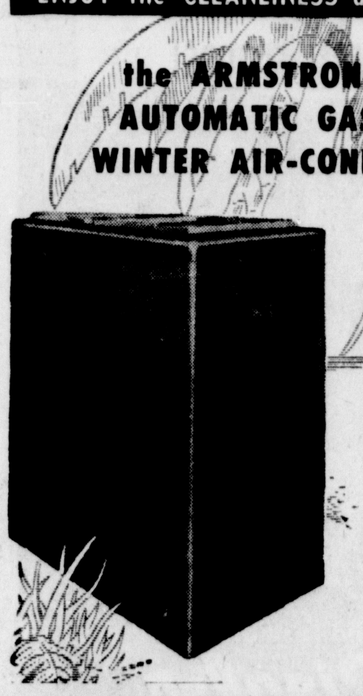

Gas-fueled water chiller units can, in effect, "store up" cold for most effective service in buildings used only during limited hours, such as churches and auditoriums. A quantity of water is brought to a low temperature in advance of the time the building is to be used, then is circulated for air conditioning.

New Gas Equipment Making Life Easier And Homes Better

Latest features in the new lines of gas appliances and equipment help make life easier and more comfortable for all the family. They show a continuing trend toward automation in the home, and toward design for good appearance as well as high performance.

The variety in sizes, styles and finishes is greater than ever before. Use of automatic controls, to save time, trouble and fuel, is at an all-time high. And there are a number of special features designed to make it easier for the home modernizer to gain the same advantages afforded those moving into brand-new homes with the latest gas equipment.

Gas and gas equipment are helping provide the older home with the gleaming new kitchens, the smart basement game rooms, the compact, efficient laundries and utility rooms, so popular in the newest dwelling.

Save Time Two Ways

The new gas ranges, available in a growing array of sizes, styles and finishes, save the homemaker time while she's cooking, save more time in simplified clean-up chores. They're bristling with extras in the way of special broiler and oven features; rotisseries have been added in greater number and variety than ever before. The automatic top burner heat control has almost revolutionized top-of-the-range cooking.

Gas range buyers may pick from free-standing, built-in and stack-on models. They offer the widest possible in kitchen styling. Behind style features are solid assets such as improved burners, seamless construction and thicker insulation.

In central heating, gas-fueled furnaces, boilers and conversion burners are setting new high standards for quiet, clean, dependable performance. The gas appliance manufacturers' group points out that advances in central heating not only cover the field of producing heat more efficiently but also involve improved methods of distributing it throughout the dwelling.

Gas floor furnaces, wall heaters or wall furnaces, and direct heating equipment meet a wide variety of needs with outstanding economy as to both fuel costs and installation costs. Equipment in these categories is filling an important place in many erstwhile summer homes converted for year-round recreation use. Compactness and increased availability of automatic controls are among the advantages.

Automatic gas water heaters, favorites by a wide margin in the home water heating field, are the backbone of many modernization projects, particularly when new baths, washing machines or dishwashers are added. Some 10,000 of these gas water heaters are installed every business day. They offer "set it and forget it" dependability, and corrosion-resisting tanks, tank liners and other features are assuring longer life for this vital health item.

Gas clothes dryers, able to dry clothes faster than ever, at an almost unbelievably low fuel cost, have made the washline old-fashioned, and have brought drastic changes in laundry practice in many homes. Many homemakers no longer have a "washday;" they just wash, machine-dry and put away clothes as they happen to have opportunity. Often they're handling pillows, blankets and other items they would not undertake without help of the dryer.

Year-Round Comfort

Year-round air conditioning with gas, with one dependable fuel doing both the heating and cooling, has been advanced by new equipment models that are much more compact than older types. They offer silent, trouble-free operation, and the home owner can switch instantly from heating to cooling, or vice versa.

New models of gas incinerators can do a big job of home disposal of garbage and refuse—and do it without smoke or odor nuisances. The incinerator's appliance-like good looks, and its thick insulation make it acceptable in basements, utility rooms and sometimes even in kitchen. It disposes of all combustibles, from shredded paper to heavy bones, and eliminate fire hazards and insect breeding spots.

Thus there is new equipment to help every home owner in the benefits made possible by the great growth of the gas industry.

Roughly 85 per cent of all home cooking is done on top burners.

ICE APLENTY—No more wrestling with jammed ice cube trays for this smart homemaker. No more running out of ice cubes, either. She's showing off her Servel gas refrigerator with its automatic "ice server." The "ice server" makes ice cubes without trays and drops them into a never-empty basket. As she removes cubes, the unit automatically refills the basket. The refrigerator's smooth, silent operation preserves food much better, too. That's because it's a continuous rather than an on-again, off-again system. Unlike a motor-driven unit, gas refrigerators maintain a constant cold in every zone. A tiny blue gas flame does the whole job—silently, economically and automatically. Gas refrigerator shown above is a "built-in" model. See your local Servel dealer for other models.

Even Volcanic Rock Made Useful By Gas

Until a few years ago, just about the only people apt to be cooking with volcanic rock were South Sea Islanders who happened to live near volcanoes.

But today it's used right here in the states, along with chunks of various other material like ceramics and carborundum to produce some of our favorite national foods. The chunks form a glowing, ember-like bed when heated by a gas flame below. Above such radiant fragments hamburgers, hot dogs and other foods are broiled in thousands of eating places.

The technique, sometimes called char-gas broiling, lets the restaurant operator duplicate those wonderful picnic-ground flavors and smells, but without the long waits, uncertain results and higher fuel costs. It's the fat, dropping down on the glowing chunks and then flaring up again, that does the special trick.

Broilers of this type are younger members of the big commercial gas equipment family that handles some 95 per cent of all the country's hotel, restaurant and institutional cooking. It is believed that they date back only to trial installations in New York in 1948. Whether or not somebody can make an earlier claim, the fact is that most of the thousands of units now in use have been installed only during the past two or three years.

Gas Appliances Are Answer To "Whims Of Weatherman"

There used to be a saying that if you hung out a wash on the line it was sure to rain. And although Mark Twain is generally credited with the remark that everybody talks about the weather but nobody ever does anything about it, the truth is that Charles Dudley Warner wrote this in an editorial in the Hartford (Conn.) Courant in 1890. The astute Mr. Warner may have been right about that some fifty-odd years ago. But today? Not altogether right, Mr. Warner. For something has been done about the weather.

Just as the automatic washing machine started to take over washday drudgery in 1920, so today the automatic gas laundry dryer is eliminating all the heavy work entailed in drying clothes.

Time was when most homemakers trudged up the basement steps with a heavy basket of wet clothes, stretched a clothesline, stooped over hundreds of times to hang up the clothes. More often than not, a storm came up and the homemaker had to scurry out to struggle with flapping, soggy clothes, carry them indoors and hang them wherever she could in basement, bathroom, attic, kitchen or porch.

Takes Over Chores

The laundry dryer takes over this long list of heavy chores.

As soon as the washing is done, all laundry can be tossed into the dryer direct from the washer. The automatic timer is switched to the number of minutes of drying time required. From then on you don't have to do a thing. Thermostats control the heat and hold the temperature at the most suitable drying point. At the end of the drying period, the timer automatically switches off. The timer dial can be set so that clothes are completely dried for immediate storing or damp-dried for ironing.

Don't Iron Towels

Anything that goes into the washer can be dried in the gas dryer. White and color-fast clothes can be dried together. Each load in the average washer can be dried as it is washed with average drying time taking from 15 to 25 minutes.

NO MOVING PARTS

The absorption principle, on which the gas refrigerator is based, uses the law of gravity and the fact that gases take up heat when they expand. The refrigeration action involves a small flame and sealed-in liquids and gases, not moving mechanical parts. This is what enables these refrigerators to operate noiselessly and with full efficiency throughout their long lives.

The fortunate owner of a laundry dryer finds that her towels don't have to be ironed at all. Their texture is smooth instead of crumply and crooked from line-drying. All corduroys, chenille bedspreads, bathmats and most underwear needs only a gentle smoothing with the hand.

Since you don't have to depend on the weatherman's whims to decide when to wash, the clothes hamper never overflows. Washing and drying can be done two, three or four times a week. And that means you require a smaller supply of household linens or clothing. This is especially helpful where there are young babies or children in the house who must have lots of clothing no matter what the season.

There is saving in wear and tear. For all the problems of outdoor drying are eliminated — the dust, the rain, sleet and snow, the slipping clotheslines, the soot, smoke and smog.

Weather Not Important

We started with that old favorite topic — the weather. Yet to the many thousands of owners of gas laundry dryers, weather doesn't seem to be important after all. When the gas industry questioned dryer owners, they found that they liked best the fact that their clothes are soft and white and seem to have a finer texture. Next in importance to them is the great saving in work and time and ironing.

Maybe Charles Dudley Warner was right. Up to a point. But not a single owner of a laundry dryer will ever believe him. Because something has been done about the weather.

UNLITTERED HOBBYING

Almost any hobby is likely to generate combustible litter, whether its wood shavings, paper containers, or plastic wrappings. Then, too, the hobbyist may contribute food scraps and cigarette stubs. These are some reasons why gas incinerators are increasingly popular in basements devoted largely to recreation use. They permit quick and easy disposal of all types of combustible garbage and trash.

WASHDAY—WHAT'S THAT?

Virtual elimination of washday in many homes is one of the contributions of modern appliances, says the Gas Appliance Manufacturers Association. Women now can launder and dry clothes automatically as often as they want to, without letting them pile up for any special day. With gas providing the hot water and serving as fuel in the automatic dryer, the "wash often" plan can be economical as well as convenient GAMA says.

Help Save Space For Family Fun

Families today aren't just growing in size, they're growing in the number of interests for each member of the household. As a result, one of the most important objectives in typical home modernization projects is to develop useful recreation areas.

In some respects this is harder than merely finding space for some household operation, or for storage. Play space has to be clear space — you can't sit right next to a television set or a record player, or play ping pong around obstacles. It has to be comfortable space, with the right temperature and freedom from dust and noise.

These requirements, say heating experts, help explain the tremendous popularity of gas-fueled wall heaters, or wall furnaces. Fitting snugly into a wall, they require little or no floor space. Their quiet operation, attractive finishes and improved insulation make them good "close quarters" companions. Automatic controls assure their giving out steady, even heat at any desired temperature.

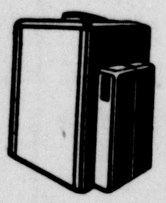

A good rule-of-thumb to follow in estimating hot water needs is to figure 25 to 30 gallons per person per day.

Top-Of-The-Stove Magic Is Performed On Gas Range

Another gas range "first" is ready for the market — a unit that roasts, grills, bakes, shallow-fries, deep-fries, steams and barbecues, and does it all on the top of the stove.

This unit — a dome-covered tray with assorted aluminum inner works — is described as the gas industry's "answer to the advancing host of plug-in auxiliary cooking appliances." It's called a "roast-o-grill," and it's the product of two years' development by a leading range manufacturer in cooperation with a utility company and the gas industry's testing laboratories.

The "roast-o-grill is built right into the top of the stove directly over a gas burner equipped with an automatic control that regulates temperature for any and all of the cooking process.

36-Inch Range

The 36-inch range that embodies the new unit also has four regulation top burners — including one with automatic heat control — as well as a regulation oven and broiler.

After any cooking operation, the entire "roast-o-grill" can be lifted out of the range top and washed like an ordinary utensil. Also, when not in use, it can be stored in a special pot-and-pans compartment in the lower part of the range, and in its place is a bright chrome cover that fits flush with the range top to provide extra working space.

Versatility Demonstrated

Gas industry officials generally seem to regard this latest top-of-the-stove idea as nearly as revolutionary as the automatic top-burner heat control that was pioneered on gas ranges.

An audience of utility home service directors recently witnessed a series of demonstrations of the versatility of the "roast-o-grill," including the following:

Preparation of a bacon-and-eggs breakfast for an entire family, to demonstrate the simplicity of the frying process as well as the large capacity of the built-in grilling-roasting pan.

Steaming of corned beef, cabbage, onions and potatoes, to show how the shape and construction of the dome enable it to condense moisture and drip it back on to the food.

Baking of layer cakes, pies and biscuits on a baking-roasting rack, with "results that please the taste and the eye and without the usual pre-heating of the oven."

Roasting of meats and poultry (including a 16-pound turkey) by both the dry heat and moist heat, or braising methods. In all cases, it was possible to prepare vegetables under the "roast-o-grill" dome in the same process.

Grilling of meats, sausages, cheeses, patties, fish, hash, wieners, pancakes and eggs.

Deep-fat frying of potatoes, sea food, meats and doughnuts.

Barbecuing of ribs by a combination of steam and dry heat.

Pan-broiling of chops, steaks, fish, etc.

The Dome Does It

Designers of the "roast-o-grill" point out that its dome is the engineering achievement that makes possible the unusual functional variey of the new gas range feature. Actually, they explain, there is an inner dome and an outer dome with an adjustable shutter between them that can be set to assure maximum ventilation and heat diffusion for each cooking process — and a minimum of heat loss. This means fuel economy because the heat is concentrated in the cooking area, and there is no oven cool-off to sweat out after the meal is prepared.

In addition to this new top-of-the-stove development, members of the gas range industry recently introduced such features as a triple-spit rotisserie built into the regulation gas broiler, a periscopic mirror that provides a clear view of cooking or baking progress without opening the oven door, counter-balanced oven doors, an oven liner fed by a roll of aluminum foil so that cleaning is simplified, a range that is part of a complete one-piece "cooking center" including a stove, shelf, fan and insulation (to achieve the built-in look without a kitchen-remodeling job), and, of course, the new "burner with a brain" equipped with an automatic control that keeps cooking temperature within two degrees of the pre-set level.

NO MORE GARBAGE CANS for this modern homemaker. She's solving her garbage and waste disposal problems the modern way with an automatic gas incinerator. She simply drops garbage into her gas incinerator and walks away. Gas dries out wet garbage, reduces the load, then consumes every scrap. It turns bushels of refuse into a mere handful of white ashes. Clean, healthy, gas incinerators are highly economical to operate.

GAS FURNACE FLEXIBILITY IS "OUTSTANDING"

Professional heating experts have helped make the gas-fueled forced warm air furnace the country's top choice in residential heating. Ask one of them why, and a word you're pretty sure to hear is "flexibility."

What does flexibility mean in a home heating system?

Webster helps answer that with the definition of flexible as "not stiff or rigid . . . easily persuaded or influenced, tractable . . . adjustable to change, capable of modification."

The gas furnace doesn't make any "rigid" demands as to the space it must occupy — models are available for virtually every part of the home. It is "easily persuaded" to quick and silent heating action by the thermostat's demand, whether through an automatic signal or householder's action.

Adjustable To Change

It is "adjustable to change" as demanded by the weather, or by a change in heating requirements in different parts of the home. The gas furnace works at top efficiency whether taking the chill off a fall morning or defying winter's coldest blasts.

And as for being "capable of modification," that's outstandingly demonstrated in the many ways gas forced warm air systems are used in connection with whole-house air conditioning. Blowers, air filters and ducts serve both summer and winter. Many systems are especially designed for add-on cooling.

These are some of the things experts mean when they praise the "flexibility" of the gas-fueled forced warm air furnace.

VENTED THROUGH WALL

A small opening cut through an outside wall provides easy venting for the "through-the-wall" gas heaters favored for many installations. Outside air is drawn into these units for combustion and the products of combustion are expelled outdoors, without need for vent pipes other than those built into the heaters themselves.

GOOD COOKS SHOULD HAVE GOOD TOOLS

What would you think of a restaurant owner who hired one of the country's finest chefs, then kept him busy much of the time cleaning pots, wiping stoves and watching out for boil-overs?

It's just as silly, says the Gas Appliance Manufacturers Association, to bury the creative cooking skill of the homemaker beneath a host of drab, dull jobs, Margaret Spader, GAMA home service editor, says that many a husband doesn't really know how good a cook his wife is because she doesn't have time to prove it.

The professional chef, Miss Spader points out, usually not only has fast, precise, automatic gas equipment to help him, but also assistants to do some of the routine chores. The homemaker, without the assistants and with a number of diversionary tasks, needs the help of automatic equipment and good kitchen planning to free her creative skills.

Dependable Timing

The precise, dependable timing and temperature control features of the new gas ranges do that, points out the home service director. So do the easy cleaning features of free-standing ranges or built-in units, and the energy-saving aspects of broiling without stooping, of rotisseries and simmer burners.

Basic in this whole picture, reminds Miss Spader, is the need for a good cook to have instant command of a wide range of cooking temperatures. "Along with skills in selecting and blending ingredients, a mark of the truly fine cook is sort of a 'sixth sense' in selecting just the right temperature for a particular operation," comments Miss Spader. "Recipe books can help, but never can fully substitute for the ability to make adjustments for variations in ingredients, differences in family tastes and particular problems of meal timing.

Retain Natural Juices

"For instance, we know that rotisserie cooking, in the new gas ranges, retains more of the natural juices in meats and poultry. That appeals to most tastes, but some may want a bit of the crisp-on-top that comes with conventional roasting. With the modern range, that can easily be provided too."

But isn't this supposed to be the age of ready-prepared, just-heat-and-eat foods?

They're a supplement to, not a substitute for, cooking skill, says Miss Spader. In fact, convenience foods may help provide time for planning and executing more intricate cooking endeavors.

But how about mother and grandmother—weren't they good cooks without the help of automatic aids?

True, agree Miss Spader, but they were good cooks despite such handicaps, not because of them. And while some tasks have taken away from the homemaker, others have been added. Aside from the possibilities of an outside job, today's housewife has added responsibilities, such as record-keeping tasks and a livelier interest in community affairs.

New Gas Furnaces Make Cooling Easy

The newest lines of gas-fueled forced warm air furnaces offer special advantages for the home owner who wants to prepare for whole-house air conditioning but doesn't feel he's able to afford it right away.

For instance, some models have larger blower capacity, designed with an eye to future cooling use. This is achieved without sacrifice of compactness; units offering this advantage may be only 48 inches high.

Special dampers have been devised to reduce internal resistance during the cooling operation and increase cooling air capacity, without blower adjustment. Various other improvements, both in gas furnaces and in duct systems, have been designed with future air conditioning use in mind. They add to the basic advantage that blower air filters and ducts can do double duty, serving summer as well as winter.

KITCHEN STILL GROWING?

There's been a trend to larger kitchen—and we may not have seen the end of it yet. Kitchens of the future may be even larger, says the Gas Appliance Manufacturers Association, which notes such factors as large families, absence of servants, and a tendency to make the room a family gathering center.

BUILT-IN ICE SERVER

A growing demand for built-in kitchen equipment has prompted the making of gas refrigerators easily adaptable for recessed installation. A frame of anodized and polished aluminum is provided for this purpose. An automatic ice server is among the features of the new gas refrigerators.

make every pot and pan an automatic utensil... with

Caloric THERMO-SET GAS TOP BURNERS

No burning, no boilovers, no hovering over the range . . . watching . . . worrying . . . and constantly adjusting the flame. The modern housewife depends on THERMO-SET . . . and so will you, once you try it.

You simply dial the temperature you want, just as you set your oven control. The "sensing element" keeps food temperatures constant and assures perfect results every time, whether you're preparing a delicate hollandaise sauce or simply heating left-over mashed potatoes. THERMO-SET makes every pot and pan an automatic utensil.

And Caloric is the best-looking, best-cooking range at the price you'll find anywhere!

Smart, 3-dimensional-design backguard has fluorescent light, sweep-second clock, one-hour timer, handy outlet. Divided top carries out symmetrical styling. All four burners are giant, hi-speed, 12,000 BTU burners.

Big 4300 cu. in. oven holds 35-pound turkey. Newest silicone door seal. Hi-low broiler rolls out at a touch.

Look at all the features and you'll want Caloric—America's easiest range to keep clean.

DROP COOKIES FILL THE BILL; EASY TO MAKE

By CECILY BROWNSTONE
Associated Press Food Editor

Parties for youngsters needn't be a chore for mothers if they let school-age girls and boys in on the planning and encourage them to do some of the preparation. Kids love activity and they'll get a big thrill out of helping.

For an afternoon birthday party, hot cocoa and sandwiches, ice cream plus the birthday cake and cookies will be a spread. If you choose a simple drop-cake recipe such as this one, your Junior Miss — with a slight assist — can bake them. This recipe recommends itself because it makes four different sorts of cookies so party guests can take their choice.

Four-Way Cookies

Ingredients: For the basic dough — 4 cups sifted flour, 1 teaspoon baking soda, 1 teaspoon cream of tartar, ¼ teaspoon salt, 1 cup golden shortening, 2 cups light brown sugar (firmly packed), 1 teaspoon vanilla, 2 eggs, ½ cup milk; flavor extras listed under variations.

Method: Sift together the flour, baking soda, cream of tartar and salt several times. Cream shortening, brown sugar and vanilla; beat in eggs thoroughly one at a time. Stir the sifted dry ingredients into the creamed mixture, alternately with the milk, until smooth. Pack dough down in bowl with a spatula so top is flat and even. Mark off into four parts with a knife. With a large spoon, put three of the parts into separate mixing bowls. Follow directions under variations for adding to each of these batches of dough. Then drop cookies from a teaspoon, with the help of a rubber spatula, onto greased baking sheet; leave a couple of inches space between cookies. Bake in moderate (350 degrees) oven for 12 to 15 minutes or until lightly browned and baked through. Remove to wire rack with spatula to cool; store in tightly cored container. Makes 6 to 8 dozen (2 inches in diameter) cookies.

Four-Way Cookie Variations

Spice Cookies: To first part of cookie dough, stir in thoroughly 1 teaspoon cinnamon, ½ teaspoon nutmeg and ½ teaspoon ginger.

Fruit Nut Cookies: T second part of cookie dough, stir in well 1 cup coarsely chopped walnuts or pecans and ½ cup chopped pitted dates.

Chocolate Almond Cookies: To third part of cookie dough, stir in thoroughly 1 package (6 ounces) semi-sweet chocolate pieces and ½ cup chopped blanched almonds.

Cherry Coconut Cookies: To fourth part of cooke dough, stir in 1 teaspoon grated lemon rind, 2-3 cup well-drained chopped maraschino walnuts or pecans and 1 cup flaked coconut (lightly packed).

STUFFED FISH FILLETS MAKE TASTY DISH

By CECILY BROWNSTONE
Associated Press Food Editor

All our taste-testers enjoyed fresh flounder fillets when we baked them with a buttery-rich vegetable and bread crumb stuffing. Grated carrot and chopped celery and onion are the vegetables that go into the stuffing, so choose green peas or snap beans or a crisp green salad to accompany this dish.

If there should be any of the stuffed fillets leftover, remove them carefully with a wide spatula to a small baking dish, cover it with foil and refrigerate; next day heat in a very hot ovel We save the oblong aluminum foil pans from ready-cooked frozen foods and use them for storing and reheating.

Stuffed Fish Fillets

Ingredients: ½ cup butter of margarine, 1½ cups finely grated carrot, 1 cup finely chopped celery, ½ cup finely chopped onion, 2 cups (4 slices bread including crusts) fresh bread crumbs, ¾ teaspoon salt, ¼ teaspoon white pepper, ¼ teaspoon dried crumbled thyme, 2 tablespoons lemon juice, 8 fresh flounder fillets (about 2 pounds,) paprika.

Method: Reserve 1 tablespoon of the butter; melt the remaining butter in a 10-inch skillet. Add the grated carrot, chopped celery and onion. Cook gently, stirring occasionally, until partly tender — about 10 minutes. Add the bread crumbs, salt, pepper, thyme and lemon juice: mix well. Arrange 4 of the fish fillets in a baking pan so they cover the bottom; a pan that is about 8 by 12 inches is a good size. Spoon the stuffing evenly over the fish; cover with remaining fillets. Sprinkle fish with paprika. Dot with remaining tablespoon of butter. Bake in moderate (350 degrees) oven 40 to 45 minutes — until fish is opaque through and flakes easily. Baste several times with butter that drips down. Makes 6 servings.

Note: Frozen fish fillets may be used in this recipe if they are thawed first. Perch would be a good variety to choose.

Gas is preferred for water heating over other type water heaters because it affords a maximum in speed and economy.

DESIGN IN MINIATURE — A three-wheeled one-man vehicle named Mopetta is dwarfed by huge wheel of another vehicle at Frankfurt exhibition. The German-manufactured car has 2½ horsepower air-cooled engine, can cruise at 27 miles per hour and sells for $250.

NEW ROLE — Irene Dunne, known to millions of theatergoers, takes on duties of a serious nature as she attends U.N. General Assembly session as member of United States delegation.

Camera News

By IRVING DESFOR
The Associated Press

Fall can be a busy season for home movie fans both outdoors and in. Outdoors. Mother Nature daubs the countryside in rainbow colors that form a brillant background for football games or family excursions. Indoors, this is a ideal time to splice and edit the summer's crop of movies.

Of course, it's a good idea to use thought during the shooting stage so as not to depend entirely on editing later on to salvage your movies. The film's interest can be heightened greatly by varying shooting distances. A turret camera or one with interchangeable lensse accomplishes this with no physical exertion, but you can still get long shots, medium views and smash closeups with a single lens by resorting to leg work. Just remember that it's worth the effort while shooting.

Flexibility Required

A certain amount of flexibility is required also in judging the length of time for each scene. While they average from five to eight seconds, simple closeups can be a bit shorter and busy long shots may require 10 seconds or more for the eye to take all in.

Movies at a football game, for instance, might linger on the first overall view which establishes the scene. If panning is done at all, it should be done very slowly and very steadily. Then the camera, just like a spectator's attention, would shift to short, closer views of the people in the stands, the band and cheerleaders, the substitutes' bench as well as the action on the field. With a telephoto lens, a glimpse of the scoreboard followed by a closeup of individual joy or gloom, as the case may be, would make a good finish.

Need Basic Value

Like a gem which has to be cut and polished to bring out its full perfection, home movies must have basic value to start with — some degree of technical perfection and interesting subject matter. The polish is added by cutting, editing and splicing sequences together to make the best possible story.

Some sound advice on "Editing for Betted Movies" has been compiled by Leo J. Heffernan, consistent winner of many motion picture competition. The pamphlet, published by the Kalart Company, Inc., and available at your local camera store, should make home showings a more entertaining treat.

Thin white cotton gloves are recommended to prevent fingerprints while handling film in editing. Even tiny amounts of finger perspiration will leave its mark on color film.

Splicer Is Important

The most important tool is a splicer that has precisely spaced sprocket guide pins and cuts the film ends cleanly and exactly. The scraper must be sharp to remove the emulsion quickly and the clamping device must exert unfailing, overall pressure or the film will come apart in projecting.

A small film viewer is the handiest aid in editing. It permits you to study each scene carefully, running it backwards and forwards, until you can select the precise frame to cut at.

Good quality fresh film cement ensures a perfect bond and is the most economical investment for the long pull — in the projector.

Film sorters are handy devices for filing individual lengths of film or sceines until they can be spliced in proper order. The two types most popular with moviemakesr are the bin type and the rack type.

Use Egg Carton

An empty egg carton is a ready-made bin type film sorter which will hold 12 lengths of film, Heffernan suggests. A bin type sorter can also be made out of wood or heavy cardboard to form compartments which are two inches square and three-quarters of an inch deep. The film lengths are rolled up to fit in the compartments, each of which is numbered.

A rack type sorter features a row of headless nails driven into a length of wood, three-quarters of an inch apart. About one-half inch of each nail protrudes from the wood, and they are numbered consecutively. The lengths of film hang from the nails by a sprocket hole.

WIDE VARIETY OF READING ON NEW FALL LISTS

By W. G. ROGERS
Associated Press Arts Editor

(ADVANCE) NEW YORK (AP) — "Cornflake Crusade," "North American Head Hunting," "The Call Girl," "The Education of a Poker Player," "Motels, Hotels, Restaurants and Bars," "Why We Behave Like Americans," "Does Man Survive Death?" "How to Live with a Neurotic" — these titles give you an idea, but not really an adequate one, of the unlimited range of reading which the versatile and generous publishers are making available to you this fall.

The length of the lists seems to indicate the choice is bigger than ever — and so does the staggering number of copies under which already this month a critic's desk begins to sag and threatens to collapse.

Highlighting the lists are names with which every reader is familiar, so familiar first names may be dispensed with: Sagan, McCullers, MacLeish, Lerner, Agee, Sitwell (Edith, not one of the brothers) and many others.

Many Autobiographies

More artists than usual are writing their autobiographies, or are being written about, or are appearing in handsome picture books: Picasso, Calder, Shahn, Dali, Chagall, Rodin, Michelangelo.

Besides, some unusually fine art books are promised: Rome, Venice, Vienna, South America, the whole wide world in collections of photos, records of Flemish art, American art. In particular you will want to bear in mind "300 Years of American Painting," a Time magazine project by Time editor Alexander Eliot. Frank Lloyd Wright is doing "A Testament."

Biographies and autobiographies of a long list of ladrs in various fields, the living nd the dead, are upcoming also btween now and Christmas: James Whitcomb Riley, Byron, Fanny Burney, Verlaine, Steinbeck, Roger Williams, Bernard Baruch — the Margaret Coit biography following the autobiography — Walt Disney, Conrad Hilton, Branch Rickey, Dana Dubinski.

Civil War Popular

Is the Civil War your pet subject? There will be "This Was Andersonville," by John McElroy. Do you lose sleep over the battle of the ideologies? Then you must read "The Naked God," Howard Fast's story of his break with communism. Do you want to know the record of the Atlantic? There is "Jubilee: 100 Years of the Atlantic," edited by editor Edward Weeks and Emily Flint. Are you interested in history? There will be "Atlas of World History." How do you stand on Colin Wilson? The author of the popular "The Outsider" follows it up with "Religion and the Rebel."

From the writers already mentioned there are coming these books: "Those Without Shadow," Francoise Sagan; "The Square Root of Wonderful," Carson McCullers; "J. B.," Archibald MacLeish; "America as a Civilization," Max Lerner; "A Death in the Family," James Agee; "English Eccentrics," Dame Edith Sitwell.

There also will be the much touted "Not by Bread Alone," by Vladimir Dudintsev, the Communist who writes with hazardous frankness about his land.

Other scheduled fiction is: "The Violated," Vance Bourjaily; "The Return of Lady Brace," Nancy Wilson Ross; "Maggie-Now," Betty Smith; "Something About a Soldier," Mark Harris.

From Edwin O'Connor comes "Benjy: A Ferocious Fairy Tale." Ogden Nash will write about "The Christmas That Almost Wasn't."

Cooking Is Fun

WEIGHT-WATCHERS' SUPPER

This salad dressing will save you calories!

Tomato and Clam Juice
Broiled Lamb Chops
Minted Green Peas
Melba Toast
Tossed Green Salad with Buttermilk Dressing
Fruit Beverage

BUTTERMILK DRESSING

Ingredients: 1 cup buttermilk, 2 teaspoons lemon juice, 2 teaspoons red wine vinegar, 1 teaspoon sugar, 2 fresh basil leaves (minced) or dried crushed basil (to taste), salt, freshly-ground pepper

Method: Beat all ingredients together with a fork adding salt and pepper to taste. Just before serving add enough dressing to moisten greens and toss. This dressing is also good with sliced cucumbers and tomatoes. Store any dressing left over in refrigerator and use next day.

SUMMER SUPPER

Top-of-the-range meat dish and a prepare-ahead salad.

Skillet Veal Chops
Steamed Rice
Green Bean and Tomato Salad
French Bread
Fresh Berries with Custard Sauce
Beverage

GREEN BEAN AND TOMATO SALAD

Ingredients: 1 can (1 pound) cut green beans, 2 tablespoons olive oil, ¼ cup tarragon wine vinegar, ½ teaspoon salt, ⅛ teaspoon paprika, white pepper, 1 large clove garlic, 4 to 8 small or medium-sized tomatoes, salad greens.

Method: Drain beans thoroughly. Put the olive oil, vinegar, salt, paprika, dash of pepper in a flat container. Cut garlic into 3 or 4 pieces and add. Beat with a fork; add drained beans. Cover and refrigerate for several hours or all day, turning beans a few times in the marinade. Remove garlic. Cut tops from tomatoes and scoop out insides. Fill tomatoes with marinated beans. Garnish with salad greens. Makes 4 to 8 servings. If only 4 tomatoes are used, not all beans will be needed for stuffing; pile remaining beans on salad greens and serve with tomatoes.

GOOD LUNCH

Nice new touch for hamburgers.

Hamburgers with Chutney Sauce
Toasted Buns Salad Bowl
Fruit and Cookies Beverage

HAMBURGERS WITH CHUTNEY SAUCE

Ingredients: 1½ pounds ground beef, butter or margarine, salt, pepper, ¼ cup finely chopped mango chutney, 1 cup chicken stock.

Method: Shape beef into 4 patties Brown rapidly in a little butter in 9- or 10-inch skillet; sprinkle with salt and pepper: Reduce heat to low and cook to desired doneness, turning patties again to cook evenly. Remove to warm platter. Add chutney and chicken stock to skillet; cook rapidly until reduced to about one-half. Pour over hamburgers. Good over split buttered toasted hamburger buns.
